First and largest european specialist in Electrical safety equipment

CATU was created in 1919 and, since the beginning, it has dedicated its activity to the manufacture of material and equipment for electricity networks and installations.

Since 1936, CATU's activity has been concentrated on equipment for personal protection against electrical hazards and accordingly, has now 70 years experience in this field.

After the end of World War II, many French companies involved in Production, Transmission and Distribution of Electrical Energy were amalgamated into one National Company, called "Electricité de France" (EDF).

A short time later, a central department for Safety and Prevention of Accidents was created within EDF. Because of the experience that CATU already had in this field, a very close cooperation was forged between EDF and CATU which resulted in joint development and improvement of all the important Safety Material and Equipment now used in France.

The international recognition gained by EDF in this field has contributed to giving CATU a foremost position at the World Wide level.

At the present time, CATU Safety Equipment, including all the range of short-circuiting and earthing systems, the DETEX™ voltage detectors and testers, the live working tools and the individual equipment for linesmen, is used by the Main Power Utilities, Electrical Contractors, Large Industries and Railways in about 100 countries spread over the 5 continents.

CATU's experience and level of investment and research is unmatched. As a member of the main national and international technical committees (such as UTE, CENELEC, IEC and ASTM), CATU is contributing to the development and application of the latest technologies. This quest for continuous improvement is now reinforced with the ISO 9001 Quality Insurance Certification.

Our endeavours to be the Specialist in Electrical Safety Equipment are made with genuine dedication to all aspects of Safety Engineering Principles. Together with our network of distributors, we acknowledge our commitment and obligations to our customers.

CATU is a Group Sicame Company

General Products index	4	IEC Standard	9
General References index	6	Golden rules	10

Low voltage

Below 1000 V

Equipment guide	14	Installation testers	28
Personal protective equipment	18	- insulation tester	28
- head and eyes protection	18	- installation testers identifier	29
- insulating rubber gloves	20	- multimeter clamp-meter	31
- insulating mats and boots	21	Short-circuiting and earthing systems	32
Safety padlocks and warning signs	22	- for bare overhead lines	32
- padlocks	22	- for insulated overhead lines	33
- warning signs and delineators	23	- for consumer units	34
- self adhesive warning signs	24	- ISOSTOP™ system	34
Voltage detectors and testers	25	- jumper systems	34
- 6 to 690 V detectors and testers	25	- mini jumper clamps	36
- voltage detectors accessories	27	Bimaterial insulated tools	38
		Insulated tools	41

Medium voltage

From 1kV to 52 kV

Equipment guide	54	Voltage detectors	79
Personal protective equipment	58	- IEC electronic voltage detectors	79
- head and eyes protection	58	- standard electronic voltage detectors	80
- insulating rubber gloves	60	- insulating sticks	81
- insulating mats and platforms	61	- phase comparators	82
- arc flash equipment	62	Short-circuiting and earthing systems	84
- equipment for working on pole	63	- cables	84
- padlocks	67	- IEC overhead lines systems (work from pole)	85
Substation equipment	68	- clamps and accessories	86
- warning signs and delineators	68	- over head line system (work from ground)	87
- safety equipment	71	- insulating sticks	88
- IEC short-circuiting and earthing systems	72	- disconnect and measuring sticks	89
- clamps and earth clamps	73	- underground systems	90
- insulating sticks	74	General tools	91
- special short-circuiting and earthing systems (for 200 and 400 A separable connectors)	75	- sticks accessories	91
- voltage detectors and indicators	76	- tensioning equipment	93
- life saving kits	78	- handling and uncoiling blocks	95
		Earth rods	96
		- earth rods and connectors	96
		- earthing clip and earth tester	97

High voltage

Above 52 kV

Equipment guide	100	Voltage detectors	113
Personal protective equipment	102	- electronic voltage detectors	113
- head and eyes protection	102	- insulating sticks	114
- insulating rubber gloves	104	Short-circuiting and earthing systems	115
- insulating mats and boots	105	- HV and EHV clamps	115
- equipment for working on pole	106	- insulating sticks	116
Safety padlocks and warning signs	110	- earth clamps	116
- padlocks	110	- fixed points and cables	117
- warning signs	111	- accessories	118
- delineators	112		

A

Adhesive tape (safety)	.23
Adaptors for insulating sticks	.91
Adjustable spanner (insulated tools)	.46
Anti-fall grip	.63/106
Anti-fall device	.65/108
Arc flash equipment	.62

B

Bags	
- For tools	.50
- Carrying for rubber gloves	.20/60/104
- For earthing systems	.118
- For insulated sticks	.89
- For insulating mats	.21/61
Bent snipe nose pliers (insulated tools)	.39/42
Bimaterial insulated tool set	.40
Blocks	
- Opening	.95
- Uncoiling	.95
Boots, insulating	.21/61
Boundary post	.23/70/112
Brushes	
- For conductors	.92
- Cleaning	.92

C

Cable cutters (insulated tools)	.39/43/44
Cable launcher projector	.118
Cables	
- Copper for earthing systems	.84/117
- Aluminium for earthing systems	.84/117
Chain delineator	.23/70/112
Clamps, short-circuiting systems	
- Medium Voltage	
. For installations and substations	.73
. Automatic	.85
- High voltage	
. Manoeuvrable by insulating sticks	.115
. Rope operated	.118
Clamp dispenser heads	.86
Climbers	
- For wooden poles	.66
- For rectangular shaped concrete poles	.66
- For round and hexagonal concrete poles	.66
- For H profile pole	.66
Come-along	
- Automatic clamp	.93
- Adjustment	.93
- Parallel jaws	.94
Combination wrench (insulated tools)	.46
Comparator, sound phase	.77
Comparators, Two poles phase	.82/83
Comparator single pole	.83
Connector with stick adapter	.65
Connectors for earth rods	.96
Constraint tie	.65/108
Covers for insulating sticks	.88
Cranked ring wrench (insulated tools)	.47
Crocodile clamps (safety)	.27

D

Delineators	.23/70/112
Descent device	.63/106
Diameter gauge	.92
Digital clamp meter	.31
Digital multimeter	.31

E

Earth clamps, High Voltage	.116
Earth clamps, Medium voltage	.73
Earth rod for low voltage	
earthing systems	.33
Earth rods for medium voltage	
Earthing clip	.97
Earthing systems	.86
Earth rods	.96
Earthing systems	
- Low voltage	
. For overhead lines	.32/33
- Medium Voltage	
. For overhead lines IEC	.85
. For overhead lines	.87
. For substations IEC	.72
. For substations (for 250 and 400 A connectors)	.75
. For underground cables	.90
- High Voltage	
. High voltage systems	.115/116
Electrician's scissors	.45
End cutting pliers (insulated tools)	.43

F

Face shield	.18/58/102
Fall arrester	.64/107
Fixing tools for warning signs	.23
Fixed points	
- Medium Voltage	.73
- High Voltage	.117
Flags, warning	.70/112
Flat nose pliers (insulated tools)	.39/42
Frontal ratchet cable cutter	.44
Fuse holder for substation	.71
Fuse puller	.92

G

Glasses	
- Safety glasses	.18/58/102
- Safety overglasses	.18/58/102
Gloves	
- Insulating rubber gloves	.20/60/104
- Overgloves	.20/60/104
- Undergloves	.20/60/104
- Working gloves	.20/61/104
Gloves storage box	.20/60/104
Gloves tester	.20/60/104
Guying equipment	.95

H

Hacksaw (insulated tools)	.44
Handle for padlocks	.22/67/110
Harness	
- Full body fall arrest	.63/106
- Pro electric full body fall arrest	.63/106
Headlamps	
- With adjustable focus	.19/59/103
- With leds	.19/59/103
- Atex with leds	.19/59/103
Helmets	
- ABS	.18/58/102
- Polycarbonate	.18/58/102
Hexagonal spanner (insulated tools)	.47
Hooks	
- Manoeuvring	.92
- Pig tail	.92

I

Indicator phase rotation, low voltage	.26
Indicators	
- Permanent luminous	.76
- Permanent for medium voltage cubicles	.77
Insulated tools	
- Bimaterial insulated tools	.38
- Bimaterial insulated tools kits	.40
- Insulated tools	.41
- Insulated tools kits	.50
Insulating mats	
- Low voltage	.21
- Medium voltage	.61
- High voltage	.105
Insulating platforms	
- Medium Voltage	.61
- High Voltage	.105
Insulating sticks	
- Medium voltage	
. Clampsticks	.74/89
. Disconnect telescopic	.89
. Measuring telescopic	.89
. For substation short-circuiting systems	.74
. For overhead lines short circuiting systems	.88
. For voltage detectors	.81
. Rescue stick	.78
- High Voltage	
. For short-circuiting systems	.116
. For voltage detectors	.114
. Rescue sticks	.105
Intervention kit (substation equipment)	.71
(for electricians)	.51

J

Jumper cables with clamps	.34
Jumper cables with threaded ferrules	.36
Jumper cables with insulated clamps	.37
Jumper connecting box	.37

K

Kits	
- Intervention for substations	.71
- Insulated tools	.50
- For working on pole	.65/108

L

Ladders	.66/109
Lamp, safety for substations	.71
Lanyard	.64/107
Life saving kits for substations	.78
Long nose pliers (insulated tools)	.42
Lockout for single pole breaker	.22
Lockout with padlock for single pole breaker	.22
Low voltage complete set	.51

M

Markers	.22/67/110
Mats, insulating	.21/61/105
Mechanical adjusters	.94
Mini jumper clamps	.36
Multimeter	.31

O

Open end spanner (insulated tools)	.47
------------------------------------	-----

P

Padlocks, safety	.22/67/110
Platform, insulating	
- Medium Voltage	.61
- High Voltage	.105
Plug pliers (insulated tools)	.43
Probes	
- Contact probes for L.V testers	.27
- Safety test probes for voltage detectors	.27
- Safety test probes for multimeter	.31
Pruning saw	.92

R

Ratchet cable cutter (insulated tools)	.44
Ratchet lift-chain hoist	.95
Reel launcher	.118
Rescue sticks	
- Medium voltage	.78
- High voltage	.105
Right angle hexagonal key wrench (insulated tools)	.46
Rope	
- Safety	.64/107
- Straps with lever stretcher	.63/106
- With energy absorber	.63/106
Round nose pliers (insulated tools)	.39/42
Reversible hexagonal ratchet handle	.46

S

Screwdrivers (insulated tools)	.38/41
Short-Circuiting Systems	
- Low voltage	
. For bare conductors	.32
. For insulated conductors	.33
. For consumer units	.34
. Isostop system	.34
. Equipment for consumer units	.35
- Medium Voltage	
. For overhead lines IEC	.85
. For substations IEC	.72
. For substations (for 250 and 400 A connectors)	.75
. For underground cables	.90
- High Voltage	
. High voltage systems	.115/116
Shunt telescopic probe	.37
Side cutters (insulated tools)	.39/43
Snap hooks	.64/107
Sockets 3/8" long series (insulated tools)	.49
Sockets 3/8" U.S standard (insulated tools)	.49
Sockets 6 sided Male (insulated tools)	.49
Sockets wrench set (insulated tools)	.48/49
Stepladders, insulating	.21
Stick case	.114
Sticks, Insulating	
- Medium voltage	
. Clampsticks	.74/89
. Disconnect telescopic	.89
. Measuring telescopic	.89
. For substation short-circuiting systems	.74
. For overhead lines short circuiting systems	.88
. For voltage detectors	.81
High Voltage	
. For short circuiting systems	.116
. For voltage detectors	.114
Stripping pliers (insulated tools)	.45
Stripping knives (insulated tools)	.45
Switching devices identifier (L.V.)	.29

T

Tap off box	.37
Testers, Low Voltage	
- For electrical installations	.29
- For voltage	.25/26
- Earth tester	.30/97
- For insulation	.28
Threaded adapter	.37
Testing device for phase comparator	.82
Tether rope	.64/107
Torch safe light	.71
Torque wrench 3/8", insulated	.49
Trimmer	.92

U

Universal pliers (insulated tools)	.39/42
------------------------------------	--------

V

Voltage detector for permanent indicators	.76/77
Voltage detectors	
- Low voltage	
. Muti-tester	.25
. With phase rotation	.26
- Medium voltage	
. Indoor use	.76
. Compact serie	.76
. For separable connectors	.76
. Electronic IEC	.79
. Electronic standard	.80
- High voltage	
. Electronic	.113

W

Wall mounted supports	.74
Warning signs	
- Self adhesive	.24/68
- Low voltage	.23
- Medium voltage	.69
- High voltage	.111
Waterpump pliers (insulated tools)	.39/43
Winches	.94
Wire stripping pliers (insulated tools)	.39/45
Working on pole kits	.65/108

The characteristics and technical informations stated in our literature are only for your guidance and therefore cannot be considered as contractual. Our company is entitled to modify at any time the characteristics of its equipments. In case of modification of these characteristics, our company would not be obliged to supply materials conform to those previously in force.

"Alu-Metal, Alu-Script, Catu, Catex, Catohm, Clipblock, Detex, Detex-Lumifix, Isomil, Lowlock, Major, Normafix, Normagrif, Pelican 2, Piezo-Test, Pointest, Snaplock, Triplex" are trade marks of Catu S.A.

IEC Standard

International Electrotechnical Commission is a worldwide organization for standardization comprising national electrotechnical committees (NC). The object of the IEC is to promote international cooperation on all questions concerning standardization in the electrical fields. These standard have been approved by more than 50 different countries including Australia, Canada, China, France, Germany, Japan, Russia, Malaysia, Singapore, Mexico, India, Indonesia, South Africa, New Zealand, USA...

A rapid need to perform electrical operations evolved with the time. This resulted in regional or national working on specific standards without coordination.

IEC standards were developed according to a consensus procedure and approved by recognised body. They provide an adequate answer at worldwide level.

The IEC standard presents benefits to all parties involved:

- for the end-users: it is the guarantee of a suitable and internationally recognized quality equipment,
- for the Testing Laboratories: it determines better standards of testing and control procedures for materials,
- for the manufacturers: it helps them to make a better technico-commercial offer.

Designs, tests and manufactures under the IEC requirements.

Is the first manufacturer to provide a full range of products complying with the IEC standards.

Shows its innovation ability for the welfare of the electrical world.

CATU™

Golden safety rules

Electrical accidents are responsible for severe body injuries, which cause troubles not only for the workers themselves, but for their families as well.

Furthermore they cause financial penalties to the utilities, due to the failure of supply and the cost associated with the injured workers.

How does the electrical risk appears?

- When an electrical line or conductor is unexpectedly still live
- When current sources are not properly isolated
- When power generators are connected to the network
- When there are atmospheric phenomena such as lightning
- Through induced currents

However, it has also been statistically observed that the most common causes of unexpected presence of voltage on electrical lines or installations were due to:

- A mistake in operating a switch
- A mistake in identifying the work to perform
- A "faulty" switch (one of the links for example remaining partially engaged)

How to avoid electrical accidents?

1. By observing Simple Electrical Safety Rules directed by common Sense (even if Working Practices vary from a country to another, GOLDEN RULES always apply).
2. By using Simple, Light and Reliable Electrical Safety Equipment.

First, select the right equipment

Personal protective equipment, safety padlock, voltage detector, short circuiting and earthing system, warning signs.

Golden safety rules

SEPARATE THE WORK AREA FROM ALL POSSIBLE SOURCES OF POWER-SUPPLY
by opening circuit-breakers, switches...

1

2

LOCK THE LINK IN THE OPEN POSITION
with a safety lock system (safety padlock)

CHECK THE ABSENCE OF VOLTAGE
at source and on site, on each conductor and
apparatus involved.

3

4

APPLY APPROPRIATE SHORT-CIRCUIT AND EARTHING SYSTEMS
in sufficient numbers on the conductors of your
network where operation is taking place.

SHOWN, WARN OTHERS AND LIMIT THE WORK AREA
even during the most simple temporary
maintenance operation

Home and Building

Since 30 years, CATU has developed a full range of products especially designed for home and building electricians: self adhesive warning signs, personal protective equipment, voltage detectors, installation testers, insulated tools.

Voltage detector

- 1** Bipolar voltage detector 6 to 690 V a.c. / d.c.

Reference: MS-911-EX Page: 25

Installation testers and accessories

- 2** Earth and continuity loop controller "CATOHM"
3 Small 2 parts pole for working at distance
4 Electrical installation tester 30 and 500 mA "CATEX Pocket"
5 Electrical installation tester 30, 300, 500, 650 mA "CATEX Pro"
6 Insulation Tester
7 Protection and switching devices on L.V. panel
8 Phase order indicator

Headlamp with adjustable focus

Can be carried either on the head or any type of helmet.
Lighting control and beam by switches.
Range: 30 meters.
Adjustable lamp height angle.
Sealed against rain.
Powered by 4 batteries LR 6.
Autonomy: 6 hours.
Standard bulb 4.8 V/0.3 A.

MS-118 Headlamp - Weight: 0.187 kg

M-95-865 Halogen bulb (sold by set of 5 units)
5.2 V 0.5 A

M-95-864 Hooks set for helmet

LED's Headlamp (3 LED's)

Can be carried either on the head or any kind of helmet.
- Lighting by 3 high performance LEDs.
- 3 lighting levels.
- Adjustable lamp height angle.
- Very light, waterproof IP65.
- Range: 10 to 15 meters.
- Powered by 3 batteries LR03 (AAA).
- Autonomy: 80 hours.

MS-121 Delivered with batteries and a carrying bag
Weight: 0.09 Kg

M-95-864 Hooks set for helmet

LED's headlamp (5 LED's)

LED's Headlamp (5 LED's).
Can be carried on the head or any kind of helmet.
Lighting by 5 high performance white new generation
LED's - 3 lighting levels + 1 flash mode + 1 red lighting.
IPX6.
Powered by four batteries LR06 (AA).
Range : 30 meters.
Autonomy : 100 hours.

MS-127 Delivered with batteries and a carrying bag
Weight: 226 g

M-95-864 Hooks set for helmet

Intrinsically safe ATEX LED's Headlamp

II 2GD EEx ia IIC T4
Can be carried either on the head or any kind of helmet.
- Lighting by 3 high performance White LEDs.
- 2 lighting levels (High: 3 LEDs on or low: 1 LED on).
- Adjustable lamp height angle.
- Very light, ABS body.
- ATEX certified Catégorie 2 (Zone 1)
N° TRL03ATEX21005X.
- Range: 10 to 15 meters.
- Powered by 3 batteries LR03 (AAA).
- Autonomy: 150 hours.
- Strap: cloth or silicone rubber (for helmet).

MS-126 Delivered with batteries - Weight: 0,125Kg

M-95-864 Hooks set for helmet

Head and eyes protection

Insulating rubber gloves

Insulating mats and boots

Insulating rubber gloves

Insulating rubber gloves conform to international IEC-60903 standard.

To satisfy the requirements of this standard, they are subjected to dielectrical, mechanical resistance and ageing tests. The acceptance levels for mechanical tests are stricter. The tests are especially aimed at checking the tensile strength and elongation at break, the mechanical puncture test and tension set. Our gloves are made of latex especially treated to obtain high dielectric characteristics; they are individually tested and delivered in sealed plastic bags.

IEC-60903 
CE

Reference	Class	Voltage (V)	Thickness (mm)	Designation	Weight (g)

High Quality, strong sticking on every surfaces:
concrete, painted wall, metal, wood, plastic, glass.

Voltage multi-tester DETEX™ 911-EX

The DETEX 911-EX has been designed in compliance with IEC/CENELEC standard 61243-3 in response to the requirements of European standard EN 50110-1.

The device is a voltage detector which checks the absence of voltage (AC and DC) and a multi-tester.

It enables to:

- check the voltage levels from 6 to 690 Volts;
- check the continuity of disconnected electric circuit;
- find phase or neutral (by single pole method);
- determine polarities.

A.C or D.C voltage test

voltage level testing by light-emitting diodes: 6, 12, 24, 50, 127, 230, 400, 690 V and emission of audible signal.

Polarity Test

Presence of A.C voltage signalling by lighting of +6 and -6 V diodes.

Presence of D.C voltage signalling by lighting of the +6V or -6V diode.

Phase/neutral identification

Signaling by lighting of the + 6V diode when the red probe is in contact with the phase.

Continuity test

Continuity resistance lower than 80 Ohms is indicated by lighting of all diodes and emission of audible signal.

Operating check

By short-circuit on the probes; all of the diodes light up, the audible signal sounds.

Technical features

Field of use: from 6 to 690 V ~ or =

Frequency: 50-60 Hz

Operating temperature: -10 °C / +55 °C

Storage temperature: -25 °C / +55 °C

Protection level: IP54 / IK 06

Double insulation Class II

Power supply by 9 volt 6LR61 type alkaline battery

Voltage multi-tester with phase rotation DETEX™ 911/2

The DETEX 911/2 has been designed in compliance with IEC/CENELEC standard 61243-3 in response to the requirements of European standard EN 50110-1.

The device is a voltage detector which checks the absence of voltage (AC and DC) and a multi-tester.

It enables to:

- check the voltage levels 12 to 400 Volts;
- check the continuity of disconnected electric circuit;
- find phase or neutral (by single pole method);
- Control the phase rotation;
- Determine polarities.

It is equipped with IP2X safety test probes.

A.C or D.C voltage test

voltage level testing by light-emitting diodes: 12, 24, 50, 127, 230, 400V and emission of audible signal.

Polarity Test

Presence of A.C voltage signaling by lighting of +12 and -12 V diodes.

Presence of D.C voltage signaling by lighting of the +12V or -12V diode.

Phase/neutral identification

Signaling by lighting of the + 12V and -12V diodes with audible signal when the red probe is in contact with the phase.

Phase rotation

Signaling by lighting of a green diode when the rotation is correct and by a red diode when the rotation is not correct. Control method with only two safety test probes.

Continuity test

Continuity resistance lower than 80 Ohms is indicated by lighting of all diodes and emission of audible signal.

Operating check

By short-circuit on the probes; all of the diodes light up, the audible signal sounds.

Power supply by 9 volt 6LR61 type alkaline battery

Phase order indicator DETEX™ 152+

Signaling via the successive lighting of diodes symbolising rotation.

Input terminals are connected to the corresponding phases

(green, yellow, brown):

correct connection: lighting according to "OK" order,

incorrect connection: "REVERSE" order lighting: reverse 2 phases.

"FAULT" diode lites: phase cut off or incorrectly connected.

90 to 400 V - 50/60 Hz / IP54 IK06 / CAT III.

Works on generating units.

Device delivered in storage bag with:

3 probes with retractable protectors and 1.20 m lead - yellow, green and brown - clamps - yellow and brown, 2 insulated crocodile clamps.

MS-152+

Delivered complete with storage bag
Weight: 0.380 kg - 60 x 100 x 25 mm

IEC-61557-7
EN 50110

Works on generating units

Contact probes for L.V. tester

To be used only with MS-911/2 tester.

For overhead lines

Contact antennas serve as suspension hooks.

Marked with standard colours: black and red.

Total length: 1.25 m.

MS-8014 2 probes, in bag 50 x 130 x 1.300 mm - 0.40 kg

MS-8014

To be used only with MS-911/2 tester.

For installations

Round tip contact. Total length: 0.50 m.

MS-8013 2 probes, in bag 50 x 150 x 470 mm - 0.750 kg

MS-8013

Voltage take-off punch

The voltage take-off punch is enable to make an insulating piercing on a low voltage wire to plug a measurement device.

Fit with pin or safety test probe with 4 mm diameter.

Reference	Capacity (Ø mm)	Weight (kg)
MS-62	5.6 - 14.4	0.015
MS-63	12 - 31	0.05

POINTEST™ Safety test probes for voltage detectors

Safety test probe for voltage detector use only.

4 mm retractable shrouded plug, 4 mm standard

socket or 1,20 m double sheathed lead,

Probe 26 mm length, 1000 V A.C or D.C, IP2X.

CX-35811 Green safety test probe 1.20 m lead

CX-45211 Brown safety test probe 1.20 m lead

CX-45511 Black safety test probe 1.20 m lead

CX-45411 Yellow safety test probe 1.20 m lead

IEC 61010-2-031

Safety crocodile clamps

Crocodile clamps.

Fully insulated crocodile clamps with large jaw opening: 20 mm.

CX-01222 5 brown crocodile clamps

CX-01422 5 yellow crocodile clamps

CX-01822 5 green crocodile clamps

DX-02006 2 crocodile clamps - black and red

IEC 61010-2-031

Insulation tester

CEI 61010-1
EN 61557-2
CE

The insulation resistance of an installation must be checked periodically and when it is commissioned. Furthermore, a measurement of the insulation resistance of the entire installation (or group of circuits) may be necessary when troubleshooting.

Operating principle

The measurement voltage shall be 500 V DC (for installations operating at 500 V or less) in order to detect any insulation defect between two cables that are normally isolated from each other. The choice of a high test voltage provides an easier means of demonstrating a latent insulation fault (conventional ohmmeters only output a few volts).

An installation is declared to be conform if the insulation resistance is $> 500 \text{ k}\Omega$.

The **DT-500** insulation tester provides an easy, fast and safe means of making this measurement.

The insulation tester DT-500 is designed to test in total safety the insulation resistance of a low voltage installation.

DT-500 is equipped with:

3 safety test probes **IP2X**

- 1 red safety test probe (phase)
- 1 Yellow/green safety test probe (earthing)
- 1 blue safety test probe (neutral) raccordable (Fig.3) on a safety plug
- 3 safety crocodile clamps (red, yellow/green and blue).

It enables to test the insulation resistance between each active wire and the earth (Fig.1). For fragiles receptors (electronics), we recommend to use the third blue test probe.

In this configuration, the neutral and the phase are linked together which avoids any damage on electronic components (Fig.2).

Insulation resistance test

When the DT-500 is connected to a low voltage switch off installation it output 500 V DC.

Signaling by a blue flashes diode. During the measurment the diodes light up in sequence.

The value is indicated on one of the diodes:

Red beetween: **0, 300, 400** k Ω .

Green beetween: **500, 600, 700, 800, 900, 1000** k Ω and ∞ .

Complete safety

The **DT-500** is equipped with a safety system. If it is connected on a live installation, a flashes red warning diode light and measurement is impossible.

Technical characteristics

our insulation tester is designed according to standard EN 61557-2.

It also respects international electrical safety standard IEC 61010-1.

- Output voltage 500 V DC.
- Nominal output current at 500 V: 1 mA.
- Measurement range $0 + \infty$.
- IP54, IK06.
- Batteries 4 x LR6.
- Size 213 x 75 x 46 mm.
- Storage temperature: $-25^{\circ}\text{C}/+70^{\circ}\text{C}$.
- Usage temperature: $-15^{\circ}\text{C}/+45^{\circ}\text{C}$.

IDENTEX™ protection and switching devices identifier on L.V. panel

CE

Identex MX-300 makes it possible to identify the origin of a source of voltage on the wire conductors connected to protection devices (cut-offs, magnothermal circuit breaker, interdifferentials) on panel. This operation is carried out without switching off the main power supply. The identification of a socket, ceiling light fitting or an electric motor connection is therefore easily carried out under voltage. Identex is composed of two active parts: a current extractor and a receiver.

Technical characteristics:

Voltage of use: 230 or 400 V 50 Hz +/- 10%

Use Temperature: 0°C/+40°C

Degree of protection: IP20, IK06

Class I reinforcement insulation (current extractor)

Complies with standards: EN-61010-1 & IEC-664

Possible detection of the signal with max network current of 80 A.

MX-300

Delivered complete with all its connection supply

Electrical installation testers CATEX™

"TT, TN" network

The CATEX testers enable you to perform the following checks:

Presence of voltage at the terminals of a socket,

integrity of the earth circuit, correct polarity:

the position of the phase and the neutral

is indicated, correct operation of the ELCB system at the following sensitivities, 30 mA, 100 mA, 300 mA, 500 mA, 650 mA.

The ELCB check function is only applicable to single phase circuits:

230 V between phase and neutral or between phases (DT-102).

Operating voltage: 230 V +/- 10%

Frequency: 50/60 Hz +/- 10%

Operating temperature: -15°C / +45°C

IP 40 IK03

Fuse protection: 2 delayed fuses 250 mA.

Earth and continuity loop controllers CATOHM™

"TT" network

The CATOHM earth and continuity loop controller enables:

- checking electrical resistance level of local earth socket, indicating by LCD display:
 - back lighting blue (1) if the value is above 100 Ω
 - back lighting red (3) if the value is - uper than 100 Ω
 - incorrect voltage (2)
 - earth not corrected (2)
- checking the presence and level of voltage at the connection terminals of a live 10/16 A socket,
- checking the integrity of the earth circuit (continuity < 2 Ω), correct polarity (position of the phase and the neutral is indicated),
- checking electrical continuity of metal masses.

Operating voltage: 230V - 10% / + 6%

Frequency: 50/60 Hz

Temperature of use: -15°C/+45°C

IP 40

Fuse protection: 2 fuses 5 x 20 mm, 160 mA, (delayed fuse).

Class II ☐ category III

Delivered with wound-up extension.

Weight: 0.340 kg.

Dimensions: 71 x 210 x 51 mm.

Digital multimeter- Cat III 600 V

This digital multimeter is compact 3 1/2 digit.
For measuring DC and AC voltage and current, resistance, continuity and temperature.

- AC frequency response: 40 - 400 HZ
- DC voltage: 200 mV/2 V/20 V/200 V/1000 V ($\pm 0.5\%$ +3)
- AC voltage: 200 mV/2 V/20 V/200 V/750 V ($\pm 0.8\%$ +5)
- DC current: 2 mA/20 mA/200 mA/20 A ($\pm 0.8\%$ +3)
- AC current: 2 mA/20 mA/200 mA/20 A ($\pm 1.0\%$ +5)
- Resistance: 200 Ω /2 k Ω /20 k Ω /200 k Ω /2 M Ω /20 M Ω /2000 M Ω ($\pm 0.8\%$ +3)
- Capacitance: 20 μ F/200 μ F/2 μ F/20 μ F/200 μ F ($\pm 2.5\%$ +20)

General specifications

- 3 1/2 digital multimeter, 30 ranges, 70 x 50 mm LCD display, 1999 counts max.
- Back light, data hold
- Diode, triode performance testing, continuity test (audible)

General characteristics

- Battery: 2 x 1.5 V AAA batteries
- Low battery indication level on LCD
- Operation temperature: 0°C / 40°C, < 75%RH
- Storage temperature: -20°C / 60°C, < 85%RH

MX-701 189 x 97 x 35 mm - Weight: 315 g

Digital clamp meter - Cat III 600 V

This digital clamp meter is compact 3 1/2 digit.
Autorange for measuring DC and AC voltage, AC current, resistance, diode, continuity and temperature.

AC current: 2 A - 600 A.

AC voltage: 2 V - 600 V. DC voltage: 0.2 V - 600 V.

Resistance: 200 Ω - 20 M Ω . Continuity: buzzer (< 50 Ω).

Temperature range: -40°C/+1000°C -40°F/-1832°F.

General specifications

- Display: 3 1/2 digit LCD with a max. reading of 1999
- Polarity: auto polarity indication
- Overrange indication: "OL" or "-OL"
- Automatic zeroing function
- Sensor: clamp-shape transformer for AC measurement
- Jaw opening capability: $\varnothing$ 36 mm
- Max. measurable conductor: $\varnothing$ 30 mm

General characteristics

- Battery: 2 x 1.5 V AAA batteries
- Low battery indication
- Operation temperature: 0°C / 40°C, < 75% RH
- Storage temperature: -20°C / 60°C, < 85% RH

MX-702 190 x 70 x 38 mm - Weight: 220 g

Short-circuiting system for consumer units

The link assemblies, included in this equipment, consist of extra flexible 16 mm² multistrand copper cable with an IEC 1230 silicone envelope, recommended for indoor equipment.

The elements contained in the case can be used for establishing the equipment suited to the unit to be processed.

The cartridge equipment is intended for HBC 22 x 58 mm fuse cartridge connection boxes and knife cartridges size 00.

The knife equipment is intended for connection boxes or knife switch networks.

The mini-clip equipment is designed for the short-circuiting of take-off boxes more particularly using intermediate parts (sockets with 10 mm Ø terminals and M8 hexagonal end).

The standard equipment for a three phase installation includes: the sets of cartridges, knives or mini-clips for adaptation to any type of unit, the interconnecting assemblies consisting of 4 extra flexible 16 mm² copper cables connected at the center by a connector, 1 installation and crimping kit.

Rating: 4 kA/1s

- Threaded adapter (see page N°37)

Mini jumper clamps fully insulated for switchboard use

These clamps are specially designed for use on energized parts in LV installations (switchboards, etc.) to make temporary connections when limited space is available. Models with jaws designed to axially grip conductors can be used on threaded bolts or shanks and nuts. The MC-142 model, whose size has been reduced to the strict minimum, is designed to be tightened with a nut wrench. All other models in this series tighten with T-handle screw. All clamps receive cable terminals with ISO 8 mm pitch threading as in the MC-153 series (described below). Current rating: 200 A.

Screwdrivers

Pliers

Cutters and pliers

Wrenches, spanners
and sockets

Tool sets

Complete range of insulated tools for live working up to 1000 Volts according to IEC 60900 standard. Each ISOMIL tool is controlled and tested to 10000 volts. This ensured by strict quality control procedures.

Phase tester insulated screwdriver

Phase detection from 127 V A.C.
Maximum voltage use: 1000 V.
Signaling by intermittent lighting though ultra high intensity diode.
Works with an unremovable lithium battery (life time guarantee 3 years).
Frequency: 50/60 Hz.

MO-182, MO-183, MO-184, MO-185-BL, MO-186.

M-87384

Black colour

Headlamp with adjustable focus

Can be carried either on the head or any type of helmet. 
Lighting control and beam by switches.
Range: 30 meters.
Adjustable lamp height angle.
Sealed against rain.
Powered by 4 batteries LR 6.
Autonomy: 6 hours.
Standard bulb 4.8 V/0.3 A.

MS-118

Headlamp - Weight: 0.187 kg

M-95-865

Halogen bulb (sold by set of 5 units)
5.2 V 0.5 A

M-95-864

Hooks set for helmet

LED's Headlamp (3 LED's)

Can be carried either on the head or any kind of helmet. 
- Lighting by 3 high performance LEDs.
- 3 lighting levels.
- Adjustable lamp height angle.
- Very light, waterproof IP65.
- Range: 10 to 15 meters.
- Powered by 3 batteries LR03 (AAA).
- Autonomy: 80 hours.

MS-121

Delivered with batteries and a carrying bag
Weight: 0.09 Kg

M-95-864

Hooks set for helmet

LED's headlamp (5 LED's)

LED's Headlamp (5 LED's). 
Can be carried on the head or any kind of helmet.
Lighting by 5 high performance white new generation LED's - 3 lighting levels + 1 flash mode + 1 red lighting.
IPX6.
Powered by four batteries LR06 (AA).
Range : 30 meters.
Autonomy : 100 hours.

MS-127

Delivered with batteries and a carrying bag
Weight: 226 g

M-95-864

Hooks set for helmet

Intrinsically safe ATEX LED's Headlamp

 II 2GD EEx ia IIC T4 
Can be carried either on the head or any kind of helmet.
- Lighting by 3 high performance White LEDs.
- 2 lighting levels (High: 3 LEDs on or low: 1 LED on).
- Adjustable lamp height angle.
- Very light, ABS body.
- ATEX certified Categorie 2 (Zone 1)
N° TRL03ATEX21005X.
- Range: 10 to 15 meters.
- Powered by 3 batteries LR03 (AAA).
- Autonomy: 150 hours.
- Strap: cloth or silicone rubber (for helmet).

MS-126

Delivered with batteries - Weight: 0,125Kg

M-95-864

Hooks set for helmet

Insulating rubber gloves

Insulating rubber gloves conform to international IEC-60903 standard.

To satisfy the requirements of this standard, they are subjected to dielectrical, mechanical resistance and ageing tests. The acceptance levels for mechanical tests are stricter. The tests are especially aimed at checking the tensile strength and elongation at break, the mechanical puncture test and tension set. Our gloves are made of latex especially treated to obtain high dielectric characteristics; they are individually tested and delivered in sealed plastic bags.

IEC-60903
CE

Reference	Class	Voltage (V)	Thickness (mm)	Designation	Weight (g)
CG-15 (*)	1	7500	1.5	latex	270

equipmentEquipment for
working on pole

In many countries regulations have been established to protect workers from electrical shock and flash hazards in specific areas within which arc flash protection is required. These equipment must be used with insulating gloves and leather overgloves. Equipment up to 100 cal/cm² on request.

Arc flash face shield kit (10cal/cm²)

Composition of the kit:

- 1 Face shield with chin cup 10cal/cm², absorbs > 99.9% of harmful UV radiation, 70% light transmission, tested to ASTM F2178 specifications
- 1 ABS helmet electrically insulated EN397, EN 50365, ANSI Z89.1, 20kV.
- 1 carrying bag for face shield and helmet

KIT-ARC-01

Weight: 2.1 kg

Arc flash protective overall kit (11cal/cm²)

Composition of the kit:

- 1 Face shield with chin cup 11cal/cm², absorbs > 99.9% of harmful UV radiation, tested to ASTM F2178 specifications
- 1 ABS helmet electrically insulated EN397, EN 50365, ANSI Z89.1, 20kV.
- 1 safety glasses EN 166/EN 170
- 1 arc flash protective Hood (15 cal/cm²)
- 1 protective overall 11cal/cm² (size L*), ASTM F1506 and NFPA 70E Standards
- 1 carrying bag for face shield and helmet
- 1 all kit carrying bag

KIT-ARC-03

Weight: 4.03 kg

* Size US: L
Other size on request.

Arc flash jacket kit (11cal/cm²)

Composition of the kit:

- 1 Face shield with chin cup 10cal/cm², absorbs > 99.9% of harmful UV radiation, tested to ASTM F2178 specifications
- 1 ABS helmet electrically insulated EN397, EN 50365, ANSI Z89.1, 20kV.
- 1 safety glasses EN 166/EN 170
- 1 arc flash protective jacket 11cal/cm² (size L*), ASTM F1506 and NFPA 70E Standards
- 1 carrying bag for face shield and helmet
- 1 all kit carrying bag

KIT-ARC-02

Weight: 4.15 kg

Arc flash protective hood kit (40cal/cm²)

Composition of the kit:

- 1 arc flash protective hood with an integrated face shield 40cal/cm², ASTM F2178 and NFPA 70E Standards
- 1 arc flash protective coat 40cal/cm², (size L*), ASTM F1506 and NFPA 70E Standards
- 1 arc flash protective bib overall 40cal/cm², (size L*), ASTM F1506 and NFPA 70E Standards
- 1 ABS helmet electrically insulated EN397, EN 50365, ANSI Z89.1, 20kV.
- 1 safety glasses EN 166/EN 170
- 1 carrying bag for face shield and helmet
- 1 all kit carrying bag

Insulating ladders

A complete range with top quality features: Insulation between two steps: 30000 V (test performed after immersion in water for 24 hours). High mechanical resistance to bending and twisting. Good resistance/weight ratio. High fire resistance. High resistance against bad weather and corrosive elements. Lateral risers in polyester/glass fiber rectangular section 70 x 25 mm. Aluminium alloy rungs with square 29 x 29 mm section and anti-slip coating.

EN 131

Forged steel climbers for round wooden poles

Hard forged steel - Leather belts with cast buckles. Delivered by pair.

MO-24	Ø 20 cm - 2.6 kg - Pair of climbers
MO-25	Ø 25 cm - 2.8 kg - Pair of climbers
MO-26	Ø 30 cm - 3.0 kg - Pair of climbers
MO-35	Ø 35 cm - 3.2 kg - Pair of climbers

Mechanical climbers for round and hexagonal concrete poles

Manual locking
Adaptable to the pole diameter
For poles Ø 140 to 300 mm.

MO-16-A	Pair of climbers - Weight: 6.5 Kg
----------------	-----------------------------------

Mechanical climbers for rectangular shaped concrete poles

Automatic locking of jaws by elastic cord.
Sole in aluminium alloy, high resistance, with leather belts and steel buckle.
Wear plate placed on sole arm.
Mobile drum on axis can be removed; processed steel rollers.
High resistance aluminium alloy rack, used for clamping onto poles 14 to 42 cm wide.

Spare parts:

MO-17-01: pair of elastic cords
MO-17-02: pair of wear plates
MO-17-03: blade roller
MO-17-04: pair of runners

MO-17-A	Pair of climbers - Weight: 9 kg
----------------	---------------------------------

Climbers for H profile metallic poles

Hard forged steel.
Delivered by pair.

MO-23	Pair of climbers - Weight: 5.10 kg
--------------	------------------------------------

CD-124

CD-122

Halogen lamp - Automatic switch on in case of power break
Adjustable flood beam - power beam: 5.5 W
Operates: 3 hours - Weight: 1.2 kg

CD-124

Delivered with a wall mounted support
Bulb: 6 W/12 W
Operates: 1 hour (12 W), 2 hours (6 W)
Rechargeable on 230 V 50/60 Hz
3 positions switch: Off, 6 W, 12 W
100 x 190 x 220 mm - Weight: 1.9 kg

Intrinsically safe ATEX torch light

Ex II 2GD EEx ibe IIC T4 or T6.
Zone 1 and 2 - 21 and 22.
- Simple optical system.
- Power supply by 1.5 V LR20 batteries (x3).
- Bulb P13, 559 - 3.7 V - 0.3 A.
- IP 66.

CD-103

Torchlight Ø 50 x 244 mm - Weight: 0.250 kg

MS-115-1

Bulb for CD-103 (ordering by 5)

Double optical systems.

Ex II 2GD EEx ibe IIC T6 or T4 or T3.
Zone 1 and 2 - 21 and 22.
Protection mode (suitable for all areas and gases).
Appropriate certificates for Merchant Marine and VERITAS.
Power supply by 1.5 V LR20 batteries (x2).
Fixed light or intermittent optical signals.
IP 66/68.

CD-104

Dimensions: 230 x 90 x 90 mm - Weight: 400 g

Intrinsically safe ATEX LED's Headlamp

Ex II 2GD EEx ia IIC T4.

CE

Can be carried either on the head or any kind of helmet.
- Lighting by 3 high performance White LEDs.
- 2 lighting levels (High: 3 LEDs on or low: 1 LED on).
- Adjustable lamp height angle.
- Very light, ABS body.
- ATEX certified Categorie 2 (Zone 1)
N° TRLO3ATEX21005X.
- Range: 10 to 15 meters.
- Powered by 3 batteries LR03 (AAA).
- Autonomy: 150 hours.
- Strap: cloth or silicone rubber (for helmet).

Delivered with batteries - Weight: 0,125Kg

M-95-864

Hooks set for helmet

Medium voltage

IEC short-circuiting and earthing systems for MV substations

These equipment are intended for connection: to permanent fixed points or to bare conductors. They consist of 3 contact clamps.

IEC-61230 

1 short-circuit earthing connection set consisting of 3 extra-flexible copper cables with silicone sheath, L = 1.5 m each. 1 trifurcation connector earthed by an extra-flexible copper cable with silicone sheath, L = 2.5 m. 1 earthing clamp. 1 plastic case (M-78665).

Installation on permanent fixed points

Plastic case

Earthing and short-circuiting systems for 250 A separable connectors

Rating = 12.5 kA/1s

Equipment consisting of:

3 terminals, each fitted with a "handarff device" for locking.

1 terminal connecting kit, with double-crimped connectors

• 3 copper cables, 70 mm² section, length ~ 0.70 m

• 1 copper cable, section 35 mm², length ~ 2 m

• 1 earthing clamp MT-840/1

3 padlocks AL-230-S.

MT-8612

Delivered in metal box

620 x 195 x 150 mm - Weight: 7.6 kg

Earthing and short-circuiting systems for 400 A separable connectors

Rating = 12.5 kA/1s

Equipment consisting of:

3 terminals, each fitted with a bolted stirrup for locking.

1 terminal connecting kit, with double-crimped connectors

• 3 copper cables, 70 mm² section, length ~ 0.40 m

• 1 copper cable, section 35 mm², length ~ 2 m

• 1 earthing clamp MT-840/1

3 padlocks AL-230-S.

MT-8614

Delivered in metal box 480 x 340 x 195 mm

Weight: 13.5 kg

Voltage tester for M.V. separable connectors

CC-151-K

For details see page 76.

Voltage tester for M.V. separable connectors

Check the absence of voltage on the capacitive terminals of plug-in M.V. bushings.
Sensor in the form of a bent finger enabling removal and reinstallation of the terminal insulating cover.
Signal via beeping and bright red flashing of electro-luminescent diodes.
Built-in function test via the "TEST" button which covers the entire device.
Permanent stand-by state.
Power supply: four 1.5 V, R-6 batteries.
Mounting on insulating stick via a universal end.

CC-151-K

Tester in rigid case with batteries
70 x 100 x 165 mm - 0.70 kg

CC-45-K

Special 45 kV insulating stick
L = 1.25 m - 0.6 kg

Permanent luminous indicator

Permanently installed on bus bars, luminous indicator signals the presence of voltage at a glance.
Single-pole 5 to 75 kV indicators.
Signaling the presence of voltage by 7 electroluminescent diodes.
For indoor use.

CL-40010

For round 5 to 20 mm Ø wires and 1 to 20 mm flat bars

*Electronic type detectors can also be used.
Please refer pages 79/80/82.*

Voltage detector

For indoor use
Built-in device for checking operation of the led's indicator via a piezo-electric generator.
High-brightness led's indicator.
Sturdy thermo-plastic moulded case providing.
Pivoting contact electrode enabling wire contact at any angle.
Telescopic insulating stick.

Operating voltage (kV)	Length (m)		Weight (kg)
	extended	folded	
5-40	1.26	0.85	0.95

CL-4-41/2

Delivered in a waterproof fabric case with strap - Weight: 0.95 kg

Voltage detector "compact serie"

For indoor use
This compact serie voltage detector is designed to be carried easily by operators.
Voltage presence is indicated by a high-brightness LED's indicator.
Built-in device for checking of the LED's indicator by a piezotest generator.
Equipped with a telescopic handle.

Delivered in holster.

Integrated voltage indicating system (V.P.I.S)

IEC 61958

Indicates the voltage presence on M.V. cubicles by being installed on the capacitive dividers. Voltage of use behind capacitive dividers: $V < 1000$ V. Light threshold: 90 V. Signalling: 3 neons. Attachment: male/female plugs.

CL-495-3

Packaging: vinyl cover
Dimensions: 130 x 30 mm

Integrated voltage detecting system (V.D.S)

IEC 61243-5

Indicates the voltage presence on M.V. cubicles by being installed on the capacitive dividers. Voltage of use behind capacitive dividers: 1000 V (between phase and earth). Light threshold: 70/90 V. Input impedance: 36 M Ω . Signalling by 3 red diodes.

CL-497-00

Packaging: vinyl cover
Dimensions: 146 x 30 mm

Interface for integrated voltage detecting system (V.D.S)

IEC 61243-5

Indicates the voltage presence on M.V. cubicles by being installed on the capacitive dividers. For High impedance detecting systems Input impedance: 36/43 M Ω . Voltage indication by 4 mm standard sockets on the front of the indicator.

CL-498-00

Packaging: vinyl cover
Dimensions: 146 x 30 mm

Sound phase comparator

IEC 61243-5

The MX-404 sound phase comparator checks the concordance between 2 phases. The comparator's operation is indicated by: Emission of an audible signal when there is discrepancy between the two phases. Absence of an audible signal when there is no discrepancy between the two phases. Power supply: 9V type 6LR battery.

MX-404

Delivered in a storage box
Dimensions: 145 x 80 mm

Separable voltage detecting system (V.D.S)

EC-61243-5

CL-499/101

This device enables to check the absence or presence of voltage on three phases (L1, L2, L3). HR high impedance. Voltage max: 1080 V rms. 50/60 Hz. Voltage presence: red flashing LED > 1 Hz. Fits in CL-498 devices.

CL-499/101

Delivered in plastic bag

Life saving kits for M.V. substations

Wall mounted KIT

In case of an electrical accident, quick response is essential: seconds gained or lost can decide the life or death of a victim.

Our life saving equipment is designed to make all necessary materials immediately available to rescue personnel.

It includes:

- 1 rescue telescopic stick
- 1 voltage detector with flexible antenna contact (with autotest)
- 1 cable cutter with insulated handles
- Forged steel blades maximum opening: 30 mm
- 1 insulating platform, 24 kV high voltage
- Insulating gloves, insulating boots
- Safety instructions on the plastic board
- 1 talcum powder can.

Compact carrying KIT

This compact kit is designed especially to be carried in a vehicle for safety electrical intervention. Made in two part (of moulded material: PEHD), the case is also on its red part, an insulating platform.

Composition of the kit:

- 1 insulating platform
- 1 telescopic insulating stick
- 1 voltage detector with autotest
- 1 rescue hook
- 1 insulated cable cutter
- 1 pair of insulating gloves
- 1 pair of insulating boots
- 1 talcum powder can
- 1 safety instructions and safety first aid posters
- 1 adhesive tape (black and yellow).

CZ-54-R	Wall mounted panel 0.84 x 0.745 x 0.27 m 21 kg - With instructions in English - 24kV
CZ-54-MR	Same as CZ-54-R With instructions in English/Arabic - 24kV
CZ-55-R	Same as CZ-54-R except use tension: 36 kV
CZ-55-MR	Same as CZ-55-R With instructions in English/Arabic - 36kV

CZ-53-R	710 x 570 x 240 mm - Weight: 18.5 kg with instructions in English - 25kV
CZ-53-MR	Same as CZ-53-R with instructions in English/Arabic - 25kV
CZ-53-R/2	Same as CZ-53-R except use tension: 36 kV
CZ-53-MR/2	Same as CZ-53-R/2 With instructions in English/Arabic - 36kV

Rescue stick

Insulating stick ended by a large hook in order to rescue quickly an electrified victim in case of accident.

CS-45	Length: 1.65 m - Rated insulation: 45 kV Delivered with wall mounted supports.
--------------	---

IEC electronic Voltage Detectors, "Compact serie" for indoor and outdoor use

Ultimate technology of voltage detector "Head Capacitive Technology"

IEC-61243-1
CE

Compact and light

It offers:

- a wide band (10/36 kV)
- a universal application (50/60 Hz)

Voltage presence is indicated by:

- red flashing LED (very bright -visible at more than 20 m in direct lighting)
- powerful rated audible signal > 60 dB(A)/2 m

Operating check:

By pressing the TEST button, correct operation is indicated as follows :

- a red LED flashes on
- sound signal

(during and after this test, the timed green LED lights up. While remaining on, it indicates the good working order of the detector)

Characteristics:

- Detectors have unitary adjustment and are checked by routine test
- Dielectrically tested on substation bars (bridging test)
- Precise and stable operating threshold
- Reduced sensitivity to induced voltages
- Reduced sensitivity to interference field
- High environmental resistance (impacts, vibrations, moisture)

Use from 50 to 60 Hz

Temperature conditions: class N (IEC-61243-1 standard)

Storage and operation: -25/ +55 °C

Robust housing

Power supply: 1 x 9V alkaline battery type 6LR61

Contact electrodes fitted to the housing by screwing and are easily interchangeable

End fittings:

C = hexagonal 12 mm, for hexagonal end-fitting sticks

K = universal, for universal end-fitting sticks

Weight of the detector: 420 g

Size of the detector: Ø 59 x 270 mm

Packaging: unit supplied complete in a case with batteries and contact electrodes

Total weight: 1100 g

Total size: 340 x 275 x 83 mm

Recommended stick:

CE-4-21. See page 81.

Standard electronic voltage detector for indoor and outdoor use

With a precise and absolutely stable operating threshold, the DETEX ELECTRONIC DETECTORS offer users maximum safety on MV lines and installations.

Double signalling

Voltage presence is indicated by both:

- extremely bright red flashing LED's (visible at more than 50 meters even in unfavourable light),
- powerful rated audible signal > 60 dB/2 m.

Checking

By pressing the test button, the operator checks that the detector is working properly. When the test button is released, a timed green LED lights, indicating both the detector is operational and the self testing of the unit continues.

Continuous monitoring conditions

High reliability

Tropicalized: -25 / +55 °C.

- housing made from polycarbonate with high mechanical properties and dielectric strength.

Removable electrode

Power supply

- four 1.5 V batteries type LR 6.

End fittings:

- "C" for hexagonal sticks.
- "K" for universal sticks.

Weight

500 g with batteries.

Packaging

Units supplied complete in a case with batteries and two contact electrodes (straight and V-shaped) - 390 x 90 x 90 mm
Weight: 0.800 kg.

Recommended sticks:

CE-4-21. See page 81.

IEC voltage detectors

Standard voltage detector

Insulating sticks for voltage detectors

Phase comparators

Unlike single-pole voltage detectors, two-pole testers may detect differences in voltage between any two points of an installation. Essentially used for phase balance operations, they may also be used for two-pole detection operations and H.V. fuse checking.

Two-pole Phase comparators for indoor use

The DETEX **CL-8-36** detect differences in voltage between any two points of an installation indicated by LED's. It also enables assessment of the order of magnitude of the residual voltage induced by nearby live lines or circuits, and thus differentiates it from the one provided directly from a high voltage source.

Wide range of voltages: 2 to 36 kV.

High luminosity.

Compact: 0.62 m with probes dismantled.

High dielectric quality insulating material.

Two 1.25 m elements with removable probes, connected via a high-insulation lead.

Max. use distance: 2.25 m (with probe extenders).

Operation testing: with a checking device.

CL-8-36

CL-8-36 tester in plastic case
150 x 195 x 650 mm - Weight: 7.5 kg

CL-8-36/1

CL-8-36 tester with two probe extenders
0.550 m - cable, length: 2.87 m delivered

IEC-61230

In the context of the IEC-61230 international standard, CATU offers and answers to your needs with a large range of short-circuiting and earthing systems for substations and lines. These equipments are fitted with silicone-sheathed cables and double-crimped lugs at both ends: crimped once to the cable itself and once to the cable envelope.

This type of connection has been mechanically tested by simultaneous traction and twisting, followed by a proofing test in a soda bath. Before the short-circuiting tests, all components of this equipment are subjected to a cycle in a saline mist, to provide artificial ageing.

IEC short-circuiting and earthing systems (three-phase crossarm networks)

MT-613 clamps are automatic contact clamps. They are put into position from above the conductor, using the clamp dispenser head **MT-635/1-C**, which gives remarkable rapidity and ease of handling. Removal is carried out by pulling down the clamp, which revolves around the conductor by means of the pig tail fixed in the centre of the clamps dispenser head.

Short-circuiting and earthing systems (mid-span horizontal configurations, work from ground)

Icc	Connecting cables	For conductors
8 kA/1s	35 mm ²	3-22 mm Ø

Installed from the ground on conductors up to 10.50 m.
Self locking contact clamp: powerful conductor clamping and very good performance at short-circuiting, does not slide.

PELICAN 2

- Easier installation features.
- More rigid metallic stick.
- Lower tube 30.6 mm dia.
- Upper tube 16 mm dia.
- Re-inforced insulated stick (36 mm dia.).
- Antisliding gripping area on the insulated stick: improves operator's grip.

Self locking clamp

Absence of spring increases reliability, facilitates cleaning and removal.

Used to check voltage absence beforehand

With a CC-375 IEC or CC-875 IEC series detector. Attached with a flag use contact electrode to one of the metallic stick.

Insulating sticks for short-circuiting and earthing systems

IEC-60855 

These 39 mm dia. elements are assembled using a new safety bayonet system connector in aluminium alloy. They allow construction of a large variety of custom made sticks that meet the most varied conditions of application. Calibrated lengths of 1 to 3 meters (with fraction of 0.50 m) permit a huge number of applications.

This range thus allows a stick-length limitation in case of space requirements and carrying capabilities.

For common applications a serie of complete sets including 2 or 3 elements are made to give simple solutions for working distance from 2 to 6 meters.

Reserved for copper conductors.

Pivoting - 110 x 110 x 70 mm - Weight: 0.250 kg.

MG-354

MG-352

MG-352-K

Moulded orange colour body with card.
Reserved for aluminium conductors.

MG-352-VK

Moulded green colour body with card.
Reserved for copper conductors.

MG-353-R

Orange spare brush for **MG-353-V**.
For hand brushing use.

MG-353-V

Green spare brush for **MG-353-V**.
For hand brushing use.

MG-354-K

Round brush - Ø 58 x 100 mm
Weight: 0.250 kg

MG-355

Spare brush for **MG-354-K**.

Diameter gauge

For conductors 3 to 16 mm Ø.
Entirely insulated material 270 x 35 x 12 mm.
Delivered in bag.

MD-535-K

Weight: 0.090 kg

Pig tail hook

Bronze end piece.
Spiral rod of corrosion-proof steel.

MG-207-K

K end-pieces steel - 120 x 65 x 60 mm
Weight: 0.210 kg

MG-207-S

S end-pieces steel - 250 x 65 x 60 mm
Weight: 0.280 kg

Cleaning brushes

MD-12-C

MD-10-C

MD-14-C

MD-10-C

Concave brush with two rows of
perpendicular bristles
100 x 125 x 170 mm - 0.500 kg

MD-12-C

Round head brush Ø 175 x 228 mm
0.500 kg

MD-14-C

Adjustable hinged round head brush
Ø 175 x 328 mm - 0.500 kg

Trimmer and pruning saw

MD-40-B

MD-42-B

MD-40-*

Trimmer, maximum capacity Ø 45 mm
(for branches up to 28 mm depending on
tree species) - 375 x 240 x 60 mm - 1.200 kg

MD-42-B

Pruning saw on rigid frame, 34 cm blade
125 x 610 x 60 mm - 1.100 kg

M-92-28

Replacement blade

* Add end-piece B or K.

Fuse puller

All parts in metal protected against
corrosion. Jaws sheathed with plastic.
Capacity : up to Ø 70 mm.

CM-04-K

Overall dimensions: 230 mm x 80 mm

Automatic come-along clamp

For non-insulated conductors: alloy, ACSR, alu, steel.

Characteristics

Steel body - mild bronze jaws.

Field on use

Overhead network.

Working method

Distance method.

Function use

The AUTOMATIC COME-ALONG CLAMPS are used to produce an anchoring on a line conductor in view of:

- moving it lengthwise
- locking it in position
- alternating its mechanical tension.

*Equipment delivered with 20 m cable equipped with hook.

**The first number indicates the maximum authorized lifting load.

“TIRVIT” mechanical adjusters

The conductor to be adjusted is directly clamped between two cam jaws which alternately approach and move away from each other by lever manoeuvring. Very simple, sturdy and reliable, the Tirvit is the ideal apparatus for tightening up small and medium section lines. It is equipped with a chain and handle for fixed anchoring.

Guying equipment

Used whenever pole stability is doubtful. Hinged jaw device installed, from the ground, at a 6 to 8 m height using connectable rods. Guy wires fixed on jaws and staked to the ground by rods ensure pole stability. Forged hot galvanised steel jaws, test load: 1000 daN. Control rod 6 m in elements of 1.20 m, aluminium alloy. Set of ropes: 3 guy wires 11 or 15 m + a strap with centre ring - with heart shaped thimble and snaps. 3 steel anchoring rods, 1 m.

MP-315	Guying equipment with 15 m guy wires in metallic box 480 x 340 x 200 mm and control rod + rods with carrying belt - 26.5 kg
MP-311	Guying equipment with 11 m guy wires in metallic box 480 x 340 x 200 mm and control rod + rods - 22 kg

The rod is, in most cases, the most practical, effective and reliable earth connection means.

Highly effective: for a given contact surface area, the linear type electrode provides, both theoretically and practically, the least earth resistance. Furthermore, it enables the most moist and conductive layers to be reached.

Easy and quick to install, it requires no earth work. Even inside industrial buildings, it is often possible to install an earth rod exactly where required by breaking through a small area of the floor.

Accessible and testable connection: the use of an inspection box makes it possible to leave the head of the rod and its connection unburied and to periodically test it and measure its resistance.

Self connectable rods

The lower end of each rod is equipped with a point used both for driving into the earth and for connection; the upper pierced end receives (without the sleeve) the point of the previous rod. Use a rivetting head so as not to damage the upper end when driving in.

Connectable rods

Conical slide-in provides perfect assembly stability. For deep earth connections.

MX-430-M earth tester

The **MX-430-M** allows for the measurement of earth resistance and earth specific resistivity and also the spurious voltages caused by grounding parasitic voltage presence.

This equipment is suitable for fast and easy measurement of the grounding resistance in home, industrial buildings, substations,...

- Wide range of measurement from 0.01 Ω to 20 KΩ
- High visibility 3 1/2 digit display with direct readings, even under sunlight
- Supplied with a rechargeable internal battery. A smart charger is microprocessor-controlled and can be powered from the mains by a power plug provided source or from a 12 V car battery.

Technical features

- **Application:** measurement of grounding resistances (with 3 earth rods), earth resistivity (with 4 earth rods) and spurious voltage presence
- **Range of measurement:** 0 - 20 Ω; 0-200 Ω; 0-2000 Ω and 20 KΩ
- **Voltmeter:** voltmeter function in AC range as a conventional voltmeter 0-200 V AC
- **Operation frequency:** 1470 Hz
- **Current in and out put power:** less than 0,5 W and the out put current is limited to less than 15 mA (peak to peak)
- **Operation temperature:** -10°C / +50°C
- **Storage temperature:** -25°C / +65°C
- **Humidity:** 95% RH (without condemnation)
- **Accessories included:**
 - Connection wire to supply the charger with a 12 V battery
 - Battery charger 220-240 V
 - Storage bag

MX-430-M 221 x 189 x 99 mm - Weight: 2 kg

Accessories (measurement kit) MX-433-T

- 1 storage bag
- 4 earth rods copper plated steel
- 1 x 5 meters black cable
- 1 x 40 meters red cable
- 2 x 20 meters cable (1 blue and 1 green)
- 1 x 5 meters green cable to connect to the grounding system
- 1 hammer

MX-433-T 570 x 220 x 160 mm - Weight: 7.7 kg

LIVE WORKING TOOLS

Since the second world war, CATU has worked in close co-operation with EDF to research and develop safety equipment and practices for use on low and high voltage networks, initially in France and now worldwide.

Utilities would be better off efficiency of their networks by avoiding outages, whatever the costs. With the increasing recognition of EDF-Serect worldwide, CATU is fast becoming a major supplier in liveline working equipment. All the tools meet the specifications of the International Electrotechnical Committee (IEC).

CATU tools have a liveline life of around 20 years.

Catalogue available upon request.

Insulating rubber gloves

Insulating rubber gloves conform to international IEC-60903 standard.

To satisfy the requirements of this standard, they are subjected to dielectrical, mechanical resistance and ageing tests. The acceptance levels for mechanical tests are stricter. The tests are especially aimed at checking the tensile strength and elongation at break, the mechanical puncture test and tension set. Our gloves are made of latex especially treated to obtain high dielectric characteristics; they are individually tested and delivered in sealed plastic bags.

IEC-60903 
CE

Reference	Class	Voltage (V)	Thickness (mm)	Designation	Weight (g)

Pro electric full body fall arrest harness

4 fall arrest attachment point : one dorsal point, two sternal points by two metallic D rings, a sternal point by strap. A ventral attachment point for a descender and / or lanyard. Automatic buckles of leg loops. Padded leg loops. A work positioning belt, with a comfortable and lightweight pad. 2 buckles of work positioning Belt. Leg loops and shoulder straps adjustable. Polyamide straps. Tools holders. 3 sizes : S, M, XL. Delivered in a protective bag with a users manual. Weight: 2.9 kg.

63 to 550 kV electronic voltage detectors for indoor and outdoor use

Designed to give users maximum safety, the DETEX detectors of the CC-245 Series are the result of the most modern developments in electronic research. They offer a number of important properties and advantages.

Double signalling

Voltage presence indicated at the same time by:

- 4 extremely bright red flashing electro-luminescent diodes (visible at more than 50 meters even in direct lighting),
- a powerful rated acoustic signal (60 dB/2 m).

Checking

Satisfactory operation of the unit is indicated:

- When pressing the test button, by:

- the red diodes flashing,
- the acoustic signal sounding.

- When releasing the TEST button, by:

- timed green up diodes lighting.

As long as they light, the unit continues its self-testing and the detector is fully operational.

High specifications

- Detectors are adjusted, tested and controlled one by one.
- Remarkably resistant to impacts, vibrations, extreme temperatures, humidity and sudden changes in the atmosphere (condensation, freezing).

- Precise and stable operating threshold. Insensitivity to induced voltages by limiting the operating voltage range.

IEC-61243-1

- Robust housing made from polycarbonate with high mechanical properties and dielectric strength.
- The contact electrodes are simply screwed to the housing and are therefore easily interchangeable.

Power supply

- One 9 V battery type 6 LR 61.

End fittings:

- "C" for hexagonal sticks.
- "K" for universal sticks.

Weight

650 g (with battery).

Packaging

Units supplied complete with battery and electrode in a rigid synthetic case with handle.

- **Recommended sticks:** CM-4000 serie. See page 114.

Insulating sticks for voltage detectors and earthing systems

IEC-60855

These 39 mm dia. elements are assembled using a new safety bayonet system connector in aluminium alloy. They allow construction of a large variety of custom made sticks that meet the most varied conditions of application. Calibrated lengths of 1 to 3 meters (with fraction of 0.50 m) permit a huge number of applications.

This range thus allows a stick-length limitation in case of space requirements and carrying capabilities.

For common applications a serie of complete sets including 2 or 3 elements are made to give simple solutions for working distance from 2 to 6 meters.

Insulating sticks for short circuiting and earthing systems

- 46 mm dia. single type elements, yellow colour, with superior characteristics, they are connected between them without any prior order of assembly.
- These elements allow "long length" assemblies which can support short-circuit systems with large cross-section cables.
- Shockproof guard and pole end cap.

MT-895

230 x 230 x 150 mm - Weight: 0.9 kg

Rope operated clamp

Description

V-shaped aluminium body.
Spring operated swinging jaw with pre-set.

Operation

Attachment and removal is carried out from the ground or from the cross-arm, using a rope passed previously over the conductor to be earthed.

- Attachment: the clamp is pulled up by the rope. Pulling on the rope triggers the spring and closes the jaw.

- Removal: pulling on the rope attached to the hinged saddles causes the clamp to pivot and free the jaw.

For conductors reached from the ground:

- up to 10 m: by using **MT-709-B** reel launcher placed on a **CM-6** SERIE Stick (see page 96) that passes the rope over the conductor;
- up to 20 m: by using a **MF-60** wire projector. This projector fires an arrow carrying a braided nylon wire which sets the rope. The clamp is then fixed to the rope and attached onto the conductor.

- Earthing cable with ranger (mm²): 2 x 120.
- Cable connection crimped log hole: M 12.

MT-701/1	12-48	30	72	195 x 120 x 175	2.00

Cable-launcher projector

Used to fire the insulating rope for setting the **MT-701/1** clamp, this wire-projector may also be used for checking the absence of voltage from the ground by throwing a very light fuse wire over the conductor (in case of voltage, arcing will occur to warn the operator).

- MF-60** Wire-projector
- MF-61** Spare arrow
- MF-62** Spool of 30 m of fuse wire
- MF-63** Spool of 100 m of fuse wire
- MF-66** Spool of 30 m of nylon lead

Reel launcher and insulated rope reel

This device contains a shaft on which the rope reel is engaged, and a spring system which triggers ejection of the reel when it comes in contact with the conductor. To be fixed on a MAJOR SERIE Stick, depending on the height of the conductor to be reached.

MT-709-B

MT-708-40

- MT-709-B** Aluminium alloy launcher - Weight: 0.310 kg
- MT-708/40** Special quality nylon on shock proof reels; equipped with 2 snaps. Rope Ø 6 mm - Length: 40 mm

Short-circuiting and earthing systems carrying bags

Strong water proof canvas. Reinforced bottom.

- M-87-53** 380 x 250 - Height: 400 mm - Weight: 2 kg
- M-87-153** 380 x 250 - Height: 600 mm - Weight: 2.5 kg
- M-87-295** 550 x 300 x 300 mm - Weight: 2 kg

M-87-295

M-87-53

Specification for short-circuiting and earthing systems

A Network, electrical installation characteristics

Network voltage: _____ kV

Max. short-circuiting current (1s): _____ kA

Nature of the conductive materials: Basis Al ☐ Basis Cu ☐

Overhead lines ☐

- Dia. or section of the conductors: min. _____ max. _____

Switchboard or substation ☐

- Round bars dia. (mm): mini. _____ maxi. _____
Length = _____
- Flat bars
 - H type ☐ Thickness = _____
 - V type ☐ Length = _____
Thickness = _____
- Fitting on edge face ☐ Fitting on side face ☐

B Characteristics of the earthing system

- Selected sketch (out of the three standard types shown below)
- Distance between live conductors (m): _____, between live conductors and grounding point (m) _____
- To place the clamps in position, the operator will stand: above the conductors ☐ under the conductors ☐
at the conductors level ☐
- For cable sections, please indicate max. ΔT or min. dia. of the conductor _____

C Earthing connection point

- Earth rods: dia. or thickness on side face (mm): _____ Flat bar, angle-bar, thickness (mm): _____
- Round conductor dia. (mm): _____

D Operating stick

- Insulating stick: total length _____ Fixed ☐ Connectable stick ☐ Telescopic ☐

Characteristics

- Selected connection type: Sketch n° _____
- Contact clamps (type MT- _____)
- Short-circuiting cable
 - Length (m) _____
 - Dia. or section (mm, mm²) _____
- Grounding cable
 - Length (m) _____
 - Dia. or section (mm, mm²) _____
- Connection of cables on clamps, earth clamps, trifurcation
 - Direct connection by screw and nut ☐
 - Connection by means of crimped lugs ☐
- Earth clamp, type _____
- Presence of a reel _____
- Insulating stick, type _____

Sketch N°1

Sketch N°2

Sketch N°3

Accessories

- Carrying bag for sticks ☐
- Canvas bag for equipment ☐
- Carrying case for equipment ☐
- Cable reel ☐
