INTRODUCTION

The BURNDY® WEJTAP™ System components are designed to provide the most reliable connections available, with safer and easier installations.

The system consists of a WEJTAP™ connector, WEJTAP™ installation tools and power-boosters.

The detailed information on power-boosters, installation tools and accessories follows.

The BURNDY® WEJTAP™ connector uses an aluminum alloy wedge that is power-driven between the run and tap cables locking them into a “C” shaped aluminum alloy spring-body.

A wiping action takes place during installation between the conductors and Wedge which provides additional cleaning of surface oxides to supplement wire brushing. In addition, the contact grooves are lined with a patented PENETROX™ oxide inhibiting compound to enhance superior contact surface integrity.

The Wedge is automatically locked onto the spring-body by a skiving action produced by a lance located at the forward end of the installation tool.

During the life of the connection, the spring-body continues to maintain pressure to ensure a reliable connection.

THE WEJTAP™ CONNECTOR

- Tested to NEMA and CSA Class A heat cycle requirements to ensure long term reliability.
- Accommodates a full range of run and tap conductors from #8 to 1590 ACSR in all commonly used conductors to meet the needs of electrical distribution systems.
- Color-coded connector, boosters, and tools to assist the installer to make the correct selection.
- “Run locator” chamfer is machined into the Wedge at the end of the “large” groove to provide positive visual or/and hand contact identification of the large run groove for correct installation.
- Removable design allows tap removal with minimum conductor damage.
- Tool embosses BURNDY® identifier on end of Wedge to provide system identification.

Ask about our unique WEJTAP™ Tool System and Power-Booster which provides safer and easier installations.

BURNDY WEJTAP™

CONNECTION SYSTEM

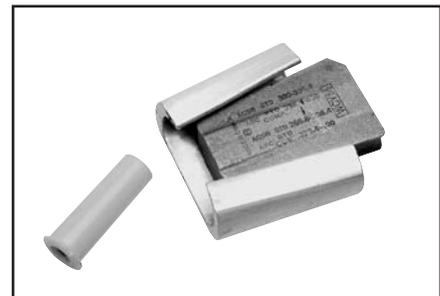

BURNDY®, a leading manufacturer of quality electrical connectors for over 70 years, introduces the WEJTAP™ SYSTEM, a system that adds further dimension to the existing BURNDY® group of proven, reliable connection systems.

WEJTAP™ COMPONENTS are designed to provide a reliable system connection. The system consists of WEJTAP™ connectors, installation tools (including a variety of hotline and lineman accessories) and a unique power-booster.

WEJTAP™ CONNECTORS use an aluminum alloy wedge that is power-driven between the run and the tap cables locking them into a “C” shaped tempered aluminum alloy spring-body. The spring-body maintains consistent pressure throughout the life of the connection to ensure reliability during severe electrical and climatic conditions. The wedge’s wiping action combined with factory installed PENETROX™ PENA 13 provides superior contact integrity. The wedge is automatically locked onto the spring-body by a skiving action produced by a lance at the forward end of the WEJTAP™ installation tool.

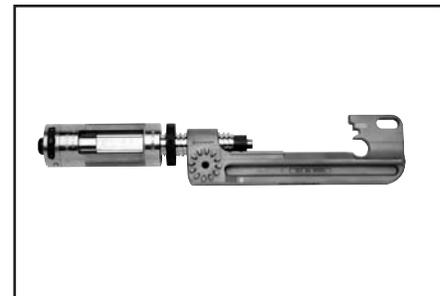

THE WEJTAP™ TOOL is a one-piece assembly that consists of a head and power unit. Two color-coded interchangeable heads accept all WEJTAP™ connectors and STIR-RUP™. The design of the tool recognizes the need for simplicity and speed of operation as well as outstanding safety features such as automatic gas release vented away from the operator, fast simple breech loading and fast advance when engaging the connector assembly. No loose parts to drop or misplace and a booster ejection system that provides further safety to the operator. Fewer simplified hotline devices and handy lineman accessories complete an outstanding tool package.

THE WEJTAP™ POWER-BOOSTER Patented is a self-contained device that provides the force necessary to drive the wedge into direct contact with the conductors. The booster is activated only when properly positioned in the tool assembly. A power cell in the booster is recessed to guard against premature discharge. The tool/booster system is designed to activate and deactivate the booster automatically should the operator decide to remove the tool from a connector prior to completing the installation. The deactivated booster may be safely removed from the tool.

Features and Benefits

- Large conductor chamfer on ends of wedge.
 - ◇ Instant hand or visual identification of large run grooves. Ensures correct wedge orientation.
- Color-coded WEJTAP™ connector and booster packaged together.
 - ◇ Easy selection by installer.
- Factory coated grooves with PENETROX™ PENA 13.
 - ◇ Maintains low contact resistance, assists in protection against climatic conditions and is compatible with common insulations.
- One-piece tool.
 - ◇ No project delays due to dropped or lost parts.
- Fewer and improved hotstick accessories
 - ◇ Simplifies hotline installation and saves time.
- Contained booster ejection system.
 - ◇ Safe for operator guards against the booster being ejected in direction of the installer.
- Automatic gas release vented away from operator.
 - ◇ Eliminates manual gas venting and improves safety.
- Simplified loading.
 - ◇ Speeds installation—no threads—just depress safety bar, twist and pull open—load—push and twist to close prior to applying connector.
- Acme-type threads.
 - ◇ Provides smooth, fast engagement of tool and connector-saves installer's time.

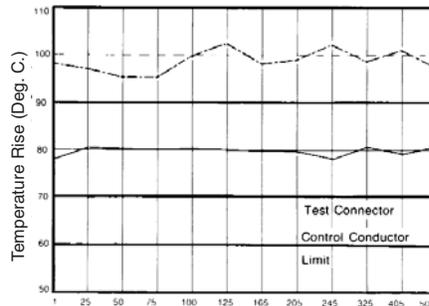

WEJTAP™ AND TEST DATA

WEJTAP™ connectors have been subjected to extensive tests simulating the most severe service and weather conditions. In addition, the WEJTAP™ system meets or exceeds the industry standards of ANSI C119.4 Class 3, NEMA CC3 1973 Class A 500 Heat Cycles.

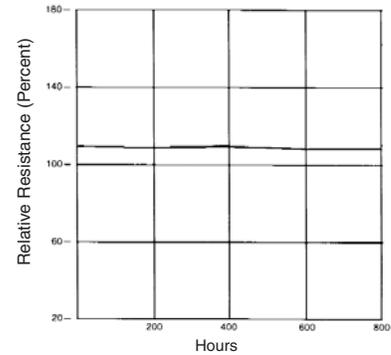

As with all BURNDY® connectors, the WEJTAP™ has been designed to operate cooler than the attached conductors. The WEJTAP™ connectors have also been subjected to the ASTM B117-73 Salt Spray Test. The results are shown to the right.

ANSI C119.4 - 1986 Heat Cycle Test
Average Temperature Rise vs. Current Cycles

Detailed test report packages are available upon request.

ASTM Salt Spray Test
Average % Relative Resistance vs. Hours of Salt Spray Exposure

WEJTAP™

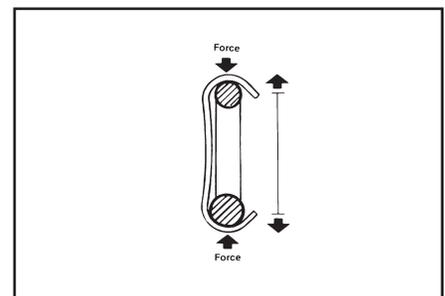

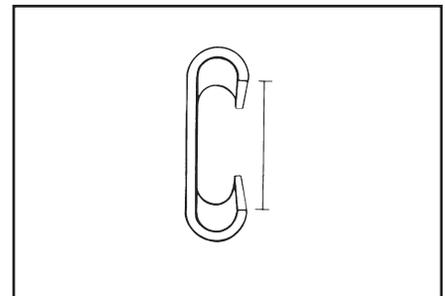

Spring-bodies are color-coded and the wedges are marked with nominal conductor run and tap ranges. WEJTAP™ connector packages are labeled with a variety of common conductors with their nominal ranges.

- WEJTAP™ connector wedges are marked with nominal ACSR, Aluminum and Copper concentric standard conductors.
- Red WEJTAP™ connector range Run 8-1/0 Tap 8-2
- Blue WEJTAP™ connector range Run 2-300 Tap 6-300
- Yellow WEJTAP™ connector range Run 266.8-1590 Tap 6-1590

All WEJTAP™ wedges contain a clearly defined chamfer on the large end of the run conductor groove to identify the “large run” groove. Installers will appreciate the convenience of visual or hand identification for correct wedge positioning.

WEJTAP™ wedges are driven between the run and tap conductors and activate the spring characteristics of the “C” shaped body. This action maintains contact pressure even when the connection is subjected to severe climatic and electrical conditions.

RUS Accepted

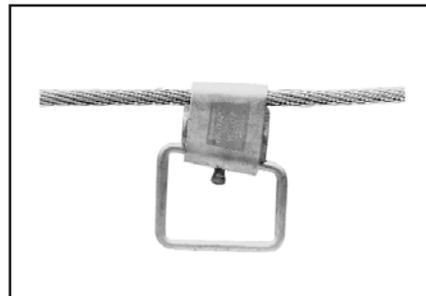

ALUMINUM WEJTAP™ CONNECTORS

The WEJTAP™ CONNECTOR SYSTEM provides TAPS, STIRRUPS and COVERS, conductor ranges #8 through 1590. Tap stirrup conductor ranges #6 - 1033.6.

TAPS WEJTAP™ connector ranges are divided into three color-coded groups.

	RUN	TAP
RED	8-1/0	8-2
BLUE	2-300	6-300
YELLOW	266.8-1590	6-1590

STIRRUPS™ are available from #6 through 1033.6 nominal conductor ranges. Tinned copper bails are permanently attached in sizes 2, 1/0, 2/0, 4/0 to provide a rugged "Hot Tap" connection point.

COVERS are installed on WEJTAP™ connectors to prevent them from coming in contact with other taps or exposed ground points. The WEJTAP™ covers are rugged snap-on devices available in four sizes to cover all connector sizes, and are cold weather tested for easy installations.

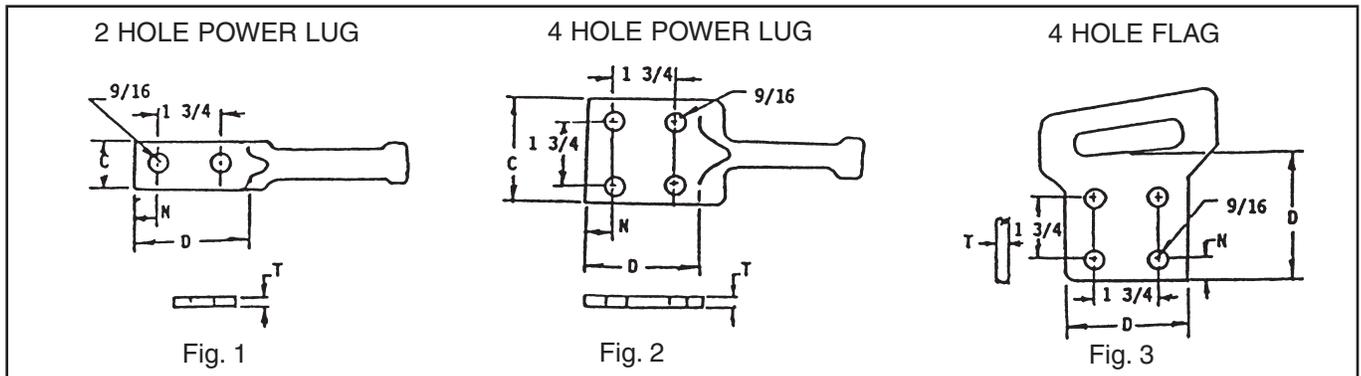

SAFETY FEATURES

- Contained booster ejection system that guards against potential hazard of spent boosters being ejected at installers.
- Automatic gas release vented away from the operator eliminates manual venting toward the operator.
- Power-boosters can only be activated when properly positioned in the tool and engaged on the connector. Power-boosters are automatically deactivated should the operator decide to remove the tool from the connector prior to completing the installation. The deactivated booster may be safely removed, all to provide a safer tool for your line personnel.

WEJTAP™ POWER LUG

WEJTAP™ POWERLUG™ terminals are made of cast aluminum alloy for termination of ACSR and Aluminum conductors.

WCCLY	Large (Yellow)	556.5 - 1033.5	556.5 - 1033.5	

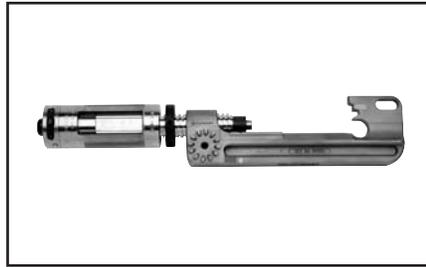

WEJTAP™ INSTALLATION TOOLS

Patented

Type WTRB

WEJTAP™ tool assembly with small head for small and medium range taps - #8 through 350 kcmil and stirrups.

Type WTY

WEJTAP™ tool assembly with large head for medium and large range taps - 336.4 through 1590 kcmil ACSR, and stirrups.

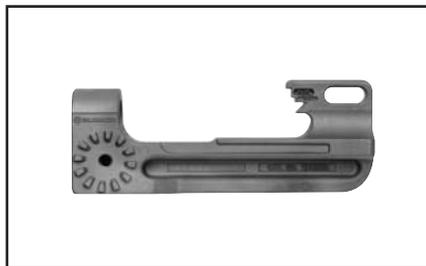

Type WTB

WEJTAP™ tool body one-piece assembly basic drive mechanism used to install WEJTAP™ connectors and STIRRUPS range - #8 awg through 1590 kcmil ACSR.

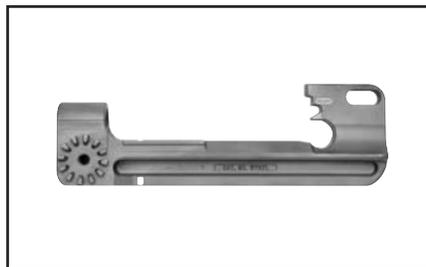

Type WTBGBW

WEJTAP™ self firing tool body. Used to install WEJTAP™ connectors and stirrups. Utilizes a self firing actuator for use with hotsticks.

Type WTHRB1S

WEJTAP™ tool head operating platform for small and medium range (red/blue coded) connectors.

Type WTHY1S

WEJTAP™ tool head operating platform for medium and large range (yellow coded) connectors.

WEJTAP™ INSTALLATION TOOL ACCESSORIES

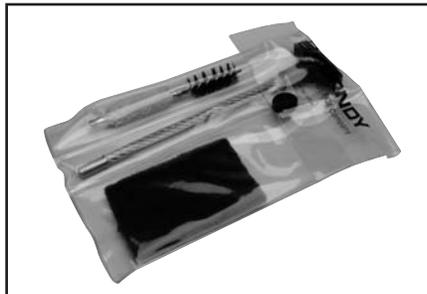

Type **WTOCBR**

WEJTAP™ removal clip for red type II and medium (blue coded) tap connectors used with type WTHRB tool head.

Type **WTOCY**

WEJTAP™ removal clip for large (yellow coded) tap connectors used with type WTHY tool head.

Type **WTCK**

WEJTAP™ tool cleaning/maintenance kit for use with type WTB tool body.

WEJTAP™ HOTSTICK TOOL

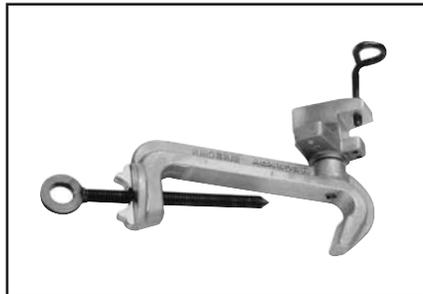

Type **WTBGBW**

WEJTAP™ Self firing tool body. Used to install WEJTAP™ connectors and stirrups. Similar to Type WTB tool except utilizes a self firing actuator for use with hotsticks.

WEJTAP™ HOTSTICK ACCESORIES

F-30

Type **WHSCWH**

WEJTAP™ hotstick connector clamp used to hold the tap connector spring-body and wedge for installation on energized lines with the shotgun hotstick.

Type **WHSPBC**

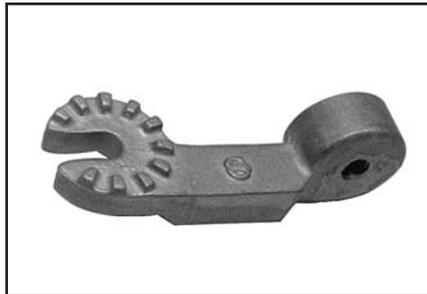

WEJTAP™ hotstick dual cable clamp used to hold run and tap conductors in position during hotline installation. Universal for all applications from #8-1272 ACSR.

WEJTAP™ HOTSTICK ACCESSORIES

Type **WHS90ADP**

WEJTAP™ hotstick angle adapter used to attach tool to universal hotstick for hotline installation.

Type **WHSWHADP**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation.

Type **WCHAWAS**

WEJTAP™ hotstick angle wedge holder adapter attaches wedge clamp to universal hotstick for hotline installation with shotgun stick.

Type **WHSTA**

WEJTAP™ hotstick tool (actuator) hammer attaches to the universal hotstick for striking the tool actuator button to complete the installation.

Type **WHSWB**

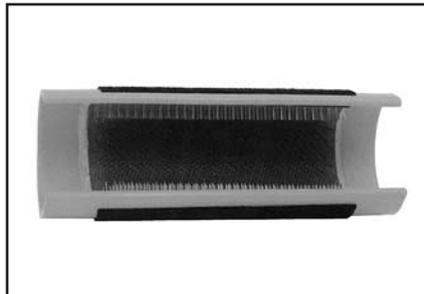

WEJTAP™ hotstick wirebrush attaches to the universal hotstick for cleaning the contact surface of the line conductor.

WEJTAP™ HOTSTICK ACCESSORIES (Continued)

Type WHSGB

WEJTAP™ hotstick breech drive. Geared shotgun hotstick adapter easily latches to the breech end of WEJTAP installation tool without disassembly for use on energized lines.

Type WHHWB

WEJTAP™ hand-held wire brush for cleaning surface contact areas on non-energized conductors.

WEJTAP™ KITS

**TYPE WTCC
(Carrying Case Only)**

WEJTAP™ plastic carrying case. Designed for rugged use in all weather conditions. It accommodates WEJTAP™ installation tool, removal clips, and cleaning kit.

Type WABAG

WEJTAP™ accessories bag is designed for use in carrying installation tool(s), removal clips, and cleaning kit. Hotstick accessories may be accommodated as well. Holders for power boosters are conveniently located on the outside of the bag.
