

Richard Mason

EHV cable jointer / Client Rep AVAILABLE for onshore & offshore work upto 132kv

Experience

EHV Cable Jointer / Client Rep at GCS Jointing Global Cabling Services Ltd

March 2015 - Present (4 months)

March to May for: Dynamo Electrical (Siem Offshore Contractors) Baltic 2 as Supervisor / Tester / Lead Jointer May to Present for: Approved Power Services (General Cable) Legacy-Oswestry Reinforcement Project as Site Manager

EHV Cable Jointer at Balfour Beatty Utilities

October 2005 - March 2015 (9 years 6 months)

Duties include lead jointer/supervisor up to 132kv cables and providing support for jointers on higher cables. As a team we are responsible for constructing and maintaining both oil filled and XLPE cables for Faults and Services, and Contract work. Working completing high voltage cables work on a variety of different projects with different clients/companies in a wide range of environments. The varied projects worked on include completing varied voltage requirements and constructing diverse ranges of joints for projects on the railways, substation and high pressure pipe systems. Off shore work includes The Links project; repairing 132kv subsea cables and the Baltic 2 project; pulling cable, terminating and VLF testing ready to hand back to client. Gained experience working within a team, as an individual and as a team leader. Responsible for implementing/following Health and Safety and quality regulations and procedures throughout works. Experienced in completing site records, daily interfacing with the clients, local authorities and general public and working under different disciplines.
