Application

3M™ Top Hat Glands are designed for use with Medium Voltage Cables in conjunction with Termination applications.

Features

3M™ Top Hat Glands are made from galvanised steel and use 3M Cold Shrink Technology to seal onto the cable, eliminating the need for heat and special tools, making a quick, simple and reliable installation. The Cold Shrink Outer sealing tube provides a reliable environmental seal, and is resistant to acid, alkalis, ozone, fungus, and UV light.

Kit Content

- Top Hat Gland
- Fixing Screws
- Jubilee Clips
- Cold Shrink Sealing tube
- Insulation & sealing tapes
- Full Installation Instructions

Product Selection

Kit Reference	Accepted Cable OD (mm)
Top Hat Gland Kit Complete with Cold Shrink Sealing Kit	
THG1	36 – 65
THG2	53 – 94
Cold Shrink Replacement Sealing Kit	
THGS1	36 – 65

Please refer to the individual technical data sheets for EPDM Rubber Cold Shrink Tubes for details of Electrical properties and other data.

Product Stewardship

3M has a fundamental concern for all who make, distribute and use its products, and for the environment in which we live. This concern is the basis of our philosophy and policies by which we assess the health and environmental information on our products and then take the appropriate steps to protect employee, the public health and the environment.

Customer Notice

3M encourages its customers and potential users of 3M products to review their applications for such products from the standpoint of human health and environmental quality. To help ensure that 3M products are not used in ways for which they were not intended or tested. 3M personnel are available to assist customers in dealing with ecological and product safety considerations. Your 3M sales representative can arrange for the proper contacts.
