

ALUMINIUM TERMINALS

AA-M

AA-M series terminals are made from aluminium of a purity equal to or greater than 99.5%.

They are designed to accept a variety of conductor forms especially low stranded compacted conductors.

Non circular conductors may require pre-rounding prior to introduction to the terminal.

Barrels are capped and filled with grease so as to avoid oxidation of the aluminium.

| Conductor Size sqmm | Ø Stud mm | Ref. | Dimensions mm | | | | | | Quantity Box/Bag | Hydraulic Tools |
|------------------------|--------------|----------------|---------------|----|----|----|-------|------|---------------------|------------------------------------|
