

# Stainless Steel Mini Pillars

Lucyzodion has introduced a range of high quality cost effective Stainless Steel Utility/Service feeder pillars. The newly stocked pillars compliment the existing range of galvanised steel and cast iron pillars to make Lucyzodion a truly unique manufacturer.

Our new mini pillars offer a lightweight, corrosion resistant solution for small power distribution and termination.

The mini pillars are built with a new lift off door design and come with a 1/4 turn tri head lock, earth lead, backboard and integral root section.

Each service pillar is made from 2.0mm thick Stainless Steel and powder coated to a high standard.

The root section is pre punched to allow ducting to pass through it, to aid installation.

We can offer different lock options including hex and pin, O locks etc.

Feeder Pillar Size	Feeder Pillar Dimensions	Backboard Dimensions
UP150	900 x 150 x 150	500 x 135
SS150	1060 x 150 x 150	550 x 135

We currently have two standard colours

Black semi matt      Silver semi matt

Other colours are available on request
