It is an award winning company that continues to grow on the strength of its focus on innovation. The commitment to developing new products by its ‘Ideas & Innovation’ team has made Gripple a market leader. Achieving high standards is paramount to Gripple, and with the entire range produced at its own manufacturing plant, quality control is guaranteed. This, combined with its strong global sales network and the assurance of millions of customers worldwide, means Gripple is well placed to meet your needs.

While its fencing and trellising products lead the agricultural and viticultural sectors, its pioneering invention of the Gripple Hanger system has also changed the face of the construction industry.

The unique Gripple Hanger has revolutionised installation techniques which can be installed both quickly and easily. The product is used for suspending or bracing:

• mechanical & electrical services (M&E)
• heating, ventilation and air-conditioning services (HVAC)
• panels for cold rooms
• seismic bracing
• other suspended services

Gripple Hangers are used on major projects worldwide covering industrial buildings, distribution centres, schools, hospitals, warehouses and retail stores. In fact they can be found in some of the most prestigious projects around the world.

With its solution driven products, supported by its product knowledge and customer service, Gripple is well placed to continue leading the way in the agricultural, viticultural and construction markets.

Gripple Limited has grown rapidly since it launched its original product in 1988. It has sold more than 230 million products to 75 countries worldwide, and now has premises in the UK, Europe and the USA.
Benefits of Gipple – Savings in time and money…

The whole essence of using Gipple to suspend fixed loads is to save you time and money. Gipple is a natural replacement for threaded rod or chain for a number of reasons:

- Fast to install (as much as 6 times)
- Versatile
- Simple to use
- Strong but lightweight
- Safe and aesthetically pleasing to the eye
- Ready to use kits with appropriate wire end fixings
The Gripple Fastener

The principal element of all Gripple Hanger assemblies is the ‘Gripple’ fastener, for securing the wire rope and adjusting the height of the service.

Available in 5 hanger sizes
- ready to use kits with a choice of 8 wire end fixings
- available in lengths 1m to 10m as standard – other lengths on request
- stainless hangers available in loop and stud end fixings only

**Loop (a)**  
(page 7)  
For looping around purlins, beams, roof trusses and other accessible building features. Available in sizes No.1-No.5

**Stud (b)**  
(page 8)  
For anchoring into concrete ceilings, metal decking and pressed metal brackets (with nuts). Supplied with drop in anchors or nuts as required. Available in M6 x 20mm in sizes No.1-No.3; M8 x 45mm in sizes No.2 and No.3; M10 x 50mm in size No.4

**Toggle (c)**  
(page 9)  
For fastening through profile roof cladding, light fittings, luminaires and other cavities. Available in sizes No.1-No.3

**Snap Hook (d)**  
(page 10)  
Snap-on attachment for clips, brackets and light fittings. Available in sizes No.1-No.3

**Eyelet (e)**  
(page 11)  
For fastening to brackets or fixtures using bolts. Available in sizes No.2 and No.3

**90° Eyelet (f)**  
(page 12)  
For quick shot-firing into concrete, steel and wood using gas and powder actuated tools. Available in sizes No.1-No.3

**End Stop (g)**  
(page 13)  
Easy slide-on fixing into lighting channels and lighting track or other channel fixings. Available in sizes No.1-No.3

**Barrel (h)**  
(page 14)  
For use in conjunction with the M6 T-bar twist clip for suspended ceilings or other fastenings with M6 male thread. Available in size No.2 only
HVAC & Mechanical applications

Spiral ducting
Oval ducting
Rectangular ducting
Fan coil units
Destratification fans
Extraction ductwork
Water pipes
Drainage pipes
Gas pipes
Chill beams
Ceiling panels
Heating panels
Radiant heaters
**Electrical applications**

- Busbar
- Cable ladder
- Cable tray
- Cable basket
- Channel
- Trunking
- Light rafts
- Luminaires
- Secondary supports
- Safety lines
- High wattage lights
- Electrical cables
- CCTV cameras
- Sound systems

**Other applications**

- Cold rooms
- Seismic bracing
- In-store signs & shopfitting
- Food factories*
- Swimming pool environments*
- Pest control
- Overhead catenary wires

* Stainless steel hangers are suitable for the food industry, swimming pool environments and chemical factories.

Loop End Fixing

Applications

The loop end fixing is an ideal method for wrapping around:
- Purlins
- Beams
- Roof trusses
- Other accessible building features

Product Advantages

- Quick choke knot installation
- No need for nuts, bolts, clamp fixing or other accessories
- Up to 6 times faster installation compared with threaded rod or chain

Stud End Fixing

Applications

The stud end fixing provides a quick method for installing services into:
- Concrete structures
- Metal decking structures
- Metal brackets using nuts

Product Advantages

- Quick installation into concrete using drop-in anchors or nuts
- Drop-in-anchors or nuts supplied free as part of the kit
- Available in sizes M6, M8 and M10

Toggle End Fixing

Applications

The toggle anchor method, which uses a restraining plate and end stop, provides an ingeniously fast way of fixing into:

- Profile roof cladding
- Light fittings – (including secondary supports)
- Luminaires – (including secondary supports)
- Other pre-drilled structures

Product Advantages

- Unique anchor method which uses a restraining plate and end stop
- Toggle end fixing is an integral part of the rope, requiring no additional accessories
- Each size is purpose designed to fit a specific hole diameter

Snap Hook End Fixing

Applications

The snap hook end fixing is a quick and ideal method for fixing to:

- Beam and purlin clips
- Any clip bracket with a 6mm hole
- Light fittings
- Luminaires
- Heater panels

Product Advantages

- Easy initial snap-on attachment for securing the Gripple Hanger onto an existing structure
- Ideal for services that require maintenance
- Can be attached to any clip bracket with a 6mm hole
- Can be detached to allow loading of tray or basket with new cables

Eyelet End Fixing

Applications

Suitable for a variety of applications that require bolting to brackets or fixtures such as:

- Speakers or visual display
- Any M6 bolt that is fixed for M&E services
- Light fittings
- Supporting industrial curtain track or shelter and shade netting

Product Advantages

- Easy attachment using nuts and bolts
- Fix using an M6 bolt

How to Use

Eyelet fixing  Suspending speakers  Suspending signs  Fixing into wooden beams
90° Eyelet End Fixing

**Applications**

Purpose designed for fixing into concrete, steel and wood:
- Suitable for suspending HVAC and mechanical services
- Suitable for use with Gripple Trapeze No.3 on pre-fabricated module systems

**Product Advantages**

- Designed for shot-firing into concrete, steel and wood using gas and powder actuated tools
- Replaces beam and purlin clips for steel beams
- Quick and safe, saving time on installation

## Barrel End Fixing

### Applications

Designed to work with an M6 male thread, this M6 female threaded barrel unit is suitable for:
- Fixing signage and light fixtures to M6 T-bar twist clip on suspended ceilings. (See page 19)
- M6 bolts or screws

### Product Advantages

- Aesthetic finish provides a clean look
- Quick installation
- Screw onto M6 T-bar twist clip or M6 bolt
- Wire rope is an integral part of barrel fixing with an end stop

#### Barrel End Fixing Sizes

Y-Fit Fixing

Applications

The Gripple Y-Fit is available in all standard Gripple end fixings and is suitable for:

- Containment – basket, ladder and tray
- Profile roof cladding
- Secondary or safety line support on light fittings, luminaires and other cavity uses
- Legs not to exceed 60°

Product Advantages

- Single point suspension
- Allows two points to be suspended using one Gripple fastener
- Two legs provide stability improving the centre of gravity

Y-Fit End Fixing Sizes

<table>

- Stainless options are available in loop and stud end fixings.

Y-Fit End Fixing Specification

Choose from End Fixings below

- 90° Eyelet end fixing No.1-No.3
- Eyelet end fixing No.2-No.3
- End stop fixing No.1-No.3
- Barrel end fixing No.2
- Karabiner end fixing No.1-No.3
- Snap hook end fixing No.1-No.3
- Stud (M6/M8) end fixing No.1-No.3
- Toggle end fixing No.1-No.3

How to Use

1. Y-Fit snap-on-hook on cable tray
2. Max 60°
3. Y-Fit toggle on light fitting
4. Completed suspension

Technical data sheet downloadable from www.gripple.com
Applications

The Gripple Y-Fit Accessory is available in all standard Gripple end fixings and is suitable for:

• Containment – basket, ladder and tray
• Profile roof cladding
• Secondary or safety line support on light fittings, luminaires and other cavity uses

Product Advantages

• Easily adjusted at working level with standard Gripple Hangers making it suitable for long drops

**Drop-in Anchor**

- Punch activated Grip L anchors for fixing into concrete and hollow core ceiling slabs
- All stud kits include free drop-in anchors
- A minimum of 25mm concrete is required
- ETA approved
- Accepts Gripple Pigtail anchor bolts
- 5:1 safety factor

Accessories – Fixing Solutions

Ceiling Clip

- Loop end fixing simply engages in the valley of the clip
- Available with plastic and metal washers for concrete and steel
- After firing, the nail completely entraps the Gripple loop fixing, but still allows pivotal movement of the wire rope
- Weight loadings are dependent on the type of concrete/steel.
- Always carry out a pull-test on site to determine the weight loadings

Ceiling Clip for wood

- Loop end fixing simply engages in the valley of the clip
- Drill a hole using a 5mm drill to a minimum depth of 25mm
- Fix the screw using an 8mm socket
- Also available: Drive thru® socket for attachment to drill (HF-socket-8mm)

Accessories – Decorative Products

Trapeze Fastener

- Purpose-made one-way Gripple for use on Gripple Hanger size No.3
- Load rated at 90kg
- Ideal for multi-tiered installations
- 5:1 safety factor

Product code

HF-TRAPEZE-NO3

Ceiling Fixing Kit

- A decorative ceiling fixing
- Ideal when suspending luminaires and lighting in offices, public buildings or retail premises
- 5:1 safety factor

<table>

Twister

- New innovative system for securing tail wires
- Tough, safe, simple and tidy
- Suitable for use with sizes No.2 and No.3
- Can be fitted retrospectively

Product code

TWIST-100B
## Accessories – Installation Tools

### Tensioning Tool
- **Description:** A purpose-made tool for quickly tensioning the wire rope
- **Suitable for:** Use on the higher rated hanger sizes No.4 and No.5
- **Applies up to:** 400kg of load
- **Product code:** TOOL-3-6MM-LOCK-1BX

### Setting Key
- **Description:** Easy grip setting key for use with Gripple kits
- **Available in:** Two sizes for No.1-No.3 and No.4-No.5
- **Product code:**
  - KEY-HF-LOGO-NO1/NO3
  - KEY-HF-LOGO-NO4/NO5

### Setting Punch for Drop-in Anchor
- **Available in:** Three sizes M6, M8 and M10
- **Suitable for:** Use on Gripple range sizes No.1-No.4
- **Product code:**
  - HF-SET-PUNCH-M6
  - HF-SET-PUNCH-M8
  - HF-SET-PUNCH-M10

### Protective Sleeve Tubing
- **Description:** Protective black plastic sleeve tubing to further reduce risk of condensation
- **Suitable for:** Use with Gripple Hanger sizes No.2 and No.3
- **Product code:**
  - HF-SLEEVE-2MM (No.2)
  - HF-SLEEVE-3MM (No.3)

### Wire Rope Cutter
- **Description:** A purpose-made tool for cutting wire rope
- **Suitable for:** Use on Gripple range sizes No.1-No.4
- **Product code:** CUTTER-GRIPPLE

### Sleeve Tube Cutter
- **Description:** For cutting the sleeve tubing to length
- **Cuts:** Both 2mm and 3mm tubing
- **Product code:** CUTTER-HOSE

### Workbelt
- **Description:** Professional workbelt
- **Keeps tools and products handy
- **Product code:** WORKBELT-CANVAS

---

Technical data sheet downloadable from [www.gripple.com](http://www.gripple.com)
How to choose the right size and model

1. Choose the size where the object’s weight falls within the product’s working range. Examples of the calculation formula are detailed below.

2. Unless specified, each of our end fixings maintains the load ratings of the individual kits.

3. Each size has a specified safe working load rated at 5:1, and offers a working load range.

4. The load range should be observed; choosing a size that is lighter or heavier than necessary is counter-productive, both functionally and financially.

5. Remember to adjust your size choice, if the hanger is to be used at an angle other than vertical. The table below (effect on SWL of hanging objects at an angle) shows the effect a sideways load has on a vertical installation.

6. In areas of high humidity (a paper factory) and frequent wash down (a food processing factory), stainless steel kits should be considered for extended life performance.

Calculation formula

A simple formula to determine the correct hanger size is:

**Weight per metre x distance between hangers**

**Example 1:**
15kg load per metre

\[ 15 \times 2 = 30kg \]

Distance between hangers is 2m

Plane: vertical

**Size will be No.2**

**Example 2:**
60kg load per metre

\[ 60 \times 2.5 = 150kg \]

Distance between hangers is 2.5m

Plane: vertical

**Size will be No.4**

Effect on SWL of hanging objects at an angle

The load rating for a Gripple Hanger is based on the suspension being hung vertically. If the wire rope is suspended at an angle, an additional sideways load is applied which reduces the load capacity of the suspension. The net effect is shown in the table below:

<table>
<thead>
<tr>
<th>Gripple Hanger</th>
<th>0° vertical</th>
<th>15°</th>
<th>30°</th>
<th>45°</th>
<th>60°</th>

Maximum SWL (kg) at an angle form vertical
Manufacturer’s recommendations

Environment – Standard Gripple Hangers may be used only in dry locations. Stainless steel Gripple Hangers may be used in certain indoor corrosive environments such as properly ventilated swimming pool arenas.

Load – Do not exceed the Safe Working Load (SWL) of any Gripple product.

No lifting – Do not use for lifting, such as in a crane or pulley situation.

No movement – Gripple Hangers are to be used to suspend static loads only. Do not use to suspend moving services, or services likely to be subject to movement.

No joining – Gripple Hangers must not be spliced together using a Gripple fastener, or any other joining device. A Gripple Hanger assembly must comprise one length of cable and one Gripple fastener only. If a longer length is needed, do not attempt to join two assemblies together.

Limitations of use – All Gripple Hangers, accessories and other Gripple products must only be used for suspending items recommended by the manufacturer.

Painting – If painting, ensure that a Gripple Décor Cover is applied to the Gripple fastener before painting to protect from the ingress of paint. Do not move the Gripple fastener on the cable after painting.

Building codes – Compliance with local codes, and where applicable national codes, is the buyer and/or installers responsibility.

Lubricants – Do not apply oil or any other lubricant to any part of the assembly

Round duct/pipes – When wrapping around duct or other round pipes, do not exceed an angle of 60 degrees between the top of the pipe and the Gripple.

Not for re-use – Gripple Hangers are designed for permanent installations, not for re-use.

Y-Fit installation angle – Legs on Y-fit hangers not to be installed at angles greater than 60 degrees.

Failure to observe these usage instructions may result in product malfunction, resulting in property damage and bodily injury. At time of shipment Gripple products are warranted to conform to the manufacturer’s published specifications and to be free from defects in material and workmanship. No other warranty, whether expressed or implied, including any warranty of merchantability or fitness for purpose, whether expressed or implied, shall exist in connection with the sale or use of any Gripple product.

General Guidelines for Swimming Pool Environments

• Please be aware of stress corrosion cracking (SCC) in swimming pool environments.

• In order to safeguard against SCC, please ensure at least two inspections are carried out each year of Safety critical components by a competent third party.

• Gripple cannot guarantee its products against SCC due to the high levels of inspection and maintenance required.

All the above information is taken from the Health and Safety Executive (HSE) report published in 1995 relating to swimming pool environments.

Specials/tailor-made solutions

We are specialists in solving our customers’ problems by offering a number of tailor-made hanger solutions. We control all of our manufacturing at our award winning ISO 9001 factory, and can custom make virtually any type of wire end fixing, or offer a number of accessories which meet customers’ needs. Please contact us to discuss specific requirements.
Certified fire safe solutions

**Standard Range – Temperature tested**
- Standard range of No.1-No.3 Gripple Hangers have been tested at 250° C
- The test was independently witnessed by Chiltern International Fire Ltd
- Maximum rating of 60 minutes applies to the 3 sizes

**Stainless Steel – Fire certified DIN Standard**
- Stainless range of No.2 and No.3 Gripple Hangers have been tested to DIN 4102-2 “Fire Behaviour of Building Materials and Building Components”
- The test has been independently witnessed by Intertek Testing Services
- Maximum rating of 20kg for 30 minutes achieved for the No.2 Gripple Hanger
- Maximum rating of 60kg for 45 minutes achieved for the No.3 Gripple Hanger
