

Phoenix[®]

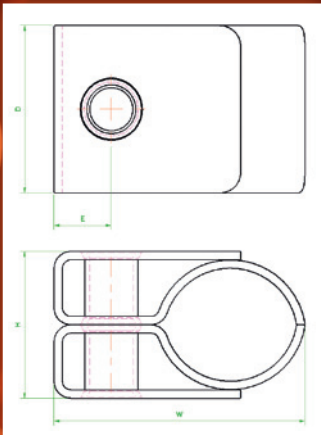

Fire Rated Cableclamps

Community Design Reg No: 000355854-0002

Opportunity through Innovation

A range of Fire Proof cable cleats specifically designed for the installation of Fire Protection (FP) rated cables. Available in 11 sizes to suit cables from 10mm to 65mm diameter.

Manufactured from Type 316L stainless steel with single bolt fixing, these cleats are fireproof, corrosion resistant and easy to fit.

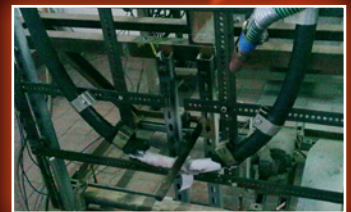

To prove their fire resistance Phoenix cleats were used to secure a fire rated cable during a series of fire tests in accordance with BS 8491:2008 and also BS 5839-1:2002, Section 26.2d. The cleats supported the cable appropriately during the test resulting in a successful outcome for the cable. The performance of the cleats was as expected given the physical characteristics of 316L stainless steel at elevated temperatures.

A copy of the test report is available from our sales office.

Part Number	Cable range Dia. (mm)	Dimensions				Fixing Hole Clearance mm
		W mm	H mm	D mm	E mm
