

**DELTEC® Cable Support System**

Strong, long-life and cost-saving method of securing communication cables.

## The Deltec® Cable Support System

The Deltec® Cable Support System is a user-friendly product designed to provide ease and flexibility in fastening communications cables to messenger strand. It is equally well suited for copper conductor cable, coaxial cable, fiber optic cable and inner duct in aerial applications.

The Deltec® system answers your aerial cable needs with innovative design and state-of-the-art materials. This system includes weather-resistant acetal cable straps, marine grade locking devices, and base hanger accessories for specific applications where mounting is required.

Pre-assembled Deltec® cable straps are available in standard lengths of 10" (254 mm), 13.5" (342.9 mm), and 27" (685.8 mm). Convenient 50' (15.24 m) to 3500' (1066.8 m) reels where specific lengths need to be established by the installer in the field are available. Additional "standard" lengths can be established for applications where higher volumes prevail.

### Advantages of the Deltec® System Include:

- Proven years of service
- No sharp edges — craft friendly! Cable friendly!
- Ease of installation — one wrap, no re-treading of re-strap
- Lowers installation costs
- High tensile strength after fastening
- Total flexibility in lengths when using reel
- Stackable spacers accommodate all cable sizes — no need to stock multiple sizes of individual height spacers
- Spacer designed to retain strap on each side and cradle the cable, providing restricted movement of spacer and preventing damage to cable
- In situations where multiple cables are supported, the T&B TCP360 stackable spacer may be rotated 90° and installed similarly to a single cable, yet provide the same restricting features (unlike those commonly used today)
- Month and year of manufacture stamped into strap material
- Squirrels and vermin won't eat it!

## Extra security!

### Cable Tie with Double-Locking Head

The recommended maximum continuous static loading for the DELTEC® straps is 20 lbs. per strap. For best results, suggested spacing is 15". It's the responsibility of the user to determine whether or not their application meets our recommendation.

**NOTE:** Use WT3D Tool for tensioning and cutoff.

### Specifications

- Strap and Body: Weatherable acetal; offers superior resistance to sunlight, moisture, and salt environments
- Locking Device: Marine-grade corrosion-resistant silicon copper alloy
- Deltec System Temperature Range: -30° F to 150° F; (-34° C to 66° C)
- Minimum Tensile Strength: 250 lbs. minimum (1,211 N)
- Outdoor Life: Designed to last a minimum of 20 years
- Continuous Load: 20 lbs. (9.07 kg)
- Continuous Use Temperature: -85° F to 194° F; (-65° C to 90° C)
- Color: Black
