

WAVELAY®

Manufactured using one or more stainless steel tracer wires laid in a sinusoidal wave pattern and laminated between two layers of low density lead free virgin grade rot resistant polyethylene.

- Unique design allows wires to stretch by over 25% before breaking.
- Top Printguard layer protects the wires and the warning message.
- Side flanges supplied if required.
- Tensile strength of wire 680N/mm².
- Detectaccessories available for joining detectable wires

DETECTACCESSORIES

Crimping Tool - 043385
Stainless Steel Wire Crimps - 043347
 (Packs of 100)
