

Cable Sealing Solutions

High quality and reliable cable sealing with 3M End Caps

3M Heat Shrink End Caps

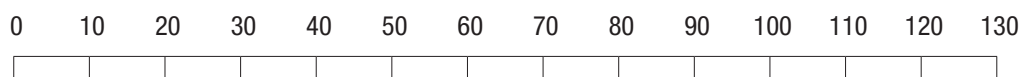

- 3M Heat Shrink end caps provide a reliable way of sealing cables with the use of a heat or gas gun.
- 3M end caps provide excellent electrical and mechanical protection; complimented by an internal adhesive coating to ensure maximum environmental sealing.
- 3M end caps can be used for indoor or outdoor cabling.

3M Cold Shrink Technology

- 3M Cold Shrink End Caps environmentally seal and mechanically protect exposed cable ends using no tools, mastics or tapes.
- They are close-ended, tubular rubber sleeves that are factory expanded and loaded onto a removable core.
- When positioned over the end of a cable, or other cylindrical object, the core is removed to provide a reliable seal that protects your cable ends from environmental damage.
- They are easily installed and cleanly removable.

Cable Diameter (mm)

Heat Shrink Part Numbers

SKE 4/10	4-8
SKE 8/20	8-16
SKE 15/40	15-32
SKE 25/63	25-51
SKE 30/76	30-61
SKE 45/100	45-80
SKE 61/158	61-126

Cold Shrink Part Numbers

EC-1	12-21
EC-2	16-30
EC-3	26-49
EC-4	45.5-84
