

Combi-Coax No. 3

Introduction

WEICON has been developing and producing various types of cable stripper since 1967. These premium quality tools are TÜV-tested, carry the GS seal for verified safety, and were developed taking occupational safety and user-friendliness aspects into account. The WEICON range includes cable strippers, cable dismantling tools, wire strippers and various multi-function tools for professional users.

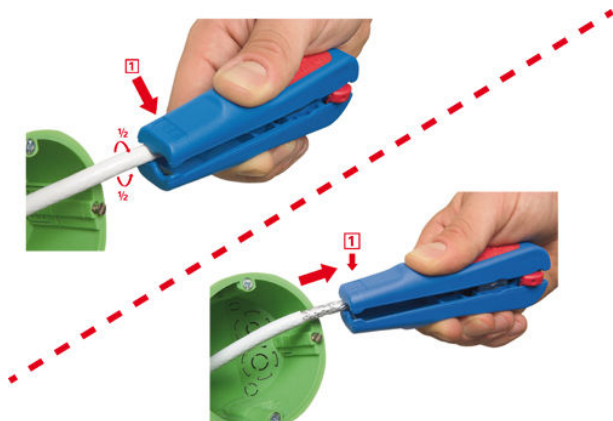

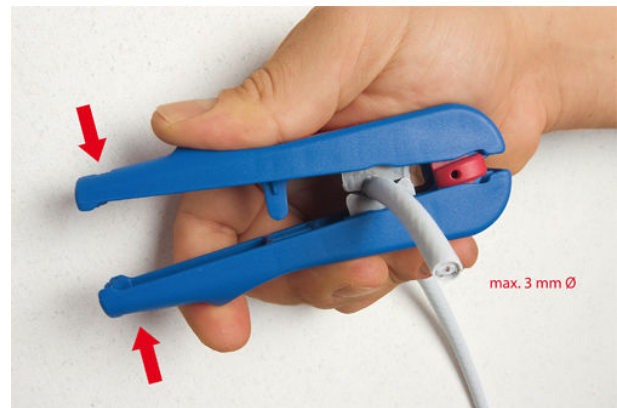

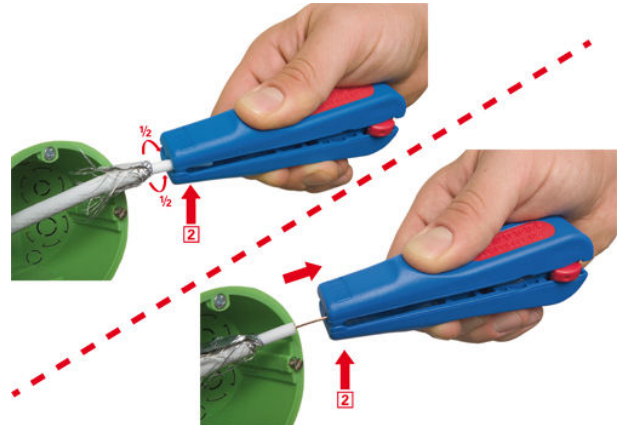

Description

The WEICON cable dismantling tools allow all common round cables to be stripped quickly and safely. The product family of cable dismantling tools includes various types, which have proved to be easy to use and to produce accurate results.

The Combi-Coax No. 3 allows two- or three-level stripping of all common coaxial cables, NYM cables and flexible cables. There is no need to adjust the cutting depth. The Combi-Coax No. 3 strips coaxial cables with a diameter of 4.8 – 7.5 mm, NYM cables of 3 x 0.75 mm² and flexible cables of 10 and 16 mm².

In addition, the Combi-Coax No. 3 has an easily-accessible side cutter for cables of up to 8 mm in diameter. When the cable dismantling tool is used, an accurate cutting form is seen during stripping. For example, the cable dismantling tool's blade on side A can be used to remove the first sheath of a coaxial cable. The inner conductor is then stripped with side B.

Technical data

Cable type	Coaxial cables, antenna and transmission cables, flexible cables
Field of use	Coaxial cables with external diameter 4.8 - 7.5 mm NYM 3 x 0.75mm ² , flexible cables 10mm ² , 16mm ²
Inner blade	Glued in fixed, not replaceable
Additional benefits	Side cutter, multi-level stripping possible, with 2 different blade spacings, length scale
Approval/certificates	Safety tested by TÜV NORD
Material	Glass fibre reinforced polyamide
Length	125 mm
Weight	55 g

Note

Working with WEICON Stripping tools is only permitted with potential free wires and conductions.
