**KEEPING YOUR AIRSPACE BREATHABLE**

# ANTI-STATIC DUCTING

Flexible ducting is vitally important in improving safety and working conditions. It can be used to bring fresh air in to an area, extract contaminated air out, and be used to direct heated air where it is needed. Using ducting gives you greater flexibility.

The SA CYCLONE Ducting system is fully versatile and modular and suitable for ATEX Zones 1 and 2 areas.

By combining the various options you can build a system to your exact requirements. Using a combination of straight couplers, Y pieces, reducers and using different sizes of ducting you can create the best system for you.

This ducting system is a result of SA's legendary attention to detail. Carefully selected materials, robust design and rigorous testing combine to bring you a ducting system second to none. Using an antistatic reinforced polymer material with an integrated steel helix wire, it has been vigorously tested by an

independent laboratory and passed both the antistatic and flammability tests.

By using the SA CYCLONE Ducting system you can be sure you are providing the safest system for your team. The safer the area and the better the environment the quicker the tasks will get completed. This will enable projects to be finishes on time or early. This brings great benefits to you and your team. The system is compatible with SA CYCLONE Air movers and SA FLEXIHEAT ATEX Heaters.

## SA CYCLONE ANTI-STATIC DUCTING

With Ducting the fan can be placed away from the work zone to reduce noise levels and keep the floor space clear

The helix coil reinforcement means that the ducting is extremely durable as well as totally flexible

The SA CYCLONE Anti-static Ducting has been officially certified as Anti-static and Flame Retardant.

## Components

20cm Ø

SAFD20/05-EX (5 metres long)  
SAFD20/10-EX (10 metres long)

SAFD20/CU  
Coupler

SAFD20/YC  
Y Coupler

## Compatible With

SAF20-EX Portable 20cm Fan

30cm Ø

SAFD30/05-EX (5 metres long)  
SAFD30/10-EX (10 metres long)

SAFD30/CU  
Coupler

SAFD30/YC  
Y Coupler

SAF30-EX  
Portable 30cm Fan

SAPH15/400  
ATEX Heater

40cm Ø

SAFD40/05-EX (5 metres long)  
SAFD40/10-EX (10 metres long)

SAFD40/CU  
Coupler

SAFD40/YC  
Y Coupler

SAF40HP-EX Portable 40cm Fan
