BU 3420 - MV fuses –what is this?

HV current limiting fuses main groups

1) Back-up fuses

can continuously conduct currents up to their rated current and can disconnect only currents above a specific multiple of their rated current
Suited for application in switch/fuse combinations.

2) General purpose fuse

can continuously conduct currents up to their rated current and can disconnect currents from the smallest fusing current to the rated breaking capacity.

3) Full range fuse

every current that results in a melt-through can be interrupted

MV fuses portfolio - *VT fuses*

- VT protection can utilize Back-up fuses or special VT fuses - depending on VT's design.
- ABB produces and recommends to use special VT fuses.
- VT Competitors use Back-up fuses (2 A and higher ratings) or special types VT fuses

BU 3420 - MV fuses –DC fuses

MV fuses portfolio - *DC fuses*

- There are few dimensional standards - depend on tradition on the markets.
- ABB types DC fuses exist on following markets: Poland, Czech, Slovakia, Croatia, Hungary.
- There are Italian types - Italian Railway special requirements – ABB is one of main suppliers
- There is a big DC fuse market - semiconductors protection - main suppliers Bussmann, Ferraz
