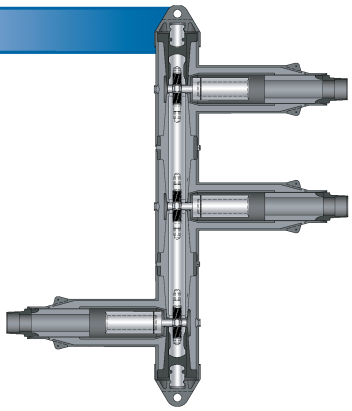
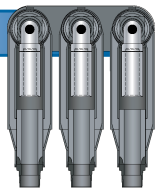
## L-KITS

**The L-Kit system utilizes 600 series elbow cable termination with 600 series connecting plugs. Each cable is terminated with an elbow. They are then stacked and joined together with a connecting plug between elbows.**



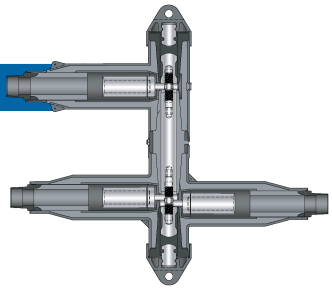
## J-KITS

**Our J-Kit system utilizes the same 600 series elbow cable terminations with 600 series 2, 3 or 4-way junctions. Each cable is terminated with an elbow and joined together on the junction.**



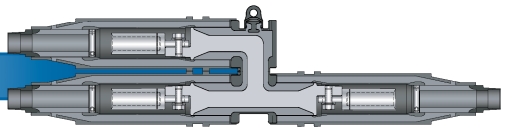
## VSL-KITS

**The VSL-Kit system adds a special 600 series double-ended elbow cable termination (vault stretcher) to the L-Kit system. Two cables are terminated with the special double-ended elbow. Three cables are terminated with the special double-ended elbow, a connecting plug and a 600 series elbow. Four cables are terminated with two special double-ended elbows and a 600 series connecting plug.**



## COMPACT I, Y AND H

**Finally, the Compact I, Y and H system utilizes the 600 series straight receptacle (SR) cable termination, an adapter-retaining ring and a special 2 (I), 3 (Y) or 4-way (H) bus bar. Each cable is terminated with a straight receptacle and joined together by the bus.**



**Whether you are joining cable in**

**a padmounted enclosure, a building vault or manhole,**

**Elastimold has a separable solution for you.**

## OUR DESIRE FOR CONTINUED IMPROVEMENT DRIVES OUR SOLUTIONS.

**The Thomas & Betts commitment to quality and reliability extends beyond the investments and research that lie behind our products and systems. We've developed specific initiatives to help you improve both system performance and reliability.**

**Our initiatives include product and application training for your engineering and operating personnel through the varied topics of our ongoing Technical Seminars. We also offer service and support through programs like Disaster Relief Response.**

**All our efforts are conceived and implemented with the same underlying goal: to help you to provide a systems network that meets or exceeds the service expectations of your customers. And helps you give them what they want most; "No outages!"**

**Thomas & Betts and Elastimold stand as beacons of innovations in the past, present and future. All with a single goal – to help you build more quality, performance and reliability into your utility system.**
