

Power

Power - class 2

Complies with ENATS 12-24 Class 2, 450N at 50°C.

Complies with BS EN 61386-24 750N, normal duty impact.

Ridgiduct power

Ridgiduct is a twin wall system, specifically engineered to provide a light, yet robust, alternative to conventional cable protection. Ridgiduct is manufactured in HDPE and the resulting stiff, yet flexible, twin wall structure easily outperforms alternative products. Complementing the Ridgiduct range are a selection of twin wall long radius drawn bends, manufactured in HDPE. These are available in most sizes and a range of angles.

ENATS
(12-24)

Key Benefits

- Complies with ENATS 12-24 Class 2 specification
- Complies with BS EN 61386-24
- A preferred choice of regional electricity companies
- Integral coupler
- Low weight, flexible, durable and high strength
- Good impact resistance, even at low temperatures
- Available in an alternative twin wall split duct form for easy installation around existing cables with minimal change in strength

Ridgiduct Power ENATS 12-24 (Standard sizes)
