Carlon Nonmetallic Enclosures

Introduction

All the enclosure choices you need.

As the industry leader in nonmetallic, nonconductive wiring management products, Carlon® offers a broader line than anyone — all designed for easier installation, greater performance, and lower installed cost. And what's true across our line holds equally true for our nonmetallic, nonconductive enclosures. Quite simply, we offer the most complete line of such enclosures and accessories of any manufacturer in the market. From routine applications and normal service to the most demanding environments, you

can be sure we have the right enclosures in the right sizes for you. In addition, you can count on us for any modification you might require such as color molded enclosures, painted enclosures, and RFI/EMI protection. And whether it's standard or modified, you can also count on us for the very best in service and delivery. Take a closer look at all we offer, then contact us to learn more on how we can reduce your total enclosure costs with our lightweight, easily machinable, corrosion resistant, nonmetallic enclosures.

Circuit Safe NEMA Enclosures

Circuit Safe NEMA Enclosures are the flagship product of the Carlon Enclosure offering. Molded in tough, durable polycarbonate resin, these enclosures lead the market in terms of design, durability, aesthetics, and economy of use.

Ranging in size from 6"x4"x4" to 16"x14"x6", all Circuit Safe NEMA products are UL-50 Listed and meet Types 4X, 12, and 13. These enclosures utilize recognized materials that carry an ultraviolet rating of F1, ensuring a very long, stable service life when installed outdoors. In addition, the use of polycarbonate material means that these enclosures enjoy an extremely high impact resistance rating...almost three times more impact resistant than traditional fiberglass enclosures.

Installation of components is made easy, too, with the patented Panel Adjuster Kits and Swing Out Panel Kits. Sub-panels can be stacked or suspended at any depth within the enclosure, maximizing the space available for component mounting. Machining polycarbonate is also safe and easy. There are no splintering problems or airborne fibers typical when machining traditional fiberglass products.

Lighter, stronger, easier and safer to use, and better-looking. Check out Carlon's CircuitSafe NEMA line today.

Features and Benefits

- 100% non-metallic construction, including hinges
- Sturdy SS latches install without penetration of the enclosure base
- Clear covers are available which eliminates the need for window kits
- All cover screws are captive
- Patented panel suspension system allows the installation of panels at any depth, including stacking of multiple panels
- Swing panels are also available
- Available in junction boxes, external hinge, and hidden hinge versions
- Subpanels are available in steel, PVC, or aluminum
- Non-metallic mounting rails for easy installation
- Less than half the weight of metal enclosures, 25% lighter than fiberglass, easier to handle and less expensive to ship
- Full modification services are available

Applications

- Any outdoor applications especially where sunlight resistance is an issue
- Applications where water is present
- Applications where damage during shipment or installation or use is an issue
- Any applications where it is necessary to view internal components through a clear cover
- Applications where weight is an issue
- Applications where the ability to pass wireless signals is needed
- Applications where rust and corrosion are an issue

Examples

- Septic and pump controls
- Wireless system component protection
- Marina and sea-side installations
- Controls that require through-cover viewing of read-outs and dials
- Machine controls/process controls
- Food and beverage process controls
- Security system controls

Standards

- Meets or exceeds NEMA Types 4X, 12, and 13
- Listed per UL-50 as Types 4X, 12, and 13

NEMA Enclosure Styles

Circuit Safe® NEMA enclosures are available in three different cover options and a wide range of sizes. From our screw cover style enclosures to our hidden hinge cover style enclosures to our external hinge cover style enclosures, Carlon has a Circuit Safe NEMA enclosure to meet your application-specific need.

Styles

Circuit Safe JIC Enclosures

Manufactured from structural foam thermoplastic, Carlon® Circuit Safe® JIC enclosures provide high impact strength to eliminate dents and deformations along with high dielectric strength, excellent weathering capabilities, and excellent resistance to a wide range of corrosive agents, acids, alkalines, and salts. These UL approved and CSA recognized enclosures also withstand wet and dirty environments, while their thick wall construction make them a particularly good choice wherever condensation is a concern. Rated for use in Type 1, 3, 3S, 3X, 3SX, 4, 4X, 12, and 13 environments, Carlon Circuit Safe JIC enclosures are suited for virtually all indoor/outdoor industrial, MRO, and OEM applications. They are available in 10 sizes from 6 x 6 x 5 through 30 x 24 x 12 with a choice of screw or hinged design, opaque covers, or clear polycarbonate covers which protect devices from hostile environments while allowing monitoring of instrumentation and/or electrical functions.

Features

- Hinge caps make covers captive.
- Nonmetallic molded-in hinges on hinged models.
- No rough corners, sharp edges, or burrs.
- Nonconductive — eliminates danger of electrical shock.
- Lid design provides greater usable internal volume.
- Ample interior space for ease of wiring.
- Fully gasketed.
- Ultraviolet stabilized for outdoor use.

Applications

- Instrument case.
- Junction and terminal boxes.
- Control and switching enclosures.
- Splice and pull boxes.
- Starter, pushbutton, and transformer housings.
- Meter and transformer cabinets.

Standards

- Meets NEMA Types 1, 3, 3S, 3X, 3SX, 4, 4X, 12, 13 as indicated.
- UL Listed per UL 50, enclosures for electrical equipment.
- CSA certified.
- JIC compliance.

Hinged Cover

Meets NEMA 1, 3, 3S, 3X, 3SX, 4, 4X, 12, 13

Features

- Nonmetallic mounting feet and all mounting hardware included.
- White painted 14 gauge steel or 1/4" PVC back panel (order separately).
- 304 (18-8) stainless steel screws (10-32 / 11/8").
- Lid design provides greater usable internal volume.
- Completely nonmetallic hinges.
- Brass screw inserts.
- Temperature Range: -30° to 230°F
- Material: polycarbonate molded base and cover.

Enclosures shipped with mounting feet and panel mounting hardware.

Medium Hinged Cover

Meets NEMA 1, 3, 3S, 3X, 3SX, 4, 4X, 12, 13

Features

- Nonmetallic mounting feet and all mounting hardware included.
- White painted 14 gauge steel or 1/4" PVC back panel (order separately).
- 304 (18-8) stainless steel screws (10-32 / 11/8").
- Completely nonmetallic hinges.
- Brass screw inserts.
- Temperature Range: -40° to 185°F
- Material: NORYL base and cover.

*Enclosure only available with opaque hinged cover.

Enclosures shipped with mounting feet, hinge caps and screws.

**Order back panels separately.

For factory installed pad lockable latch (part no. CJTL), consult Customer Service for price and delivery.

Hinged Window Cover

Meets NEMA 1, 3, 3S, 3X, 3SX, 4, 4X, 12, 13

Features

- Nonmetallic mounting feet and all mounting hardware included.
- 304 (18-8) stainless steel screw (10-32 / 1 1/8").
- White painted 14 gauge steel or 1/4" PVC back panel (order separately).
- Completely nonmetallic hinges.
- Lid design provides greater usable internal volume.
- Brass screw inserts.
- Material: polycarbonate molded base and cover.

Note: Window material 1/8" thick clear polycarbonate is permanently bonded to the cover.

Circuit Safe Pushbutton Enclosures

Circuit Safe® nonmetallic pushbutton enclosures are molded from engineered thermoplastic material that is resistant to most corrosive agents. Whether predrilled 1-2-3 hole enclosures, blank cover enclosures or enclosures with multiple hole openings, Carlon's pushbutton enclosure series offers high impact strength, chemical resistance, high dielectric strength and excellent durability for the correct application.

Features

- Engineered thermoplastic base and cover.
- 304 stainless steel screws.
- Brass screw inserts.
- High-impact strength.
- Temperature range from -40° F to 185° F.

Applications

- Standard oil-tight pushbuttons, switches and pilot lights.
- Conduit entries.
- Junction boxes.
- MRO and OEM applications.

Standards

- Standards vary by product.
- Screw cover pushbutton enclosures with 1-2-3 hole openings are Listed per UL 50 for industrial controls.
- Narrow profile blank screw cover enclosures are listed per UL 50 for industrial controls and meets NEMA Type 1, 3, 3S, 3X, 3SX, 4, 4X, 12, and 13.
- Nonmetallic hinged cover enclosures with multiple hole openings are UL Listed.

Screw Cover Enclosures with 1-2-3 Hole Openings

UL Listed per UL 50 for Industrial Controls

Wall mount pushbutton enclosures are molded from gray, engineered thermoplastic material that is resistant to most corrosive agents. Universal pushbutton holes are designed to accommodate all standard oil-tight pushbuttons, switches and pilot lights. A grounding plate is included on the cover. Auxiliary devices must be rated for appropriate NEMA applications.

Features

- 30.5 mm keyed pushbutton holes.*
- Material: nylon base and cover.
- Integrally molded mounting flange.
- Brass screw inserts.
- 304 (18-8) stainless screws (8-32 / 3/8").
- Temperature range from - 40°F to 185°F.

† Dimensions are in inches unless marked otherwise. Operators not included.

Narrow Profile Blank Screw Cover Enclosures for Small Instrumentation and Control Applications

UL Listed per UL 50 for Industrial Controls
Meets NEMA 1, 3, 3S, 3X, 3SX, 4, 4X, 12, 13

Blank cover enclosures can be easily drilled with a standard hole saw for conduit entries and pushbuttons. Wall mount enclosures are molded from gray, engineered thermoplastic material and are resistant to most corrosive agents.

Features

- Brass screw inserts.
- Material: nylon base and cover.
- Integrally molded mounting flange.
- 304 (18-8) stainless screws (10-32 / 3/8").
- Temperature range from - 40°F to 185°F.

Hinged Cover Enclosures with Multiple Hole Openings

Made from engineered thermoplastic material, these enclosures are ideal for applications that require high-impact strength, chemical resistance, high dielectric strength, and excellent weathering capabilities, including indoor/outdoor industrial, MRO, and OEM applications. Nonmetallic hinges are an integral part of the mold. Hinge caps make cover captive and removable cover allows for easy field adjustment. Auxiliary devices must be rated for appropriate NEMA applications.

Features

- Nonmetallic mounting feet and all mounting hardware included.
- White painted 14 gauge steel or 1 1/8" PVC back panel (order separately).
- Material: engineered thermoplastic base and cover.
- 304 stainless steel screws.
- Brass screw inserts.
- Lid design provides greater usable volume.
- Completely nonmetallic hinges.
- Temperature range from - 40°F to 185°F.

¹ NI1614W NEMA Type 12 Rated

Features

- High-impact strength.
- High dielectric strength.
- Suitable for indoor and outdoor use.
- Fully gasketed.

Standards

- UL Listed and meets NEMA Type 4X with the exception of NI1614W. All sizes are NEMA Type 1 & 12 rated.

Applications

- Instrument case.
- Junction and terminal boxes.
- Control and switching enclosures
- Meter and transformer cabinets.
- Small device enclosures.
- Surface mounted instruments

Himeline Enclosures HE, HS, HP, HLA/HLS Series

Carlson® Himeline® enclosures are the ideal alternative to expensive stainless steel enclosures. They have excellent corrosion resistant properties; are impervious to sunlight, dirt, and moisture. Available in four series (HE, HS, HP, and HLA/HLS), with sizes ranging from 4 x 3 x 2 through 50 x 40 x 17, these enclosures offer choices that include double doors, clear or opaque covers, hinged and screw versions, single or three point closure mechanisms, 4X windows, DIN rail mounting, and adjustable depth door in door option that allow you to customize your enclosures by separating power from communications.

Features

- High-impact strength.
- High dielectric strength.
- Suitable for indoor and outdoor use.
- Fully gasketed.
- Lightweight.

Applications

- Instrument case.
- Junction and terminal boxes.
- Control and switching enclosures.
- Meter and transformer cabinets.
- Small device enclosures.

Standards

- Meets NEMA and IP standards as indicated in appropriate section.
- UL Listed as indicated.

HE Series

(Small Electronic Enclosures/Insulated Industrial Boxes – Except Hinged Boxes)

Features

- Hidden hinges open 185° for easy access.
- M8x18 screws for back panel mounting (included).
- Sealing gasket on all models.
- Mounting plate available for specific sizes.
- Hinged versions available (factory installed). *For more information contact your Carlon Sales Representative.
- Optional internal/external hinges.
- Enclosures attach directly or with wall brackets.

Lid Options

Opaque low lid. "BASIC" model.

Transparent low lid. "C" models.

Material

- Opaque – lids and bases - PVC
- Clear – lids and bases - polycarbonate

Standards

- NEMA 4X Rated.
- Meets IP 55.

Carlon® Himeline® HE Series Enclosures are small Electronic Enclosures/Insulated Industrial Boxes ranging in size from 4 x 3 x 2 to 13 x 11 x 4. They have a high-impact, high dielectric resistance, and are lightweight, fully gasketed and suitable for indoor and outdoor applications. The HE Series Enclosures meet IP 55 and are NEMA 4X Rated. All these features combined make these enclosures the ideal alternative to expensive stainless steel enclosures.

Himeline® Enclosures – HE Series

HS Series Screw-On Fastened and Hinged Cover Enclosures

- Meets NEMA 1, 3, 3S, 4, 4X, 12, 13
- Meets IP 65

Himeline® HS Series enclosures are designed for use as junction boxes, terminal wiring boxes, instrument and control housings, and small device enclosure applications. Molded under high pressure, Himeline HS Series enclosures provide high-impact strength, chemical resistance, high dielectric strength, and excellent weathering capabilities.

Features

- Standard slotted locking screw.
- High impact strength.
- Chemical resistance.
- High dielectric strength.
- Excellent weathering capabilities.
- Sealing gasket on all models.

Applications

- Junction boxes.
- Terminal wiring boxes.
- Instrument and control housings.
- Small device enclosure applications.
- Indoor or outdoor use.
- Sunlight resistant.

Standards

- Meets NEMA 1, 3, 3S, 4, 4X, 12, 13 standards as indicated.
- UL Listed per UL 50, enclosures for electrical equipment.
- Meets IP 65.
- UL Listed (E54381).

Material

- Opaque/Clear Lid – Polycarbonate
- Base – Fiberglass Reinforced Polyester

HS Series Screw-On Fastened and Hinged Cover Enclosures

Features

- Molded under high pressure.
- High impact strength.
- Chemical resistance.
- High dielectric strength.
- Excellent weathering capabilities.
- Clear cover available.

HP Series Enclosures with Hinged Quick-Release Cover

- Meets NEMA 1, 3, 3S, 4, 4X, 12, 13
- Meets IP 66

Himeline® HP Series enclosures for medium sized devices and equipment provide superior performance as junction and terminal wiring boxes, and instrument and control housing applications.

For indoor/outdoor industrial, MRO, and OEM applications. HP Series enclosures are resistant to corrosion, sunlight, chemicals, dirt, and moisture. Temperature range from -58° F to 320° F.

Features

- Projections for affixing cover mounted panel.
- Door locking mechanism convertible to key lock.
- M8x18 studs for back panel mounting (included).
- Hidden hinges open 185° for easy access.
- Multipositional DIN rail fixing components.
- Removable stainless steel hinge pins.
- Single piece construction.
- Opaque or tempered glass window option.
- Steel, nonmetallic & slotted back panels available.
- External & internal venting available.
- Hinged variable height inner panel option.
- Quick lock 1/4-turn entry.
- Underside grid pattern on inner door panel.
- Self-positioning panel depth adjusters.
- Pole mounting kit.
- Pedestal mounting capability.
- Sunlight resistant.

Applications

- Junction boxes.
- Terminal wiring boxes.
- Instrument and control housing.
- Indoor or outdoor use.

Standards

- NEMA Type 1, 3, 3S, 4, 4X, 12, 13.
- UL Listed per UL 50, enclosures for electrical equipment.
- Meets IP 66.

Material

- Lids/Bases – Fiberglass reinforced polyester.

HLA/HLS Series Enclosures

Carlton® Himeline® HLA/HLS Series Enclosures are large Fiber Reinforced Polyester Cabinets ranging in sizes 20 x 20 x 17 to 50 x 40 x 17 and 20 x 20 x 12 to 50 x 40 x 12, respectively. They have operating temperatures of -50° to 150° C and can accommodate large devices and equipment for a wide range of applications including junction and terminal wiring boxes, instruments, and control housings. They are ideal for indoor/outdoor industrial, MRO and OEM applications, and offer superior strength and high resistance to corrosion, moisture, dust, oil and UV light, enabling them to withstand the harshest of environments.

The HLA/HLS Series Enclosures are fitted with a watertight gasket and are available in one- and two-door configurations. These cabinets have a closed top and bottom and the two-door version includes a central upright to maintain rigidity.

To maintain the watertight seal, the locking mechanism is positioned outside the gasketed area. A wide variety of accessories are available such as steel and nonmetallic back panels, self-positioning panel depth adjusters, and ventilator kits.

Carlton Enclosures...the ideal alternative to expensive stainless steel enclosures.

Features

- Fiber reinforced polyester.
- Temperature range of -58° to 302° F (-50° to 150° C).
- Indoor/outdoor applications.
- Superior strength.
- High resistance to harsh environments.
- Watertight gasket seal.
- One- and two-door configurations.
- Locking mechanism and hinge are outside gasketed area.
- Floor or wall mounted.

Applications

- Contain large devices and equipment.
- Junction and terminal wiring boxes.
- Instrument and control housings.

Standards

- IP 65 Rating (Single door versions only)
- 4/4X Rated (Single door versions only)
- UL Listed

Allows any size enclosure to breathe, yet remains watertight.

HLP Series Enclosure and Pedestal

Himeline HLP Enclosures and Pedestals are designed to accommodate all types of electrical equipment for electrical distribution applications. The enclosure may be directly installed on the ground or on top of a pedestal, and the pedestal is approved for direct bury applications. Both are manufactured using fiber reinforced polyester to provide high impact resistance and allow effortless modifications. And each have an IP-43 Self-Ventilated and IP-54 Watertight rating and a temperature range of -58°F to 302°F.

Enclosure

Features

- High impact resistance
- Nonconductive and noncorrosive.
- Fits all type of electrical equipment
- IP-43 Self-Ventilated.
- IP-54 Watertight.
- One and two door configurations.
- Install directly on the ground or on a pedestal.
- Removable inner hinges for great access.
- Doors open 180°

Pedestal

Features

- Can be direct buried.
- Nonconductive and noncorrosive
- Detachable upper front for easy access.
- High impact resistance.
- Auxiliary outlet on the side.
- IP-43 Self-Ventilated.
- IP-54 Watertight.
- Floor or wall mountable.

Material

- Fiberglass Reinforced Polyester

Applications

HLP Enclosure and Pedestal

Slack and Splice Enclosures

Carlton's state-of-the-art modification capabilities allow for design of Slack and Splice Enclosures to meet specific application requirements.

Features

- Slack and Splice Enclosures provide maximum protection of slack fiber and splice unit assemblies.
- Eliminates need for difficult aerial and vault splicing.
- Stores adequate slack fiber to facilitate splicing at ground level work station.
- Enclosure sized to maintain minimum required radius of fiber optic cable.
- Splice tube to accommodate industry standard splice and tray assemblies (Splice enclosure only).

Slack Enclosures

For All Enclosures

Painted JIC enclosure with painted back panel. Installed clear cover with handle and quick-release latch.

Color molded JIC unit with addition of window and pushbuttons.

Molded junction box painted with addition of mounted weatherproof cover.

Painted JIC enclosure with pocket installed in cover for control pad.

Color Molded Enclosures

All Circuit Safe® enclosures can be molded in a variety of colors. Minimum quantities for single shipment or releases against blanket orders are required.

Painted/Silkscreened Enclosures

All enclosures can be painted, interior and exterior, or by special request. Enclosure covers can also be silkscreened on request.

EMI/RFI Protection

For applications where Radio Frequency Interference is a factor, the interior can be coated with an acrylic base paint with a nickel filler. Windows can be covered with fine copper mesh.

Other Modifications Available

Our factory is capable of modifying any of our enclosures to a customer's specifications. Factory's capabilities include:

- Precision milling of button holes, windows, and pockets for keypad installations.
- Hole tapping.
- Ventilators.
- Mounting bosses.
- Access windows.
- Hinged windows.
- Mounted in use weatherproof covers.
- Handles for portable units.
- Latches.
- Enclosure coolers.
- Cylinder locking systems.
- And more!

NEMA Types – Definitions Pertaining to Nonhazardous Locations

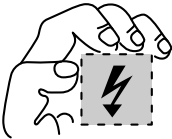

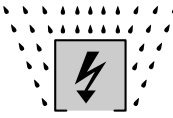

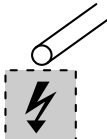

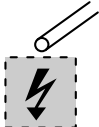

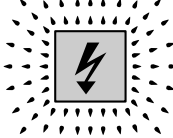

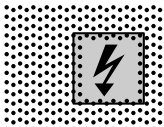

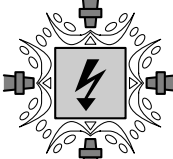

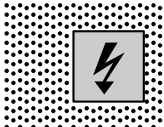

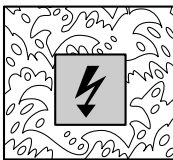

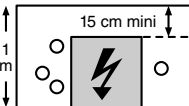

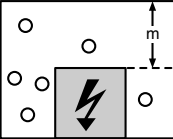

Enclosures for Electrical Equipment

An enclosure is a surrounding case constructed to provide protection from accidental contact with the enclosed equipment and to provide protection to the enclosed equipment from specified environmental conditions. A brief description of the more common types of enclosures used by the electrical industry follows.

- Type 1 Enclosure:** Intended for indoor use primarily to provide protection against contact with enclosed equipment and a degree of protection against falling dirt.
- Type 2 Enclosure:** Intended for indoor use primarily to provide a degree of protection against limited amounts of falling water and dirt.
- Type 3 Enclosure:** Intended for outdoor use primarily to provide a degree of protection against wind-blown dust, rain, sleet and external ice formation.
- Type 3R Enclosure:** Intended for outdoor use primarily to provide a degree of protection against falling rain, sleet and external ice formation.
- Type 3S Enclosure:** Intended for outdoor use primarily to provide a degree of protection against wind-blown dust, rain, and sleet, and to provide for operation of external mechanism when ice laden.
- Type 3X Enclosure:** Intended for outdoor use primarily to provide a degree of protection against wind-blown dust, rain, sleet, external ice formation, and corrosion.
- Type 3SX Enclosure:** Intended for outdoor use primarily to provide a degree of protection against wind-blown dust, rain, sleet, and corrosion, and to provide for operation of external mechanism when ice laden.
- Type 4 Enclosure:** Intended for indoor or outdoor use primarily to provide a degree of protection against wind-blown dust and rain, splashing water and hose-directed water.
- Type 4X Enclosure:** Intended for indoor or outdoor use primarily to provide a degree of protection against corrosion, wind-blown dust and rain, splashing water and hose-directed water.
- Type 6 Enclosure:** Intended for indoor or outdoor use primarily to avoid a degree of protection against contact with enclosed equipment, falling dirt, hose-directed water, entry of water during occasional temporary submersion at a limited depth and external ice formation.
- Type 6P Enclosure:** Intended for indoor or outdoor use primarily to provide a degree of protection against contact with enclosed equipment, falling dirt, hose-directed water, entry of water during prolonged submersion at a limited depth and external ice formation.
- Type 12 Enclosure:** Intended for indoor use primarily to provide a degree of protection against dust, falling dirt and dripping noncorrosive liquids.
- Type 13 Enclosure:** Intended for indoor use primarily to provide a degree of protection against dust, spraying of water, oil and noncorrosive coolant.

International Standards IP Protection Classification Data

The letters IP followed by three characteristic numbers symbolize the degree of protection.

First Digit			Second Digit		
Protection Against Solid Bodies			Protection Against Liquids		
IP		Test	IP		Test
0		No protection	0		No protection
1		Protection against solid bodies larger than 50 mm (for example accidentally touching with the hand)	1		Protection against vertical water drops condensation
2		Protection against solid bodies larger than 12 mm (for example a finger)	2		Protected against water drops at up to 15° from the vertical
3		Protection against solid bodies larger than 2.5 mm (tools, wires)	3		Protected against rain at up to 60° from the vertical
4		Protection against solid bodies larger than 1 mm (tools, small wires)	4		Protected against water splashing from all directions
5		Protection against dust (no harmful deposits)	5		Protected against water sprayed from a hose from all directions
6		Complete protection against dust	6		Protected against water projections similar to sea wave splashes
			7		Protected against the effector immersion
			8		Protected against effects of prolonged immersion under pressure

Chemical Resistance Data

Environmental Resistance Table: *E-Excellent, G-Good, L-Limited, U-Unsatisfactory*

IMPORTANT: These environmental resistance ratings are based upon tests where the specimens were placed in complete submergence in the reagent listed. Ratings listed in this chart apply to a 48-Hour exposure period. (The information in this chart is to be used **ONLY** as a guide in selecting equipment for appropriate chemical compatibility. Before permanent installation, test the equipment with the chemicals and under the specific conditions of your application.)

Our Carflex® Liquidtight Flexible Conduit can tie the competition up in knots. Literally.

Almost half the weight of metal and so flexible you can tie it in a knot, Carflex® Liquidtight Flexible Conduit increases your labor efficiency and reduces your installed cost, while providing functionally superior wire and cable protection even in harsh, wet industrial or commercial environments.

UL Listed and CSA certified for direct burial in any length per National Electrical Code, Carflex conduit is available in a wide range of sizes to meet any project requirement. That means you can count on it for dependable, non-conductive, corrosion resistant protection for everything from motor control cables and repetitive motion machine tools to residential applications such as air conditioning, heating, and pool pump connections.

For more information on the Carflex line including complete fittings, pre-wired liquidtight whips, and our extra flexible Carflex®-X-Flex™ liquidtight tubing, call Carlon today at 800-3-CARLON (322-7566) or visit our web site at www.carlon.com. Carflex. No matter how you look at it, it's got the competition tied up in knots.
