This is more than a plug and socket

The DECONTACTOR™ is a plug and socket with an integral load-break isolating switch. Combining these functions into the same unit makes the decontactor a safe, reliable and compact disconnection device for motors and power supplies, saving you time and cost.

Innovation for safety and flexibility

For over fifty years, the Marechal decontactor has been known for safety and flexibility. With 7% revenue spent on R&D, we continue to innovate and offer the products to meet the varying needs of our customers.

BECMA is an international association of manufacturers of butt-contact connectors. It is the only organisation that is able to guarantee that when a plug made by one member manufacturer is mated with a socket made by another complies with the European Low Voltage Directive. BECMA oversees the compliance of mixed plugs and sockets between its members.
