IN STAINLESS STEEL:

- Compact enclosures
- Enclosures and support arm systems for the human/machine interface
- Large enclosures

RITTAL – SYSTEM PARTNERS

Perfect holistic solutions

Be it automation, communications or power supply technology, Rittal offers the right enclosures and cabinets to suit virtually all requirement profiles in modern industrial engineering. As you would expect, the range is also available in stainless steel with extremely high specifications on hygiene and corrosion resistance.

Ingeniously designed system platforms in conjunction with an extensive range of system accessories provide the basis for the exceptional solution diversity of the Rittal stainless steel range. Allow us to advise you. We are happy to work to your requirements.

Global customer proximity

Regardless of where your products are developed, manufactured or used, we are at your service.

Demand-oriented production

Fresh milk, new car paint, important medication; however varied the demands placed on stainless steel enclosures may be, we have the right solutions to accommodate them. What is more, we are constantly extending our expertise, by building on development work in close dialogue with our customers.

New to the range:

- Top enclosure system TS 8, see page 52 – 57
- Premium Panel, see page 30/31
- Plus a wide range of accessory components for optimum solutions.

Countless possibilities

The use of system accessories is the first step towards rational system integration. The second step is afforded by a broad range of modules for climate control, electronics, IT networks and power distribution. The result? Holistic individual solutions, which are both perfect and cost-effective.

OVERVIEW OF DIVERSITY

Quality for your success

You define your requirements
– Rittal has the solution!

The system diversity offered
by us is exemplary. It is the
cumulation of expertise gleaned from
countless discussions with customers.

The result? Fast, reliable solutions available
off the shelf, immediately – and assembled
ready for use upon request.

Quality is the key

... and at Rittal it is
constantly being improved,
thanks to on-going quality
assurance in our
accredited QA laboratory.

Work more effectively, easily and reliably

Success is down to the
individual. Rittal offers
effective support through
its products.

System integration included

The basic fittings of
every enclosure lend
themselves to a wide
range of external and
internal mounted parts.

INTEGRAL SYSTEMS

Meeting demands and cutting costs

With over 8,000 precision products available worldwide, Rittal is a superior systems supplier. The spectrum ranges from standardised mass production to customised individual solutions.

Our concept:

- Uniform system platforms
- Differentiated installation levels
- Cost-efficient versatility
- High standards of quality

All this from your one-stop suppliers. As competent system partners, we work with you to develop holistic solutions which are both perfect and cost-effective, tailored to your specific requirements.

IT solutions

- All components for data & communications networks.
- Also available for stainless steel cases and enclosures with 482.6 mm (19") and metric installation.

Power distribution

- From connection systems to isolators.
- Busbar systems in 40, 60, 100, 150 and 185 mm bar centre distance
- Systems up to 3200 amps.

Electronic systems

- MPS microcomputer packaging systems
- Subracks
- Cases for industrial PCs.

System climate control

- Integral cooling technology
- Roof- and wall-mounted cooling units
- Recooling systems
- Air/water heat exchangers
- Air/air heat exchangers
- Fan-and-filter units
- Rack-mounted climate control
- Heaters

System accessories

User-friendly

e.g. with system lights, socket strips, wiring plan lecterns etc.

Early warning...

Signal pillars – just one example of safety. We also offer a full range of lock and monitoring systems.

Modular solution diversity

Outstanding:
All enclosures from the TS 8 system platform offer infinite possibilities for interior installation.

PRODUCTION AND SERVICE

Meeting individual requirements

As global players, we boast many years of experience in international markets.

With 19 production sites, 42 subsidiaries and over 70 branch offices in 5 continents, we are always close at hand.

Customer proximity regionally and worldwide

Innovative production techniques at the Wissenbach stainless steel factory ensure a successful symbiosis between individual solutions and cost-effective, top-quality mass production. Stainless steel is a special material which demands the special expertise offered by our team.

Uncompromisingly high quality

At Rittal, quality is not defined by a one-off certificate, but is instead an on-going process. Every day, our products are put through their paces at our in-house laboratories. This includes EMC testing, climatic chambers, load tests, 3D measurement, dust testing and hosed water tests, as well as electrical safety testing.

Individual solutions – off the shelf

Particularly for customers who require small batches in individual sizes or cutouts in enclosure and case surfaces, laser technology covers all the options for cost-effective implementation of specific requirements.

Excellent benefits from standardised quality

Cost-effective products in an exemplary quality are the result of innovative mass production. For example, we have developed special techniques for shaping and welding. One outstanding example is the 16-fold profiled stainless steel section in the TS8 Top enclosure system, with its infinite installation possibilities.

PRODUCT COMBINATIONS

Ideas for new solutions

Leave the conventional path behind!
Combine standard products in a new way
to meet your requirements, and
significantly broaden the range of options
available. Here are just a few suggestions.

Example 1 Console with rotating operating housing

- Consisting of:
- Command panel housing with door, see page 34/35
 - Housing coupling, rotating, see page 37
 - Support section, see page 36
 - Wall/base mounting, see page 38
 - Wall console, see page 40
 - One-piece console, see page 42

Example 2 Enclosure attached to a machine

Consisting of:

- AE compact enclosure, see page 18/19
- With wall console, also suitable for cable entry, see page 40

Example 3 Mini operating unit

Consisting of:

- Terminal box KL, see page 14/15
- With support arm system, see page 36

Example 4 Enclosure combination

Consisting of:

- Electronic Kombi system EL, see page 22/23
- With bus enclosure BG, see page 16/17

Example 5 Mini operating console

Consisting of:

- Terminal box KL, see page 14/15
- Two enclosure attachments, see page 37
- Support section, see page 36
- Pedestal base plate, small, see page 41

Industrial Workstations IW

Outside of the Rittal stainless steel enclosure range, this is an example of solution diversity with the most varied product combinations. Take a look at the IW brochure, and allow yourself to be inspired with new solutions from this modular system.

COMPACT ENCLOSURES

Like the entire stainless steel range, our small and medium-sized models are ideal for all segments of industry with superior demands in terms of hygiene and corrosion protection.

They offer the correct volume to suit every requirement, together with practical fittings and accessory components for every application.

Rittal always has the solution you need. Every design innovation helps to save your valuable time, whilst every standard mounting part helps to cut costs.

Terminal boxes KL

- Screw fastened lid
- Integral profile strip with mounting holes for top-hat rails or mounting plate
- Enclosure sealed all-round

* Extended delivery times.

To order Electronic Kombi systems EL in 1.4401 (AISI 316), change the last three digits of the Model No. to .300, and for 1.4571, change to .400.
Delivery times available on request.

Front centre part with vertical 482.6 mm (19") mounting angle and horizontal punchings on a 25 mm pitch pattern.

Rear centre part with all-round punchings on a 25 mm pitch pattern.

Cam lock in base box.

Accessories:

see page 22
and page 70/71
or refer to index.

Material:

Front door, centre part,
wall component:
1.5 mm stainless steel 1.4301
Viewing window:
4 mm safety glass
Mounting angles:
1.5 mm stainless steel 1.4016
Mounting plate:
Sheet steel 3,0 mm
Lock:
Stainless steel 1.4301

Surface finish:

Stainless steel 1.4301:
Brushed, grain 240
Mounting plate: zinc-plated

Protection category:

IP 55 to EN 60 529/10.91

Wall mounting bracket

Permits cable routing behind the enclosure.
See page 26.

Blanking plates

In various heights, horizontally or vertically hinged.
See Cat. 30, page 1036.

ACCESSORIES

Compact enclosures

Cam lock

Complete cam lock with double-bit insert for AE stainless steel enclosures (with cam lock).

Material:

Stainless steel 1.4301

Supply includes:

Assembly parts included

Packs of	Model No. SZ
1	2304.000

Semi-cylinder lock

For retrospective mounting on all single-door AE compact enclosures in stainless steel with cam lock. The cover plate is latched by semi-cylinders with a total length of 40 or 45 mm (to DIN 18 254). An extra cover protects the cylinder from dirt.

The protection category of the enclosure is not reduced.

Supplied without semi-cylinder.

Packs of	Model No. SZ
1	2534.500

Material:

Die-cast zinc, plated (matt).

German patent no. 195 12 280

US patent no. 5,916,282

Jap. patent no. 3.088.465

European patent no. 0778 913

with validity for GB, FR, IT

Lock cover

For padlocks and multiple locks.

For retrospective mounting on all single-door compact enclosures AE with cam lock.

Lug with 11 mm diameter hole for padlocks or multiple locks.

The protection category of the enclosure is not reduced.

Packs of	Model No. SZ
1	2493.000

Material:

Die-cast zinc, plated (matt).

Supply includes:

Lock cover
assembly parts included.

Accessories:

Multiple lock,
see Cat. 30, page 945.

Rain canopies for AE

Reliable protection for outdoor siting – with water run-off to the rear. Easily retrofitted.

Material:

Stainless steel 1.4301

Surface finish:

Brushed

Supply includes:

Including assembly parts

Note:

For outdoor siting, as a general principle, we recommend a rain canopy above the enclosure or above the gap between the door or screw-fastened rear panel and the enclosure, in order to protect against water and UV rays.

The tests of IP protection levels for water protection (2nd code digit to EN 60529) should not be applied to enclosures sited outdoors or in similar conditions.

Rain canopies for other enclosures available on request.

Accessories:

Condensate discharge, see Cat. 30, page 900.

Pole clamp

For reliable, convenient fastening to round or square poles.

For pole diameter/size:

Ø from 40 up to 190 mm

□ from 50 up to 150 mm

Material:

Cross rails, clamping section:

Sheet steel, zinc-plated

Clamping strap:

Stainless steel 1.4301

	Model No. SZ
Pole clamp	2584.000

Supply includes:

2 cross rails, 600 mm long,
4 clamping sections,
2 clamping straps,
4 clamping brackets,
4 screws and M8 nuts
for mounting on the enclosure.

German patent no. 36 10 152

ACCESSORIES

Compact enclosures

Wall mounting bracket

For fastening KL, EB and BG enclosures.

Material:
Stainless steel 1.4301

Wall distance	Packs of	Model No. KL

HUMAN/MACHINE INTERFACE

When it comes to ergonomics and user-friendliness, operating housings (particularly in conjunction with the support arm system), consoles and PC cases are capable of meeting the most discerning demands.

Machines with modern, flexible production technology need solutions at the operating interface which meet their requirements precisely.

These include rational enclosure population, versatile positioning of monitoring and control components, and high-quality controllers with an outstanding design.

Under the motto "Standardised, not customised", Rittal offers complete solutions to boost productivity at the interface between human and machine.

Premium Panel

- Screw fastened rear panel to meet discerning requirements in the food and hygiene sectors
- Support arm connection with reinforcement plate optionally at the top or bottom
- With keyboard housing on request
- Two duct connectors, also suitable for cable routing betw. the operating housing and keyboard housing
- All-round sealed enclosure, with designer front

----------------------	---	----------

* To order Premium Panel in 1.4401 (AISI 316) use Model No. CP 663X.XXX, in 1.4571 use Model No. CP 664X.XXX. Delivery times available on request.

Easy-to-clean exterior gasket.

Cable entry into the keyboard housing through the duct connectors to the operating housing.

Material:

Stainless steel 1.4301

Surface finish:

Brushed, grain 240

Protection category:

IP 69K to DIN 40 050-9/5.93

Rittal service:

Other dimensions or other housings with this sealing design available on request. Cutouts and holes to your specifications.

Accessories:

see page 70/71 or refer to index.

A new layout, a new concept for seal and fastener

- Safe for high-pressure cleaning (protection category IP 69K to DIN 40 050-9/5.93). Seal is between two surfaces and is compressed optimally through screw fastening (see detailed drawing).
- Screw fastening for high standards in the areas of food and hygiene. Internally with plastic bungs, external hex screw head.

- Best EMC conditions. Through the seal labyrinth, special EMC shielding is achieved in the housing.
- Internal rear panel holder. With regard to hygiene, this solution is clearly superior to external hinges.
- Two duct connectors between the enclosures.

The **rear panel holder** holds the rear panel in position when opened.

Model No. CP 6682.000

Support arm system

or refer to index.

Material:

Stainless steel 1.4301
Enclosure: 1.25 mm
Front panel: 2.0 mm

Surface finish:

Brushed, grain 240

Protection category:

IP 65 to EN 60529/10.91

Handle strips
Made of plastic, available on request.

Enclosure attachment
with pre-fitted screw for location purposes.
See page 37.

Connector gland
for 2 cables up to 8 mm diameter.
Model No. SZ 2400.300.
See Innovations 2002, p. 35.

Supply includes:

All-round sealed enclosure,
with cutout and reinforcement
for support arm system,
fastener with guide plate.

Door with sealing frame and side handle
strips.

Lock systems

Standard double-bit lock insert may be exchanged for 41 mm lock inserts, plastic handle and T handle, version C
see Cat. 30, page 940 – 942.

**To order operating housings in 1.4401 (AISI 316), please change the last three digits of the Model No. to .310, and for 1.4571, change to .410.
Delivery times available on request.**

* = Only with vertical attachment of punched rail 23 x 23 mm see Cat. 30, page 976.

PE conductor connection point in the door.

Cam with guide piece.

Support arm cutout with additional reinforcement plate.

Accessories:

see page 70/71
or refer to index.

Material:

Enclosure and door:
Stainless steel 1.4301
Handle strips: Plastic approved
for use with foodstuffs,
RAL 5002 (ultramarine blue)

Surface finish:

Brushed, grain 240

Protection category:

IP 66 to EN 60 529/10.91

Modifications:

- Separate keyboard housing
- Other sizes
- Modified support arm cutout or door hinge
- Holes and cutouts for switches and operator panels on request.

Semi-cylinder lock

For retro-fitting to stainless steel enclosures with cam lock. See page 24.

Cable fastening

screw-fastened. See Cat. 30, page 1010.

The alternative. AE stainless steel, rear door, support arm connection and handle strips available on request. See page 18.

SUPPORT ARM SYSTEM

Support arm system

In conjunction with special command panels, terminal boxes 120 mm deep and compact enclosures AE made from stainless steel, the support arm system is particularly well-suited to situations where corrosion protection and hygiene are paramount.

A tilting adaptor and housing coupling may optionally be mounted at the top or bottom of the enclosure. **They are not suitable for use as the base point of a system.** For such purposes, we recommend wall and base mountings or, for larger heights, an additional pillar made from steel tubing or stainless steel, available on request.

Load specifications

Jib length in mm (dimension B)	Permissible static load* (N)
500	800
1000	400
1500	250

* For a maximum dimension A and C of 800 mm

Material:

Stainless steel 1.4305

Support section

Seven standard items are available off the shelf, which can either be tailored to your individual requirements by sawing to length.

Material:

Stainless steel 1.4301

Surface finish:

Brushed, grain 240

Dimensions:

External diameter: 48 mm

Wall thickness: 3.6 mm

Weight:

4.3 kg/m

Straight

$A_{\min.} = 100 \text{ mm}$,

$A_{\max.} = 2000 \text{ mm}$

By special request, other sizes feasible per specification.

Order example:

U-bend = CP 6660.200

Dimension A = 300 mm

Dimension B = 800 mm

Dimension C = 240 mm

The minimum dimensions must be adhered to, because of the bending radius and immersion depth of the housing coupling or wall/base mounting.

A mm	Model No. CP
500	6660.050
1000	6660.010
2000	6660.020
per specification A =	6660.000*

L-bend

$A_{\min.} = B_{\min.} = 240 \text{ mm}$,

$B_{\max.} = 1500 \text{ mm}$

U-bend

$A_{\min.} = C_{\min.} = 240 \text{ mm}$,

$B_{\min.} = 410 \text{ mm}$,

$B_{\max.} = 1500 \text{ mm}$

A mm	B mm	C mm	Model No. CP
240	800	800	6660.210
240	500	500	6660.220
per specification A =	per specification B =	per specification C =	6660.200*

* Extended delivery times

Tilting adaptor, 10°

For mounting between operating housing and

- Enclosure attachment CP 6664.500
- or
- Housing coupling CP 6664.000

Material:

Stainless steel 1.4305

Weight	Model No. CP
0.7 kg	6664.100

Supply includes:

1 set =
1 tilting adaptor,
4 assembly screws,
1 seal.

Mounting cutout

Enclosure attachment

For rigid fastening of the enclosure to the support section.

Material:

Stainless steel 1.4305

Note:

For assembly of a modular, stainless steel pedestal 2 packs are required.

Weight	Model No. CP
1.0 kg	6664.500

Accessories:

Enclosure reinforcement,
see page 41.

Mounting cutout
for pedestal, bottom

Mounting cutout,
for enclosure

Housing coupling

For mounting on the vertical part of the support arm system, rotation range approximately 350°, lockable with knurled screw.

Material:

Stainless steel 1.4305

Supply includes:

1 set =
1 housing coupling,
2 assembly screws for support sections,
4 assembly screws for enclosure,
1 seal for support sections,
1 seal for enclosure.

Weight	Model No. CP
1.1 kg	6664.000

Accessories:

Enclosure reinforcement,
see page 41.

Mounting cutout
Enclosure

SUPPORT ARM SYSTEM

Wall/base mounting, rigid

For attachment of the support arm system to vertical or horizontal surfaces.

Material:
Stainless steel 1.4305

Supply includes:
1 set =
1 wall/base mounting,
2 assembly screws for support section,
3 adjusting screws,
1 seal for support sections,
1 seal for wall/base.

Weight	Model No. CP
1.6 kg	6663.000

+ Accessories:

Wall consoles,
see page 40.

Swivel base mount

For external mounting on

- Horizontal surfaces
- Wall consoles (only with CP 6663.500)

Rotation range approximately 350°, may be limited in 60° increments using the supplied plate and clamped with a knurled screw.

Material:

Stainless steel 1.4305

Supply includes:

1 set =
1 base mount,
2 assembly screws for support section,
1 seal for support section,
1 seal for surface or wall bracket.

Attachment	Weight	Model No. CP
M8 thread at rear	1.9 kg	6663.500
Front hole Ø 9 mm	2.1 kg	6663.400

Accessories:

Wall brackets for base mounting
CP 6663.500,
see page 40.

Mounting cutout

Mounting cutout

SUPPORT ARM SYSTEM

Wall bracket

- With holes for mounting
- Swivel base mount CP 6663.500 with 4 screws
 - Wall/base mounting, rigid, CP 6663.000 with 4 screws and nuts, including seal to the vertical surface and an additional seal for replacement when mounting CP 6663.000.

Attachment	Weight	Model No. CP
M8 thread at rear	1.5 kg	6665.000
Front hole Ø 9 mm	1.8 kg	6665.500

Material:
Stainless steel 1.4301

Surface finish:
Brushed, grain 240

Example: CP 6665.000 + CP 6663.000

Rear fastening

① = Hole for CP 6663.000
② = Hole for CP 6663.500

Mounting cutout

Front fastening

① = Hole for CP 6663.000
② = Hole for CP 6663.500

Mounting cutout

Pedestal, modular, small

For configuring compact operator stations.

Can be assembled from the following modules:	Model No. CP	Page
(A) Enclosure reinforcement	6143.310	41
(B) Enclosure attachment top	6664.500	37
(C) Support section, straight (can be shortened by cutting off individual lengths)		
500 mm	6660.050	36
1000 mm	6660.010	36
2000 mm	6660.020	36
(B) Enclosure attachment bottom	6664.500	37
(D) Pedestal base plate, small	6143.300	41

Enclosure reinforcement

For exterior or interior reinforcement of enclosures of the appropriate size. Smaller enclosures may also be installed directly without a flange.

For use with

- enclosure attachment CP 6664.500
- housing coupling CP 6664.000

Material:

Stainless steel 1.4301

Surface finish:

Brushed

Supply includes:

Including assembly parts for the enclosure and support section plus 2 seals.

Packs of	Model No. CP
1	6143.310

Accessories:

Enclosure attachment CP 6664.500, see page 37.
Housing coupling CP 6664.000, see page 37.

Pedestal base plate, small

With reinforcement bracket for assembling a stainless steel support section via an enclosure attachment.

- With one hole at the rear for commercially available cable conduit gland M20.
- With two holes at the top (incl. sealing bungs) for lower base attachment cross member.
- Prepared on the inside for a cable clamp DK 7077.000 or DK 7078.000 for strain relief.

Material:

Stainless steel 1.4301

Surface finish:

Brushed

Supply includes:

Assembly parts for enclosure attachment plus seal.

Note:

Commercially available screws up to M8 may be used for floor mounting.

Packs of	Model No. CP
1	6143.300

Accessories:

DK 7077.000 or DK 7078.000 cable clamp see Cat. 30, page 981.

AP 2685.600 / AP 2686.600

① = No hinge for AP 2685.600

AP 2683.600 / AP 2684.600

② = No hinge for AP 2683.600 / AP 2684.600

Supply includes:

Enclosure, closed back and sides,
door or double door at the front, with rod
type lock console lid with lid stay and
stainless steel cam lock internally latched,
two-part gland plate,
zinc-plated mounting plate.

ACCESSORIES

Human/machine interface

Mobile PC workstation

for Tower PC, printer, USB, Server, etc.

Option of installing in 600 mm wide enclosures, 600 mm deep.

Load capacity:

75 kg

Material:

Sheet steel

Colour:

RAL 7035

Supply includes:

Mobile workstation consisting of:
1 support frame,
2 shelves, top/bottom,
1 set of telescopic slides,
1 handle,
1 cable support, hinged,
mounting accessories.

Packs of	Model No. PC
1	4641.000

Also required:

Punched sections with mounting flanges, punched sections without mounting flanges, see table.

Accessories:

Fastening bolts DK 7115.000, see Cat. 30, page 993.

For enclosure depth mm	For installation in	
	TS 2 punched sections with mounting flanges, see Cat. 30, page 974	ES, PC 2 punched sections without mounting flanges*, see Cat. 30, page 977

* plus

4 support brackets PS 4183.000, see Cat. 30, page 979,
8 threaded blocks M6 PS 4162.000, see Cat. 30, page 982,
8 screws M6 SZ 2504.500, see Cat. 30, page 981.

Shelf

for PC workstation

To accommodate additional equipment such as modems, power packs etc. or simply as a paper tray.

The shelf may be mounted to the workstation with height adjustment on a 25 mm pitch pattern.

Material:

Sheet steel

Colour:

RAL 7035

Packs of	Model No. PC
1	4642.000

Supply includes:

Shelf including assembly parts.

Accessories:

Fastening bolts DK 7115.000, see Cat. 30, page 993.

Keyboard drawer

For a maximum keyboard width of 500 mm. Drawer with mouse pad at the front. Includes assembly material for attaching to universal console AP 2688.600.

	Model No. AP
Keyboard drawer	2691.000

Material:
Stainless steel 1.4301

Surface finish:
Brushed

Desk section

Solid sides and front, cover plates for top and bottom. May be attached with either the inclined or straight edge on top, by rotating through 180°. Includes assembly material for attaching to universal console AP 2688.600.

	Model No. AP
Desk section	2690.000

Material:
Stainless steel 1.4301

Surface finish:
Brushed

i.L. = Clearance width

For ES, PC

For TS

Component shelf, static installation

To match the enclosure depth, for direct mounting in the vertical system punchings. Simply locate into 4 prefitted screws and secure.

Load capacity:
50 kg

Material:
Sheet steel 1,5 mm

For ES, PC, colour RAL 7035

For enclosure depth*	Model No. PC
620 mm	4619.660

For TS, colour RAL 7015

For enclosure depth*	Model No. PC
600 mm	8800.900

* Enclosures without mounting plate.

Component shelf, pull-out

For direct attachment on the enclosure frame. Additional punched sections are not required.

Material:
Sheet steel

Colour:
RAL 7015 (slate grey)

Load capacity:
40 kg

For depth mm	Model No. IW
600	6902.960 ¹⁾

¹⁾ May also be mounted in 800 mm deep enclosures based on TS (without mounting plate) (rear attachment extendible).

Supply includes:
Component shelf with 2 telescopic slides (supplied loose).

LARGE ENCLOSURES

Rittal has shaped and revolutionised the range of benefits afforded by large enclosures with constant innovations.

Whether used as a free-standing or a bayed enclosure, these systems offer the maximum in usable space. All this, plus excellent solution diversity with system accessories.

The integration e.g. of climate control components and system preparations for electronics make TS and ES enclosures ideally suited to demanding IE and IT applications. Here too, system integration is based on the modular approach.

Standard modules, rather than customisation, offer infinite solution diversity, coupled with astonishing time and cost savings.

TS 8 baying systems

- Frame structure made from solid sections with 25 mm system punchings
- Lockable door with four-point lock and four hinges (130°), adjacent door with separate latching top and bottom, four hinges (130°)
- Potential equalisation via the assembly components with:
 - Roof plate
 - Rear panel with 8/10-fold screw fastening
 - Three-piece gland plates
 - Depth-adjustable mounting plate

Free-standing enclosures ES 5000

- Enclosure sealed at the sides and top, with 25 mm system punchings
- Lockable door with three-point lock and three hinges (130°), adjacent door latched via lockable door, three hinges (130°)
- Rear panel with 6/8-fold screw fastening
- Three-piece gland plates
- Depth-adjustable mounting plate

TS 8 – the Rittal Top enclosure system now available with more variation options with standardised components. This variability is the key to perfect, individual solutions and is outstanding value for money. This is why the TS 8 in stainless steel is technically and economically the answer for all industries that demand corrosion protection and hygiene.

The sum of these useful ideas is ri-revolutionary.

- The core of the TS 8 is the vertical section. It is the focal point of a new dimension of usability.
- Considerably more interior space, more effectively used with its two-level concept.
- More options with fewer parts with symmetry on all sides.
- Open on all sides: each of the four TS vertical sections can house the hinges for a door.
- Enclosures can be bayed to the left, right, front, back, around corners, and when needed top and bottom.

More space and infinite possibilities with the two-level concept!

Outer level: up to 15% more space.

Inner level: more options with the classic enclosure mounting surface.

Ingenious: Installation is feasible on both levels simultaneously. The space gained offers a lot of room for creative ideas, e.g. separate cable entry or new options for climate control.

The TS 8 savings concept

- Save time through simplification in installation.
- When installing, save through more options with fewer parts.
- Automatically save through standard, integral features.
- Save through versatile components.
- Save through symmetry. Symmetry makes many things easier, from planning to installing equipment.
- Save through security, because risk minimisation is an important factor in cost-effectiveness.

Each detail, a clever solution!

The integral channel above the seal on the horizontal frame section prevents liquid from collecting on the seals and penetrating the door or side panel when opened. Between bayed enclosures, the cover provides additional protection.

Perfect locking!

Optimum closure of the door is achieved via four locking points. The self-locking mechanics of the comfort handles are protected against accidental opening, such as, from vibration.

The adjacent door of double-door enclosures is secured through additional bolts on top and at bottom with interconnecting rods and handle from the middle outward. Accidental opening of a heavily equipped adjacent door, such as with a cooling unit, is prevented. The lock system of the primary door is identical with single-door enclosures.

Cable entry: fast and sealed!

For cables up to 47 mm diameter, the cable entry plates in conjunction with the cable entry grommets offer an ingeniously simple and especially well sealed cable entry.

A model no. for the **base/plinth components** front and back.

A model no. for the **base/plinth trim pieces** at the side.

A complete **base/plinth**.

The modular base/plinth design with added-value!

Fewer parts, more options, lower costs! The modular base/plinth design simply offers more: Cable entry variants for individual and bayed enclosures, cable clamping and routing as required.

Unlimited possibilities

Rittal offers a unique "Modular System" for accessories. Mechanical installation as well as equipment with many useful components is especially cost-effective and can be implemented rapidly.

Mounting plate

Detail drawing
see page 56/57.

Supply includes	Material	Surface finish
Enclosure frame	Stainless steel 1.4301	Bare
Door(s)	2.0 mm	Exterior brushed, grain 240
Roof	1.5 mm	
Rear panel	1.5 mm	
Mounting plate	3.0 mm (sheet steel)	Zinc-plated
Gland plate, three-part	1.5 mm	Bare
2 depth stiffening supports (PS 4696.000, see Cat. 30, page 975) mounted in enclosure depth (only for 600 mm).		
Protection category IP 55 to EN 60 529/10.91, complies with NEMA 12

Lock systems

Standard double-bit lock insert may be exchanged for other inserts and comfort handle, see page 68.

* Packs of 4

To order enclosure in 1.4401 (AISI 316) use extension no. 300, in 1.4571 use extension no. 400. Delivery times available on request.

Mounting plate, zinc-plated, C fold at sides, depth-adjustable on the 25 mm pitch pattern.

Solid frame sections, punched on a 25 mm pitch pattern for universal interior installation. Vertical stays for two mounting levels.

For a reliable IP protection rating – adjacent door with top and bottom bolts as well as interconnecting rods with four bolts. Operated with the handle.

Accessories:

see page 62 – 69
and page 70/71
or refer to index.

Note:

Because of the material hardness, for component installation we recommend using the Torx screw SZ 2486.300, see page 67.

Cable duct
For direct assembly on the vertical enclosure profile.
See Cat. 30, page 964.

Baying cover
Keeps the seal free from liquids and dirt.
See page 67.

TS punched section with mounting flange 23 x 73 mm
with punchings on all sides for captive nuts/threaded blocks.
See Cat. 30, page 974.

Base/plinth attachment: B4 x T2

Base/plinth attachment: B4 x T2

i.L. = Clearance width

Note:

With fitted side panels, the overall width (B1) is increased by 9 mm.
Between bayed enclosures, allow 3 mm for the seal.

To order enclosures in 1.4401 (AISI 316), please change the last three digits of the Model No. to .300, and for 1.4571, change to .400.
Delivery times available on request.

FREE-STANDING ENCLOSURES ES 5000

Door with rectangular frame, slotted.

Enclosure with twin rows of holes in all 3 dimensions.

Mounting plate with slide block to guide runner.

Accessories:

see page 62 – 69
and page 70/71
or refer to index.

Material:

Stainless steel 1.4301
Enclosure: 1.8 mm
Door: 2.0 mm
Rear panel: 1.5 mm
Mounting plate:
Sheet steel 3.0 mm

Surface finish:

Enclosure, rear panel and
doors: Brushed, grain 240
Mounting plate: Zinc-plated

Protection category:

IP 56 to EN 60 529/10.91
(for all single-door ES),
IP 55 to EN 60 529/10.91
(for all double-door ES),
Complies with NEMA 12

Mounting plate

Also suitable for components
outside of the 25 mm pitch
pattern of holes.
See Cat. 30, page 978.

Signal pillars

Simple contact using bayonet
connectors.
See Cat. 30, page 1000.

Stainless steel viewing

window. Reliable protection for
installed components in
stainless steel enclosures.
See page 69.

Mounting plate

- F = overall width
- G = overall height

Large enclosures

Material:

Stainless steel 1.4301

Surface finish:

Brushed

Mounting accessories including 4 screws
and M12 nuts for fitting to the enclosure

* Corner piece with removable trim,
for mounting optionally on the front or
rear.

+

+ **Accessories:**

Trim panels, modular
(perforated plate),
see page 64.

Installation between the base/plinth components front and rear. For 200 mm height two 100 mm base/plinth trim pieces can be used. Base/plinth trim pieces (100 mm high) can be installed rotated 90° to stabilise bayed base/plinth components.

Material:

Stainless steel 1.4301

Surface finish:

Brushed

Supply includes:

1 set = 2 base/plinth trim panels including material for attaching the base/plinth components.

+

Accessories:

Attachment bolts for base/plinth,
see page 64.
Leveling feet, see page 64.

Also required:

Base/plinth baying brackets TS 8601.100,
see Cat. 30, page 881,
for installation of base/plinth trim
components rotated by 90°.

Description of the hole pattern

B1/T1 = External dimensions

B2/T2 = For screw fastening in the thread of the enclosure corner piece from below

B3/T3 = For screw fastening via captive nut on the enclosure floor from below or above

All holes (B2 – B4/T2 – T4) can be used for screw fastening on the floor.

Base/plinth components front/rear						Base/plinth trim, side

Complete base/plinth

Consisting of:
Trim panels front and rear (for height 200 mm with corner pieces and removable trim panel on one side), and removable trim panels.

Material:
Stainless steel 1.4301

Surface finish:
Brushed

Supply includes	Height	
	100 mm	200 mm
Corner pieces	–	2*
Trim panels front/rear	2	2
Trim panels, side	2	4

Assembly parts including 4 screws and captive nuts M12 for mounting on the enclosure.

* Corner pieces with removable trim panel, to be mounted optionally at the front or rear.

Accessories:

Levelling feet, see page 64.
Trim panels, modular, see page 64.

Base/plinth for ES/PC/AP

For enclosures		Model No. SO

Base/plinth 100 mm high

Base/plinth 200 mm high

ACCESSORIES

Large enclosures

Levelling feet

For mounting underneath the base/plinth.
For unhindered access e.g. when cleaning
the floor and to compensate for floor
irregularities.

Max. permissible static load:
400 kg/foot

Adjustment range:
M12: 55 mm – 125 mm
M16: 45 mm – 120 mm

Material:
Stainless steel 1.4301

Thread	Packs of	Model No. SO
M12	1 set	2889.000
M16	1 set	2890.000

Supply includes:

1 set =
4 levelling feet, 4 mounting plates,
incl. assembly parts.

German utility model no. G 94 06 468

Levelling feet, 100 mm high

For mounting on TS and ES enclosures,
for easier floor cleaning and to compensate
for floor irregularities of ± 15 mm.
Height: 100 mm

Max. permissible static load:
350 kg/foot

Material:
Feet: Brass, nickel-plated
Threaded bolts and mounting plates:
Stainless steel 1.4301

Packs of	Model No. SO
1 set	2859.000

Supply includes:

1 set =
4 feet,
4 threaded bolts,
4 mounting plates,
including assembly parts for the enclosure.

Trim panels, modular

For cable routing in the base/plinth, made
from stainless steel, e.g. when using
levelling feet (see above).
One perforated plate segment is 175 mm
wide. The system punchings are suitable
for accommodating cable ties SZ 2597.000
for tidy cable routing.

Material:
Stainless steel 1.4301

Supply includes:
4 perforated plates

For enclosure depth mm	Number of trim panels required for a given plinth width*				Model No. SO
	600 mm	800 mm	1000 mm	1200 mm	
400	3	4	5	6	2907.000
500	3	4	5	6	2908.000
600	3	4	5	6	2913.000

* If the surface is to be completely
closed

Accessories:

Cable ties,
see Cat. 30, page 1010.

Fastening bolt for base/plinth

Through the clampable fastening bolts,
cable clamp rails and standard horizontal
C rails can be fitted.

Material:
Hexagon section steel,
19 mm across flats

Surface finish:
Zinc-plated, passivated

Supply includes:
10 fastening bolts

For trim panel height mm	Model No. SZ
100	2819.000
200	2819.200

Accessories:

Cable clamp rail,
see Cat. 30, page 898.

* only for a height of 200 mm

Cable entry plates

for TS

For simple and quick cable entry and sealing in combination with:

- Cable entry grommets
- Connector grommets.

These are used instead of segments of the standard divided gland plates.

Material:

Stainless steel 1.4301

Supply includes:

2 or 4 cable entry plates including assembly parts.

Enclosure width mm	Cutouts per plate	Packs of	Model No. TS
600	5	2	8700.600
800	8	2	8700.800
1200	6	4	8700.120

German patent no. 42 07 281
European patent no. 0560119
with validity for FR, GB, IT, NL
Japanese patent no. 2533052
US patent no. 5,422,436

Cable entry grommets

In conjunction with the cable entry plate, for simple, fast sealing of cables inserted into the base area of enclosures.

Material:

Outer cover: Polypropylene
 Seal: Cellular rubber

Protection category:

IP 55 to EN 60 529/10.91

Cables per grommet	max. Ø mm	Model No. PS
8	13	4316.000
3	21	4317.000
1	47	4318.000

Packs of 25

German patent no. 42 07 281
European patent no. 0560119
with validity for FR, GB, IT, NL
Japanese patent no. 2533052

Connector grommets

In conjunction with cable entry plates, for the entry of cables pre-assembled with connectors.

Suitable for cable diameters from 8 to 36 mm.

Material:

Outer cover: Polypropylene covered with thermoplastic elastomer
 Seal: Cellular rubber

Packs of	Model No. PS
10	4311.000

German patent no. 40 28 570

Three examples from a wide range of possibilities

The illustrations show three examples for the positioning of cable entry plates instead of segments of the standard three-part gland plates. In that way a positioning suitable for the mounting plate is possible.

Thanks to the enclosure symmetry, where dimensions permit, cable entry plates may also be inserted in the enclosure depth, right and left, analogous to the gland plates.

ACCESSORIES

Large enclosures

Side panels, screw-fastened

for TS

To finish a complete enclosure. Easy attachment on the inside vertical enclosure frame member.

Earthing inserts ensure automatic potential equalisation and a higher degree of EMC protection. Earth studs with contact surfaces already included.

Material:

Stainless steel 1.4301, 1.5 mm

Surface finish:

Brushed

Protection category:

IP 55 to EN 60 529/10.91

Supply includes:

2 side panels, 16 panel holders including assembly parts.

Height mm	Depth mm	Packs of	Model No. TS
1800	400	2	8700.840
1800	500	2	8700.850
2000	600	2	8700.060

Hose-proof hoods

for fan-and-filter units

When the hose-proof hood is mounted above the fan-and-filter unit and outlet filter in conjunction with a fine filter mat, a protection category of IP 55 to EN 60 529/10.91 is achieved. Particularly suitable for use in the food industry

Material:

Stainless steel

For fan-and-filter unit	Dimensions in mm	Model No. SK
SK 3321. . .	150 x 260 x 40	3321.800*
SK 3322. . .	176 x 270 x 55	3322.800
SK 3323. . .	233 x 410 x 55	3323.800
SK 3324. . . SK 3325. . .	282 x 500 x 85	3324.800
SK 3326. . . SK 3327. . .	350 x 560 x 110	3326.800

* Delivery time on request.

Conforms to NEMA 3R + 12 in conjunction with fan-and-filter units/outlet filters.

Cover for baying (top)

for TS

A cover may additionally be clipped over the seal between two enclosures, simply with two end caps. This prevents dirt and liquid from collecting on the baying seal.

Material:

Stainless steel 1.4301

End caps: ABS plastic, black

Surface finish:

Brushed

Supply includes:

Cover incl. 2 end caps.

Note:

May also be fitted in the width with enclosures bayed back to back.

German patent no. 19737667

For enclosure depth mm	Packs of	Model No. TS
400	1	8700.140
500	1	8700.150
600	1	8700.160

Baying connector, external

for TS

For connecting bayed TS sections from the outside.

Installation:

Simply position on the outside and screw-fasten from either inside or outside.

Material:

Stainless steel 1.4301

Supply includes:

Baying connector, including assembly parts.

German patent no. 19737668

Packs of	Model No. TS
6	8700.000

Possible alternative:

Baying technology for:

Robust baying connection when transporting bayed enclosures, see Cat. 30, page 912/913.

The installation on site or for provisional siting in the workshop, see Cat. 30, page 914/915.

Torx screw

Special screw for the holes in the enclosure frame. Suited to high stainless steel strength. For use with all enclosure systems with round holes (TS, ES, PC, AP universal consoles).

Supply includes:

1 pack of 300

Packs of	Model No. SZ
300	2486.300

ACCESSORIES

Large enclosures

Comfort handle for locking applications

for TS

Prepared for the installation of lock inserts, safety and push-button inserts.

Length: 295 mm

Material:

Die-cast zinc

Surface finish:

Matt nickel-plated

Packs of	Model No. TS
1	8611.330

Accessories:

Lock inserts, safety and push-button inserts, see below.

Lock inserts

For comfort handles and the standard TS lock (in exchange for the standard double-bit lock insert).

Material:

Die-cast zinc

Design	Model No. TS
7 mm square	8611.100
8 mm square	8611.110
6.5 mm triangular	8611.220
7 mm triangular	8611.120
8 mm triangular	8611.130
Screwdriver	8611.140
Daimler	8611.150
Double-bit, 3 mm	8611.160
Fiat	8611.170

Lock and push-button insert

For installation in the comfort handles for lock inserts.

Design	Model No. TS
Lock insert Lock no. 3524 E	8611.180*
Push-button insert	8611.190
Push-button and lock insert, lock no. 12321, no other lock is possible	8611.200*

* with 2 keys

Comfort handle for semi-cylinder

for TS

Prepared for the installation of standard semi-cylinders 40 or 45 mm in length to DIN 18 254 and security and push-button inserts.

Length: 302 mm

Material:

Die-cast zinc

Surface finish:

Matt nickel-plated

Packs of	Model No. TS
1	8611.340

Accessories:

Lock and push-button insert, see above.

Lock and push-button inserts

For installation in

- the comfort handle for semi-cylinder, see above,
- Ergoform-S standard, see Cat. 30, page 939.

Design	Model No. SZ
Lock insert Lock no. 3524 E	2467.000*
Push-button insert	2468.000
Lock and push-button insert, lock no. 2123; no other lock is possible	2469.000*

* with 2 keys

Hinge 180°

for TS

For retrospective conversion of standard doors with 130° hinges.

Single handed installation:

- Exchange frame-side hinged parts for 180° hinges (4 screws).
- Drill door at the pre-marked points.
- Screw on door-side hinge parts.
- Hang door.
- Push in captive hinge pins.

Material:

Die-cast zinc
Hinge pins: Stainless steel

Surface finish:

Matt nickel-plated

Packs of	Model No. TS
4	8701.180

Supply includes:

4 x 180° hinges, including assembly screws. For twin doors, 2 packs units are required.

Note:

Door configurations such as the comfort handle can restrict the door opening angle.

The hinge pins may only be actuated and the door removed with the door open. The hinge cannot be dismantled from the outside with the door closed (access protection).

Hinge 180°

for ES/AP universal consoles

For retro-converting standard stainless steel doors with 130° hinges, including assembly material.

Material:

Stainless steel 1.4301

Packs of	Model No. PS
6	4156.000

Viewing window

The perfect solution for display and control elements in all areas with high hygiene standards. Fitted as standard with internal 130° hinges and all-round seal.

The double-bit lock insert may be exchanged for 27 mm lock inserts, design A and Ergoform-S handle SZ 2452.000.

Material:

Stainless steel 1.4301
Single-pane safety glass

Protection category:

IP 54 to EN 60 529/10.91

Supply includes:

Viewing window with cam lock, including assembly parts.

Width mm	Height mm	Depth mm	B1 mm	Model No. FT
522	600	38	408	2793.560
722	600	38	608	2793.760

Other widths and heights available on request.

Accessories:

Lock inserts 27 mm, design A, see Cat. 30, page 942.
Ergoform-S handle SZ 2452.000, see Cat. 30, page 939.

More system accessories for perfect, cost-effective configuration of the various stainless steel cases and enclosures can be found in Rittal Catalogue 30.

With the right climate control components, you can significantly reduce the risk of expensive system failures or machine downtime caused by overheating. Heat is still the number one enemy of sensitive microelectronics. Overheating and temperature fluctuations are the most common cause of malfunctions and failures.

With one of the world's leading project ranges and a comprehensive range of services, including thermal analysis, Rittal offers individual solution concepts to minimize risks and boost productivity.

Air/water heat exchanger

For enclosure cooling in extreme ambient conditions, a combination of recooling systems and air/water heat exchangers offers an effective way of dissipating very high heat loads. If necessary, the enclosures and piping can be designed in stainless steel.

**Useful cooling output
from 600 W – 5000 W**

High cooling output, central and cost-effective

Recooling systems

Enclosure cooling, machine and process cooling as well as the cooling of liquids and emulsions can be achieved centrally from one recooling system. Several items of equipment are easily connected in parallel.

**Useful cooling output
from 0.96 kW – 176 kW**

Integral cooling technology

It sets standards for the modern unity between enclosure and cooling components, both now and in the future. The cooling unit built into the enclosure door or side panel keeps the enclosure internal temperature at the desired level, irrespective of the ambient temperature. Thanks to two mechanically separate, well-insulated air circuits, the ingress of dust from the environment into the enclosure via the cooling system is prevented.

The integral cooling system

- is sure to impress, with its particularly effective cooling
- helps to cut the time spent on assembly
- reduces investment costs for the complete unit

**Useful cooling output
from 1100 W – 2500 W**

ENCLOSURE CLIMATE CONTROL

System benefits

Safety is our top priority

SK customer service

Thermographic measurements on the populated enclosures.

Enclosure surfaces are kept free

Roof-mounted cooling units

Roof mounting means that all enclosure surfaces are kept free for control and display devices. Transportation and escape routes are not obstructed. Depending on the siting conditions and interior installation of the enclosure, we offer flexible air routing for the outer and inner circuits. Control is achieved using a built-in Basic or Comfort controller.

Useful cooling output from 500 W – 4000 W

Effective in every performance category

Wall-mounted cooling units

Whether 225 W useful cooling output for effective heat dissipation of command panels, for example, or 4,000 W for the dissipation of extremely high heat loads, the refrigeration factor of Rittal cooling unit technology demonstrates exceptionally effective use of the power input.

The increased demands on network technology design are met to perfection by the styling, with the option of full installation, partial installation or external mounting.

Like the roof-mounted cooling units, the wall-mounted cooling units are also equipped with either Basic or Comfort controllers.

Useful cooling output from 225 W – 4000 W

Risk minimisation through central monitoring

This is achieved particularly effectively, thanks to a combination of Rittal climate control components with central monitoring and control via the CMC.

Temperature limits are perfectly maintained, any potential defects are identified to enable preventive action, and service requirements are notified promptly and organised from a central location.

INDIVIDUAL SOLUTIONS TO PERFECTION

System platforms offer cost benefits

At Rittal, even "tailor-made" individual solutions are based on our comprehensive knowledge of system platforms for enclosures and cases.

In other words, the perfection and cost benefits of mass-produced products are combined with customer-specific designs and features.

The outstanding benefits include perfect quality, significantly lower costs, and precise implementation of customer requirements.

1. Assembly of system accessories

Make use of the versatile opportunities offered by Rittal system accessories! With full internal mounting available ex works.
A service to save you time and money.

2. Modification of standard components

Ideas based on serial products are implemented to perfection ex works:

- Holes and cutouts
- Insertion of acrylic or safety glass windows
- Your logo, sand/bead blasted
- Other surface finishes

Example: Duct alarm box

- AE compact enclosure with rain canopy in spray-finished stainless steel
- Cutouts with opal plexiglass panels
- Interior case for fire extinguisher and telephone

Rittal material diversity

Apart from stainless steel, we also offer enclosures in the following materials to suit all applications:

Cast aluminium

Sheet steel, electrophoretic dipcoat primed and powder coated

Sheet aluminium

Polycarbonate

Sheet steel with an aluminium zinc surface finish

Polyester, fibreglass-reinforced

3. Modified dimensions

Size variants are possible for all stainless steel enclosures on request:

- Enclosure systems TS/ES on a 25 mm pitch pattern
- Enclosure systems without pitch pattern

4. Individual solutions

Project-specific solutions, fully fitted and delivered on time – all part of the Rittal service!

GLOBAL SERVICE

Rittal combines the international network capabilities of a global player with market-specific, personalised customer care.

We use the dynamic process of communication to build upon existing common ground and inspire new areas of co-operation.

Thanks to its regional proximity, Rittal is familiar with the needs and requirements of its customers, and translates these into fast, cost-effective solutions.
