Resin Features & Benefits

MPJ Series Low Voltage Cable Joining Kits

- > For cables with copper conductors
- > Prysmian's cast resin straight joints are the ideal method for joining polymeric industrial cables where crimped connectors are required.
- > The low voltage cable joining kits are manufactured with two types of shell design. A clear injection moulded version for smaller cable sizes, and a high impact styrene design to cover the larger ranges.
- > A lightweight two-part easy flow polyurethane resin is provided as standard, suitably packed in a foil laminated sachet offering a completely enclosed resin mixing system.
- > MPJ 1, 2, 3 and 4 use injection moulded shells
- > MPJ 5, 6, 7 and 8 use high impact styrene shells (HIPS)
- > Armour bonds included
- > Tested and approved to BS EN 50393 & ENA ER C81
- > "Twin Pack" totally enclosed mixing
- > Enhanced adhesion to XLPE and PVC
- > Improved flow characteristics
- > 40% reduction in weight
- > Easier mixing
