

BAND-IT®

BAND-IT Solutions for the Industrial Insulation Market

BAND-IT-IDEX has been the world's leading manufacturer in quality clamping and banding systems since its inception in 1937. BAND-IT® bands and clamps are used in nearly every industry to include Industrial (including Agriculture and Construction), Defense, Hose, Electrical, Municipal, Utility, Electronic, Engineered Applications, Automotive Aftermarket and OEM, Petrochemical (including Downhole, Identification and Insulation) and Marine and Subsea.

The product line offered by BAND-IT® for the industrial insulation market includes Aluminum, 304 Stainless Steel and 316 Stainless Steel for BAND-FAST, coils and wing seals, in addition to stamping options, plastic totes for 200 linear foot coils and banding tools.

Schematic of BAND-FAST® with Wing Seal

BAND-IT-IDEX offers value-added solutions at cost effective prices to increase efficiencies. BAND-FAST® - patent-pending, pre-cut bands with wing seals or clips attached - is THE cut-to-order alternative to coils allowing distributors and contractors to focus on their core competencies of supplying and installing insulation. With our automated machines that assemble BAND-FAST at the rate of approximately 2,000 bands per hour, we are able to meet customer needs and expectations for small and large orders. By decreasing preparation time of the strapping itself and with smoother edges than coils for a safer work environment, projects can be completed more efficiently for more effective use of employees. In addition, the BANTAM Tool further increases safety and convenience by including a cutter and hammer within the tool.

BAND-IT is committed to excellence with Certificates of Compliance from ISO 9001, ISO 14001 and TS16949. With these commitments, we have significantly reduced our land-fill waste each year in addition to reducing our overall consumption of energy and materials.
