

AIN INDOOR TERMINATIONS

Application

A kit of 3 terminations for use indoors in controlled environmental conditions and subject to light condensation. Provides a simple and quick method of stress relieving on screened polymeric cables.

Up to 42 kV

6/10 (12) kV 6.35/11 (12) kV 8.7/15 (17.5) kV 12/20 (24) kV 12.7/22 (24) kV 18/30 (36) kV 20.8/36 (41.5) kV

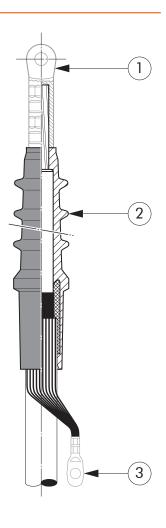

Design

Indoor termination comprising:

- 1. Cable lug (not included in the standard kit).
- High flexibility silicone rubber housing, allowing larger tolerances on cable insulation diameters, with integrated conductive rubber insert, providing stress relief.
- 3. Earthing lug (not included in the standard kit).

Specifications and standards

Meets the requirements of CENELEC HD 629.1 and IEC 60502-4.

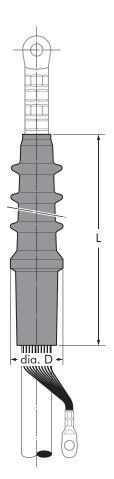

Termination type	Voltage Um	Conductor sizes (mm²)			
lype	(kV)	min.	max.		
AIN 10	12	25	1000		
AIN 20	24	35	1000		
AIN 30	36	50	800		
AIN 36	42	150	800		

Kit contents

A kit always comprises
3 termination housings,
installation instructions, special
lubricant, wiper, adhesive tape,
field control mastic, ...
Cable lugs and earthing
lugs are not included in the
standard kit, but can be
ordered separately.

Ordering instructions

Select the part number corresponding to both the system voltage and the cable dimensions in mm.

Example:

A set of 3 indoor terminations for a 24 kV - 240 mm² stranded aluminium cable with copper wire screen without cable lugs. The diameter over core insulation is 30.4 mm.

Order a 3 x AIN 20-2-H termination kit.

For use with copper wire screened cables.
No earthing device is necessary.

For use with copper tape screened cables. Order: -/MT.

For use with three-core cables. Please contact our representative.

For use with other cable types.
Please contact our representative.

Can be supplied with all common types of cable lugs.

No heating or flame is required.
