### Save...

KUBE Connectors not only save you the high cost of flexible-conductor cable, but also save valuable real estate in your panel, because a KUBE® Connector can make a 90° turn in far less space than flex-conductor cable.

#### Space Savings — KUBE® Connector vs. Flex Conductor

## KUBE® Connectors Larger-Size Flags and Tees

### Make UL Listed 90° and T Electrical Connections with Larger Cable Sizes!

In response to customer demand, Thomas & Betts has expanded its line of Color-Keyed KUBE Connectors to include Flags and Tees for conductor sizes from 250 to 500 MCM. Forget high-cost flex-conductor cable for connections requiring 90° bends and expensive brazed or welded connectors for T connections. With versatile, modular KUBE Connectors, you can achieve economical, UL Listed, do-it-yourself connections using standard code conductor cable to 500 MCM.

- Lowest installed cost for the application
- Saves both money and space compared to flex-conductor cable
- Modular design offers unlimited connection possibilities
- Used with standard Color-Keyed lugs (straight or angled) and splices
- Lugs can be rotated 360° to any desired position before crimping on KUBE Connector
- UL Listed and CSA Certified for field installation
